Barnes, Michael Brainin, 2011-10-04 Evidence based peer reviewed best practice management guidelines for neurologists Diagnosis is only part of the puzzle Effective treatment is what your patients really want The European Federation of Neurological Societies has been publishing management guidelines in the European Journal of Neurology for many years Developed by a consensus approach using graded evidence and then fully peer reviewed these guidelines provide gold standard best practice guidance to the treatment of neurological disorders They help bridge the gap between what is done and what should be done for patients with neurological disorders The basic guidelines have been expanded with Recommendations based on strong evidence and Good Practice Points where only weaker evidence is available The Guidelines in this volume include amongst others Neurostimulation therapy for neuropathic pain Molecular diagnosis for a

range of neurological conditions Intravenous immunoglobulin in the treatment of neurological diseases Sleep disorders in neurodegenerative disorders and stroke Management of low grade gliomas Treatment of miscellaneous idiopathic headache disorders The European Handbook of Neurological Management provides a thoroughly rounded and grounded approach to best practice neurological management using evidence based principles Titles of related interest Cerebrovascular Ultrasound in Stroke Prevention 2e Alexandrov ed ISBN 9781405195768 Parkinsons s Disease Non Motor and Non Dopaminergic Features Olanow Stocchi and Lang eds ISBN 9781405191852 Hyperkinetic Movement Disorders Differential Diagnosis and Treatment Albanese and Jankovic eds ISBN 9781444333527 Handbook of Neurological Sports Medicine Petraglia, Anthony, Bailes, Julian, Day, Arthur, 2014-07-15 Provides techniques for diagnosis and treatment of concussion and other injuries to the head spine and peripheral nervous system This evidence based reference bridges the gap between principles and practice to better manage these serious injuries *A Handbook of Neurological Investigations in Children* Mary D. King, John B. P. Stephenson, 2009-09-15 Neurological disorders in children are common families want to know what is wrong why it happened and whether it will happen again Management and treatment depend on establishing the diagnosis which usually requires investigations but the number of possible neurological investigations is now very large indeed and uncritical investigations may be seriously misleading and often costly This book based on the authors vast combined personal experience gives practical guidance on how to target any specific condition with the minimum of tests Part 1 is a brief distillation of advice on clinical history and examination introducing the problems that beset those who deal with neurological disorders in childhood Part 2 outlines the investigations available to solve these diagnostic problems Part 3 takes a problem oriented approach to the most appropriate investigations in the various clinical scenarios that may present to the practitioner the starting point is the patient s presentation not the diagnosis Throughout vignettes of real cases help to illustrate the use of the tests in different clinical situations The authors co wrote the hugely popular Handbook of Neurological Investigations the Blue Book 20 years ago This new book while closely following the highly successful approach of the earlier title is thoroughly up to date with fresh material new case vignettes and additional investigations covered **Handbook of Neurological Rehabilitation** Richard J.
