The Oxford Handbook of Developmental Psychology, Vol. 1 Philip David Zelazo, 2013-01-15. Research in developmental psychology which examines the history, origins and causes of behavior and age-related changes in behavior seeks to construct a complex multi-level characterization of behavior as it unfolds in time across a range of time scales from the milliseconds of reaction time to the days and weeks of childhood, the decades of the human lifespan and even beyond to multiple generations. Behavior in this view is embedded within what is essentially a dynamic system of relations extending deep within individuals. Thorough and engaging, this handbook explores the impact of this research on what is now known about psychological development from birth to biological maturity and it highlights the extent to which the most cutting-edge developmental science reflects a new kind of intellectual synthesis, one that reveals how cultural, social, cognitive, neural and molecular processes work together to yield human behavior and changes in human behavior. With insightful contributions from more than 50 of the world's leading developmental scientists, these two volumes will serve as an influential and informed text for students and as an authoritative desk reference for years to come.

A Handbook for Data Analysis in the Behavioral Sciences Gideon Keren, Charles Lewis, 2014-01-14. Statistical methodology is often conceived by social scientists in a technical manner; they use it for support rather than for illumination. This two-volume set attempts to provide some partial remedy to the problems that have led to this state of affairs. Both traditional issues such as analysis of variance and the general linear model as well as more novel methods like exploratory data analysis are included. The editors aim to provide an updated survey on different aspects of empirical research and data analysis facilitate the understanding of the internal logic underlying different methods and provide novel and broader perspectives beyond what is usually covered in traditional curricula.
