State of the World 2004 Worldwatch Institute,2014-04-08 State of the World 2004 takes a fresh look at the trends that have put the global economy on a collision course with the Earth s ecosystems This year s edition has a special focus on the theme of consumption It questions whether a less consumptive society is possible and concludes that it is essential The book explores overconsumption a by product of affluence and underconsumption linked to poverty and provides behind the scenes exposes of the devastating environmental impacts of some of our most popular products from plastic bags to paper to mobile phones Published annually in 28 languages each edition draws on the breadth of expertise of Worldwatch s award winning team of writers and researchers State of the World is relied upon by national governments UN agencies development workers and law makers for its authoritative and up to the minute analysis and information It is essential for anyone concerned with building a positive global future

Farming and the Fate of Wild Nature Daniel Imhoff,Jo Ann Baumgartner,2012-07-16 Farming and the Fate of Wild Nature addresses an urgent and complex issue facing communities and cultures throughout the world the need for heightened land stewardship and conservation in an era of diminishing natural resources Agricultural lands in rural areas are being purchased for development Water scarcities are pitting urban and development expansion against agriculture and conservation needs The

farming population is ageing and retiring while those who remain struggle against low commodity prices international competition rising production costs and the threat of disappearing subsidies We are living amidst a major extinction crisis much of it driven by agriculture as well as an increasing shift toward a global urban populace The modern diet driven by a grain fed livestock industry is no longer connected with the ecosystems that support it In international circles experts are arguing that further intensification of agriculture through industrialization and genetic modification will be necessary to both feed an exploding human population and to save what is left of wild biodiversity This book takes up where its predecessor the award winning Farming with the Wild left off Featuring a wide range of in depth essays articles and other materials by such authors as Aldo Leopold Wendell Berry Michael Pollan Fred Kirschenmann and Daniel Imhoff this book persuasively demonstrates that farm and ranch operations which coexist with wild nature are necessary to sustain biodiversity and beauty on the landscape In fact as this invaluable educational resource demonstrates they are essential in the challenge of building sane healthy and hopeful human societies
