*Free Radicals, Oxidative Stress, and Antioxidants* Tomris Özben, 2013-06-29 There has been an explosion of research related to free radicals and antioxidants in recent years and hundreds of laboratories

worldwide are actively involved in many aspects of free radicals oxidative stress and antioxidants. The literature on these topics increases exponentially every year. Over the last few years we have been fortunate to witness a widespread recognition of the important role of free radicals in a wide variety of pathological conditions including diseases such as atherosclerosis, cardiovascular and neurological diseases, ischemia, emphysema, diabetes, radiation injury, cancer, etc. In addition, many laboratories are studying the role of free radicals in the inexorable process of aging. Increased evidence involves free radicals with the etiology of various diseases, thereby suggesting the use of antioxidants as a viable therapeutic approach for the treatment of free radical mediated pathologies. Despite these impressive developments, many important aspects of free radical and antioxidant research are open for investigation. It is important to understand the overall mechanisms involved in free radical mediated physiological and pathological conditions. This knowledge will undoubtedly lead to the development of new therapeutic approaches to prevent or control free radical related diseases. This book contains the proceedings of the NATO Advanced Study Institute (ASI) on Free Radicals, Oxidative Stress and Antioxidants, Pathological and Physiological Significance, which was held in Antalya, Turkey, from May 24 to June 4, 1997.

**Bio-Farms for Nutraceuticals**  
 Maria Teresa Giardi, Giuseppina Rea, Bruno Berra, 2011-06-26. Bio Farms for Nutraceuticals can be said to have been born of the NUTRA SNACKS project within the Sixth Framework Programme Priority on Food Quality and Safety. One objective of NUTRA SNACKS was to improve the nutritional and eating properties of ready-to-eat products and semi-prepared foodstuffs through better monitoring of the quality and safety of raw materials and the development of innovative processes along the production chain. Another main objective of the project was the production of ready-to-eat snacks with high nutraceutical activity. Seven research institutes and three companies in six European countries were involved in this effort. The co-operation resulted in the production of food having a high content of natural metabolites with the following beneficial health effects:

anticancer antilipidemic anticholesterol antimicrobial antibacterial antifungal antiviral antihypertensive anti inflammatory and antioxidant activities
