Handbook Of Thermodynamic High Temperature Process Data

A. L. Suris

Handbook Of Thermodynamic High Temperature Process Data:

Handbook of Thermodynamic High Temperature Process Data A. L. Suris, 1987 This handbook presents original computer generated reference data describing the thermodynamic properties of high temperature processes Included are the reduction of chlorides and oxides pyrolysis and conversion of hydrocarbons production of nitrides carbides oxides and other compounds Process parameters and thermodynamic properties of dissociation products for various gases are determined over a wide range of variables Overall the handbook treats nearly 200 chemical process systems spanning various temperatures and pressures

Molecular Design A.L. Horvath, 2012-12-02 This book is a systematic presentation of the methods that have been developed for the interpretation of molecular modeling to the design of new chemicals The main feature of the compilation is the co ordination of the various scientific disciplines required for the generation of new compounds The five chapters deal with such areas as structure and properties of organic compounds relationships between structure and properties and models for structure generation The subject is covered in sufficient depth to provide readers with the necessary background to understand the modeling techniques The book will be of value to chemists in industries involved in the manufacture of organic chemicals such as solvents refrigerants blood substitutes etc It also serves as a reference work for researchers academics consultants and students interested in molecular design

Sci-Tech Libraries Serving Zoological Gardens Ellis Mount, 2019-12-06 In response to the general lack of information about zoo libraries this book first published in 1988 compiles a collection of descriptions of the libraries serving six American zoos The accounts of zoo libraries include the National Zoological Park in Washington DC the Lincoln Park Zoo in Chicago and the Minnesota Zoological Garden Library in St Paul The contributors detail the types of collections and services offered at zoo libraries In addition a survey made of 78 American zoo libraries is included including information about their staffs facilities collections and services as well as data on 32 archive collections

Physical and Chemical Processes in Gas Dynamics physical and Chemical Kinet Ics and Thermodynamics G. G. Chernyi, 2004 Applied Mechanics Reviews , 1988 Thermodynamic and Physical Property Data Carl L. Yaws, 1992 Physical and thermodynamic property data for hydrocarbon and organic compounds are of special value to engineers in the chemical processing and petroleum refining industries This book offers engineers and scientists quick access to this data by the use of tabular information

Mechanical Engineer's Data Handbook J. Carvill, 2014-05-15 Mechanical Engineer s Data Handbook provides a

comprehensive yet concise set of information relevant in the practice of mechanical engineering The book is comprised of eight chapters that cover the main disciplines of mechanical engineering The text first details the strengths of materials and then proceeds to discussing applied mechanics Next the book talks about thermodynamics and fluid mechanics The fifth chapter presents manufacturing technology which includes cutting tools metal forming processes and soldering and brazing The next two chapters deal with engineering materials and measurements respectively The last chapter of the text presents general data such as units symbols and fasteners The book will be most useful to students and practitioners of mechanical engineering

Handbooks and Tables in Science and Technology Russell Powell,1994-08-15 The bibliography covers physics chemistry engineering mathematics astronomy biology geology agriculture medicine environment energy equations manufacturing materials measurement carcinogens and pesticides

Scientific and Technical Aerospace Reports,1992-06 NASA Tech Briefs ,1986 *CRC Handbook of Applied Thermodynamics* David A. Palmer,2019-07-23 This practical handbook features an overview of the importance of physical properties and thermodynamics and the use of thermodynamics to predict the extent of reaction in proposed new chemical combinations The use of special types of data and prediction methods to develop flowsheets for probing projects and sources of critically evaluated data dividing the published works into three categories depending on quality are given Methods of doing one's own critical evaluation of literature a list of known North American contract experimentalists with the types of data measured by each methods for measuring equilibrium data and thermodynamic concepts to carry out process optimization are also featured
