The Language of Daily Life in England (1400–1800) Arja Nurmi, Minna Nevala, Minna Palander-Collin, 2009-04-15 The Language of Daily Life in England 1400 1800 is an important state of the art account of historical sociolinguistic and socio pragmatic research The volume contains nine studies and an introductory essay which discuss linguistic and social variation and change over four centuries Each study tackles a linguistic or social phenomenon and approaches it with a combination of quantitative and qualitative methods always embedded in the socio historical context The volume presents new information on linguistic variation and change while evaluating and developing the relevant theoretical and methodological tools The writers form one of the leading research teams in the field and as compilers of the Corpus of Early English Correspondence have an informed understanding of the data in all its depth This volume will be of interest to scholars in historical linguistics sociolinguistics and socio pragmatics but also e.g. social history The approachable style of writing makes it also inviting for advanced students

Methods of Text and Discourse Analysis Stefan Titscher, 2000-09-22 This volume is the most comprehensive overview to date of sociologically orientated approaches to text and discourse analysis and is worth reading even for those who are interested only in purely linguistic approaches to text and discourse Its main merit I think is that it introduces approaches which up to now have hardly been admitted into the universe of scientific discourse Discourse Studies Methods of Text and Discourse Analysis provides the

most comprehensive overview currently available of linguistic and sociological approaches to text and discourse analysis Among the 10 linguistic and sociological models surveyed in this book some of the more important are Grounded Theory Content Analysis Conversation Analysis and Critical Discourse Analysis The book presents each approach according to a standardised format which allows for direct systematic comparisons The fully annotated lists of sources provide readers with an additional means of evaluation of the competing analytical methods Interdisciplinary and international in its aims Methods of Text and Discourse Analysis suggests the benefits both linguists and sociologists will derive from a more intimate knowledge of each others methods and procedures

Research in Clinical Pragmatics Louise Cummings, 2017-01-05 This is the first volume to present individual chapters on the full range of developmental and acquired pragmatic disorders in children and adults In chapters that are accessible to students and researchers as well as clinicians this volume introduces the reader to the different types of pragmatic disorders found in clinical populations as diverse as autism spectrum disorder traumatic brain injury and right hemisphere language disorder The volume also moves beyond these well established populations to include conditions such as congenital visual impairment and non Alzheimer dementias in which there are also pragmatic impairments Through the use of conversational and linguistic data the reader can see how pragmatic disorders impact on the communication skills of the clients who have them The assessment and treatment of pragmatic disorders are examined and chapters also address recent developments in the neuroanatomical and cognitive bases of these disorders

Of Mind and Machine Chunshen Zhu, Chengzhi Jiang, 2024-06-28 Of Mind and Machine provides a broad perspective on multi level dialogic engagements between text and reader as seen from the use of language in presenting information to generate a discursive experience in various sociocultural settings The book observes contexts such as national literature in translation diplomatic speech events visual verbal inter semiotic translation second language learning interpreter training and computer aided teaching of translation and bilingual writing These present a unifying interest in textual accountability between form function and effect that has been examined from a dual perspective of rhetoric and pragmatics The research embodies a significant prospect of integration of academic originality with technological innovation to advance language education in the present digital era Theoretically well founded the book does not confine itself to a self contained system of conceptions and methods Instead it demonstrates a rich variety of research possibilities in support of theorisation and education in the field of language and translation studies This edited volume is primarily intended for advanced undergraduates postgraduates researchers and teachers within the fields of language and translation applied linguistics and discourse analysis

Pragmatic Markers and Sociolinguistic Variation Gisle Andersen, 2001 This book combines theoretical work in linguistic pragmatics and sociolinguistics with empirical work based on a corpus of London adolescent conversation It makes a general contribution to the study of pragmatic markers as it proposes an analytical model that involves notions such as subjectivity interactional and textual capacity and the distinction between contextual alignment

divergence These notions are defined according to how information contained in an utterance interacts with the cognitive environment of the hearer Moreover the model captures the diachronic development of markers from lexical items via processes of grammaticalisation arguing that markerhood may be viewed as a gradient phenomenon The empirical work concerns the use of like as a marker as well as a characteristic use of two originally interrogative forms innit and is it which are used as attitudinal markers throughout the inflectional paradigm despite the fact that they contain a third person singular neuter pronoun The author provides an in depth analysis of these features in terms of pragmatic functions diachronic development and sociolinguistic variation thus adding support to the hypothesis that adolescents play an important role in language variation and change

Exploring Identity Work in Chinese Communication Xinren Chen,2021-10-21 There is growing acceptance among pragmatics that identity is often de constructed and negotiated in communication in order to impact the outcome of the interaction Filling an important gap in current research this book offers the first systematic pragmatic theory to account for the generative mechanisms of identity in communication Using data drawn from real life communicative contexts in China Xinren Chen examines why identity strategies are adopted how and why identities are constructed and what factors determine their appropriateness and effectiveness In answering these questions this book argues that identity is an essential communicative resource present across various domains and able to be exploited to facilitate the realization of communicative needs Demonstrating that communication in Chinese involves the dynamic choice and shift of identity by discursive means Exploring Identity Work in Chinese Communication suggests that identity is intersubjective in communication in all languages and that it can be accepted challenged or even deconstructed

Thoughts and Utterances Robyn Carston,2008-04-15 Thoughts and Utterances is the first sustained investigation of two distinctions which are fundamental to all theories of utterance understanding the semantics pragmatics distinction and the distinction between what is explicitly communicated and what is implicitly communicated Features the first sustained investigation of both the semantics pragmatics distinction and the distinction between what is explicitly and implicitly communicated in speech

Construction Grammars Jan-Ola

Östman, Mirjam Fried, 2005-02-28 The notion construction has become indispensable in present day linguistics and in language studies in general This volume extends the traditional domain of Construction Grammar CxG in several directions all with a cognitive basis Addressing a number of issues such as coercion discourse patterning language change the contributions show how CxG must be part and parcel of cognitively oriented studies of language including language universals The volume also gives informative accounts of how the notion construction is developed in approaches that are conceptually close to and relatively compatible with CxG Conceptual Semantics Word Grammar Cognitive Grammar Embodied Construction Grammar and Radical Construction Grammar
