The Measurement of Individual Well-Being and Group Inequalities Joseph Deutsch, Jacques Silber, 2013-07-31 Although most traditional economic theory puts the individual at the centre of analysis more recent approaches have acknowledged the importance of a wider sense of identity as a determinant of individual behaviour Whether it is ethnicity religion or gender group membership is a central part of human life This book presents new advances in areas which consider both the individual and the group when measuring inequalities and well being The first part of the book covers topics such as relative deprivation and happiness domains where even economists have now recognized the importance of reference groups in the assessment of individuals well being The second part is devoted to the concept of polarization a growing field of inquiry among economists The third part looks at income and wage intra generational mobility while the fourth part reports on recent advances in measuring the significant differences between and within groups The book concludes with several chapters devoted to poverty and social exclusion stressing in particular the need for a multidimensional approach to these topics This collection offers a fresh look at the way individual well being should be measured by emphasizing the role of reference groups and the idea of polarization as well as stressing the impact

Handbook of Income Distribution Anthony Barnes Atkinson, François Bourguignon, 2000

Modeling Income Distributions and Lorenz Curves Duangkamon Chotikapanich, 2008-09-16 Jean Jacques Rousseau wrote in the Preface to his famous Discourse on Inequality that I consider the subject of the following discourse as one of the most interesting questions philosophy can propose and unhappily for us one of the most thorny that philosophers can have to solve For how shall we know the source of inequality between men if we do not begin by knowing mankind Rousseau 1754 This citation of Rousseau appears in an article in Spanish where Dagum 2001 in the memory of whom this book is published also cites Socrates who said that the only useful knowledge is that which makes us better and Seneca who wrote that knowing what a straight line is is not important if we do not know what rectitude is These references are indeed a good illustration of Dagum s vast knowledge which was clearly not limited to the eld of Economics For Camilo the rst part of Rousseau s citation certainly justified his interest in the eld of inequality which was at the centre of his scientific preoccupations It should however be stressed that for Camilo the second part of the citation represented a solid argument in favor of giving macroeconomic foundations to microeconomic behavior Dagum 2001 More precisely individualism and methodological holism complete each other in contributing to the explanation of individual and social behavior Dagum 2001

Poverty and Social Exclusion around the Mediterranean Sea Valerie Berenger, Florent Bresson, 2012-11-15 The events taking place in several of South Mediterranean countries since December 2010 show that multiple deprivations may be powerful drivers of political instability Though improvements of the living conditions have been regularly principal demands along with civil and political liberties in the demonstrations one of the main striking facts about this so called Arab Spring is that poverty had not been given the same emphasis in southern Mediterranean countries during the last decades as in other areas of the developing and emerging world Although the growing recognition that poverty is a multidimensional concept studies of poverty in South Mediterranean countries have often been dominated by a monetary approach However there is a growing evidence that it is suitable to go beyond the money metric measures of poverty and to supplement its results with other approaches that adopt a broader definition of well being Though poverty is only one of many causes of this Arab Spring we argue that it is a key feature to understand these historic events and that it is necessary to draw a detailed picture of poverty and social exclusion for each one of these countries Moreover if the Union for the Mediterranean succeeds in fostering economic cooperation within the Mediterranean area the focus on the population's well being of its southern members will deserve scrutiny in the next few years to understand the forces that will drive the Euro Mediterranean relationships in particular for migration issues This book brings together recent advances on the measurement of poverty with empirical applications on South Mediterranean countries It introduces new tools for analyzing poverty and shows that the linkages between income and well being are not straightforward and hinge on many determinants It shows that the efficiency of poverty reducing policies should also be assessed on the basis of the satisfaction of non income needs like health education or participation in social life

A Brighter Future Richard Holt, Daphne Greenwood, 2014-12-18 As the United States continues its slow climb out of the Great Recession it is important to focus on new directions to improve the standard of living in America This book explores what is behind a faltering standard of living in the United States since the early 1980s and what can be done to restore it The book is uniquely valuable in going beyond mainstream thinking about how to restore prosperity Economics has traditionally equated economic growth increases in per capita income with improvements in quality of life and the standard of living This book questions that assumption The different chapters in the book show the standard of living as being more than income to include many non market aspects such as access to public goods roads clean air and water schools parks and museums intangible aspects of quality of life such as equity and a sense of community and broadly based economic opportunities This means that improving the standard of living is a multi dimensional challenge rather than one of solely increasing aggregate demand productivity or GDP This book embodies a pluralistic approach and draws on the expertise of a wide array of thinkers The intended audience is for various courses offered in economics sociology political science public policy programs and in environmental and

ecological studies The Asian 'Poverty Miracle' Jacques Silber,Guanghua Wan,2016-09-30 Following rapid economic growth in recent decades Asia and the Pacific experienced an impressive reduction in extreme poverty but this drop was not uniform and achievements are still incomplete Vulnerability to natural disasters the increasing impact of climate change and economic crises should all be taken into account There is also a need to consider the multidimensional nature of poverty and the non uniformity of the decrease across different ethnic groups This book explores the Asian poverty miracle and argues for the development and use of an Asia specific poverty line *Venezuela Before Chávez* Ricardo Hausmann,Francisco R. Rodríguez,2015-06-13 At the beginning of the twentieth century Venezuela had one of the poorest economies in Latin America but by 1970 it had become the richest country in the region and one of the twenty richest countries in the world ahead of countries such as Greece Israel and Spain Between 1978 and 2001 however Venezuela s economy went sharply in reverse with non oil GDP declining by almost 19 percent and oil GDP by an astonishing 65 percent What accounts for this drastic turnabout The editors of *Venezuela Before Chávez* who each played a policymaking role in the country s economy during the past two decades have brought together a group of economists and political scientists to examine systematically the impact of a wide range of factors affecting the economy s collapse from the cost of labor regulation and the development of financial markets to the weakening of democratic governance and the politics of decisions about industrial policy Aside from the editors the contributors are Omar Bello Adriana Berm dez Mat as Braun Javier Corrales Jonathan Di John Rafael Di Tella Javier Donna Samuel Freije Dan Levy Robert MacCulloch Osmel Manzano Francisco Monaldi Mar a Antonia Moreno Daniel Ortega Michael Penfold Jos Pineda Lant Pritchett Cameron A Shelton and Dean Yang
