

1 INTRODUCTION

1.1 Purpose of the CT Study Instruction Manual

The purpose of this instruction manual is to help you complete original and revised CT studies for your treatment plant using the CT Template.

1.2 What Systems Can Use the New Automated CT Study Template?

The Template is primarily intended for small and medium size treatment plants. The template is designed for treatment plants with no more than 10 disinfection zones, each zone consisting of no more than 10 treatment units. If your plant does not meet these requirements, your CT study will need to be completed manually.

1.3 How Is This Instruction Manual Organized?

Table 1-1 gives a summary of the chapters in this manual and what they cover.

Table 1-1: CT Study Template Guidance Manual Chapters

Chapter	Topics
1	Introduction This chapter describes who is eligible to use the new Template and discusses how to use this guidance manual.
2	CT Studies and the CT Study Approval Letter This chapter details the concepts used in the preparation of a CT Study and the subsequent approval process. A firm understanding of the background presented here is critical to the preparation of an accurate CT Study.
3	Describing Your Treatment Plant This chapter presents the guidelines you will use follow in writing a narrative description and preparing a plant schematic.
4	Describing Your Disinfection Zones This chapter takes you through the steps involved with customizing the Template to accurately reflect the number of disinfection zones and treatment units in your treatment plant. This chapter outlines the information you must enter to characterize your disinfection process.
5	Evaluating Your Disinfection Protocol Chapter 5 describes the Calculator worksheet of the CT Study Template and the information you must provide to determine whether your disinfection process provides adequate disinfection.
6	Submitting Your CT Study Report This chapter presents the steps involved with submitting your complete CT Study Report to the TCEQ.

Handbook Of Procedures For The Design Of Instruction:

Handbook of Procedures for the Design of Instruction Leslie J. Briggs, Walter W. Wager, 1981 Abstract A handbook for instructors students and practicing instruction designers provides procedures and information concerning the design of print or non print instructional materials including information tests performance objectives how to do it applications examples exercises and answer keys Topics include instruction design basics determining needs objectives priorities resources and constraints for selecting an instruction based delivery system guidelines for defining and writing objectives procedures for organizing the course the study unit and the lesson a discussion of factors influencing media selection the design of lessons and materials student learning assessment a formative evaluation strategy and the evaluation of the instructor s training Information tests and exercises accompany most of the 12 chapters Numerous illustrations and examples are given throughout the text wz **Handbook of Procedures for the Design of Instruction** ,1972 Instructor's Guide to Handbook of Procedures for the Design of Instruction Leslie J. Briggs,1972 *Designing Instructional Systems* A J Romiszowski,2016-01-08 This book deals with large scale or macro level instructional design which is referred to by other authors variously as curriculum development course design training system design or instructional systems design The emphasis throughout the book is on the application of a systems approach which implies both a way of thinking about the problem and a methodology for seeking and developing solutions Thus the approach of the book is problem oriented The successful problem solver requires more than a technique or procedure He requires experience of similar problems some general principles that he can apply to the class of problems and a great deal of creativity to develop an optimal method of solving each problem This book brings together the theories and practical experience that have been built up by instructional technologists over the last two decades the techniques that are currently most used for the analysis of problems in education and for their solution and a range of new ideas specially developed by the author to encourage the creative element so often missing from educational materials This book is intended for anyone involved in instructional design It is designed on a grid structure to facilitate the reader s choice of chapters Those who wish to gain a general overview may concentrate on the chapters at the theory base and analysis levels Those more practically concerned with course design will find much of use in the synthesis and evaluation levels Those who wish simply to discover what s new in this book and its treatment of instructional design will find what they are seeking principally in the analysis and evaluation levels **Student's Guide to Handbook of Procedures for the Design of Instruction** Leslie J. Briggs,1972 *Handbook of Procedures for the Design of Instruction: Student's Guide* Leslie J. Briggs,1972 Principles of Instructional Design Robert Mills Gagné,Leslie J. Briggs,1979 Abstract A reference text for professional educators presents guidelines and principles Procedures of instructional design are related to the goals of various teaching models The material is organized into 4 principal sections including basic principles of instructional systems and their design basic processes in learning and instruction emphasizing

the goals and outcomes of instruction and factors associated with the varieties of learning guidelines and models for designing instruction and various instructional delivery systems for group or individualized instruction and methods for evaluating instruction efficacy wz AV Instructional Technology Manual for Independent Study James Wilson Brown, Richard Byrd Lewis, Richard B.
