Egon Schiele's Portraits Alessandra Comini, 1976-01-01 **Egon Schiele's Portraits** Alessandra Comini, 1990 The meaning of portraiture in the egocentric and erotic culture of Vienna at the end of the Hapsburg Empire frames Alessandra Comini's definitive lavishly illustrated study of the art of Egon Schiele 1890-1918 first published in 1975 and now available in paperback with a new preface and updated bibliography Comini analyzes Schiele's work in the context of Viennese Expressionism rising existential consciousness and the unique ambiance of Vienna The human figure forms the most compelling motif in Schiele's oeuvre which is comprised of hundreds of oils and thousands of drawings Numerous self-portraits record emotional states reflect major stylistic changes and provide a brilliant focus for this examination of his art and his life *The History of American Art Education* Peter Smith, 1996-07-22 The ideas people and events that developed art education are described and analyzed so that art educators and educators in general will have a better understanding of what has happened and is happening to visual art in the schools Peter Smith raises the issue of art education's inordinate emphasis on Eurocentric art He challenges the often expressed notion that the field of education is the cause of art education's problems and proposes that confused conceptions within the art world are just as much a root of the difficulty No other book in art education history gives such close and analytical attention to the careers of women in the field The materials on Germanic cultural and historical influences are unequalled as is the scholarly treatment of Viktor Lowenfeld probably the most influential single figure in 20th century American art education Nineteenth-Century Theories of Art Joshua C. Taylor, 1987 This unique and extraordinarily rich collection of writings offers a thematic approach to understanding the various theories of art that illumined the direction of nineteenth century artists as diverse as Tommaso Minardi and Georges Seurat It is significant that during the nineteenth century most artists felt compelled to found their artistic practice on a consciously established premise French Gothic Architecture of the Twelfth and Thirteenth Centuries Jean Bony, 2023-11-15 Gothic architecture is the most visible and striking product of medieval European civilization Jean Bony whose reputation as a medievalist is worldwide presents its development as an adventure of the imagination allied with radical technical advances the result of a continuing quest for new ways of handling space and light as well as experimenting with the mechanics of stone construction He shows how the new architecture came unexpectedly to be invented in the Paris region around 1140 and follows its history in the great cathedrals of northern France and dozens of other key buildings to the end of the thirteenth century when profound changes occurred in the whole fabric of medieval civilization Rich illustrations including comprehensive maps enhance the text and themselves constitute an exceptionally valuable documentation Despite its evident scholarly intention this book is not meant for specialists alone but is conceived as a progressive infiltration into the complexities of history at work revealing its unpredictable vitality to the uninitiated curious mind Egon Schiele's Portraits Alessandra Comini, 1974-01-01 **RILA, International repertory of the literature of**

images never before published including **Made in God's Image?** Penny Howell Jolly, 2023-12-22 The stunning mosaics that illustrate the story of Creation in the church of San Marco in Venice are the focus of Penny Howell Jolly's compelling and provocative book. Scholars of medieval art have long been interested in the Genesis mosaics because they copy a nearly destroyed fifth century illuminated Greek manuscript known as the Cotton Genesis. But instead of seeing the mosaics as a vehicle for reconstructing a lost cycle of paintings, Jolly presents them as a social document revealing the essential misogyny that existed in thirteenth century Venice. Jolly analyzes more than twenty scenes one by one in narrative order and her perceptive reading goes well beyond what the Genesis Vulgate text says about Eve and Adam. The mosaics establish Eve as the culpable character from the very moment of her Creation, says Jolly, and depict her as dangerous and unrepentant at the end. Incorporating both feminist religious and narratological studies, Jolly poses important questions on the nature of visual language as opposed to verbal language. The very ability of visual forms to recall a rich variety of references is one source of their power and propaganda must have enough breadth of reference to be read by diverse groups. The San Marco cupola, Jolly maintains, is dealing in powerful propaganda and her pictorial observations offer an articulate and refreshing new view of this well-known work. Österreich-Konzeptionen und jüdisches Selbstverständnis Hanni Mittelman, Armin A. Wallas, 2015-03-10 Der Sammelband umfasst die Beiträge eines im März 2000 an der Hebrew University Jerusalem veranstalteten interdisziplinären Symposiums. Es werden unterschiedliche österreichische Identitätskonzeptionen, die sich im Laufe der facettenreichen politischen und kulturellen Geschichte Österreichs vom 19. Jahrhundert bis zur Gegenwart herausgebildet haben, in Hinsicht auf ihre ideologischen Zielsetzungen analysiert. Solcherart werden die Brüche, Widersprüche und Mythen österreichischer Geschichte und Kultur sichtbar. Des Weiteren werden die heterogenen und vielgestaltigen Modelle und Konstruktionen jüdischer Identitäten dargestellt, die zwischen Emanzipation und Assimilation, Zionismus und Antisemitismus, Moderne und Exil ausgearbeitet wurden.

Constructing the Viennese Modern Body Nathan Timpano, 2017-05-25 This book takes a new interdisciplinary approach to analyzing modern Viennese visual culture, one informed by Austro-German theater, contemporary medical treatises centered on hysteria, and an original examination of dramatic gestures in expressionist artworks. It centers on the following question: How and to what end was the human body discussed, portrayed, and utilized as an aesthetic metaphor in turn of the century Vienna? By scrutinizing theatrically hysterical performances, avant-garde puppet plays, and images created by Oskar Kokoschka, Koloman Moser, Egon Schiele, and others, Nathan J. Timpano discusses how Viennese artists favored the pathological or puppet-like body as their contribution to European modernism.
