It is no coincidence Daphne Lamothe writes that so many black writers and intellectuals of the first half of the twentieth century either trained formally as ethnographers or worked as amateur collectors of folklore and folk culture In *Inventing the New Negro* Lamothe explores the process by which key figures such as Zora Neale Hurston Katherine Dunham W E B Du Bois James Weldon Johnson and Sterling Brown adapted ethnography and folklore in their narratives to create a cohesive collective and modern black identity Lamothe explores how these figures assumed the roles of self reflective translators and explicators of African American and African diasporic cultures to Western largely white audiences Lamothe argues that New Negro writers ultimately shifted the presuppositions of both literary modernism and modernist anthropology by making their narratives as much about ways of understanding as they were about any quest for objective knowledge In critiquing the ethnographic framework within which they worked they confronted the classist racist and cultural biases of the dominant society and challenged their readers to imagine a different set of relations between the powerful and the oppressed *Inventing the New Negro* combines an intellectual history of one of the most important eras of African American letters with nuanced
