Lichtenberg Pierre Senges, 2017-01-27 The eighteenth century German physicist Georg Christoph Lichtenberg left behind at the time of his death thousands of fragmentary notes commenting on a dazzling and at the same time puzzling array of subjects Pierre Senges's *Fragments of Lichtenberg* imaginatively and hilariously reconstructs the efforts of scholars across three centuries to piece together Lichtenberg's disparate notes into a coherent philosophical or artistic statement What emerges instead from their efforts are a wide variety of conflicting and competing Lichtenbergs the poet the physicist the philosopher the humorist and a very funny meditation on the way interpretations and speculation create new histories and new realities In just over half a century Georg Christoph Lichtenberg 1742-1799 had the time to be all of the following a hunchback a mathematician a physics professor a connoisseur of harepate a hermit an electrical theorist a skirtchaser a friend of King George III of England an asthmatic a defender of reason a hypochondriac a dying man and the author of 8 000 fragments written with ink and goose quills Traditionally those fragments have been considered no more than aphorisms to be sipped like fine schnapps but certain scholars claim however that his famous Wastebooks are really the scattered pieces of a Great Novel and that this might yet be reconstructed with the help of scissors glue and paper and by using what is left of

our imaginations The present volume retracts among other things the work undertaken for more than a century by valiant Lichtenbergians
