Hanging by a Thread William Knox, Mary S. Thompson, 1995 *The Ashgate Companion to the History of Textile Workers, 1650–2000* Dr Elise van Nederveen Meerkerk, Mr Els Hiemstra-Kuperus, Prof Dr Lex Heerma van Voss, 2013-06-28
This impressive collection offers the first systematic global and comparative history of textile workers over the course of 350 years. This period covers the major changes in wool and cotton production and the global picture from pre industrial times through to the twentieth century. After an introduction the first part of the book is divided into twenty national studies on textile production over the period 1650–2000. To make them useful tools for international comparisons each national overview is based on a consistent framework that defines the topics and issues to be treated in each chapter. The countries described have been selected to include the major historic producers of woollen and cotton fabrics and the diversity of global experience and include not only European nations but also Argentina, Brazil, China, Egypt, India, Japan, Mexico, Turkey, Uruguay and the USA. The second part of the book consists of ten comparative papers on topics including globalization and trade, organization of production, space, identity, workplace, institutions, production relations, gender, ethnicity and the textile firm. These are based on the national overviews and additional literature and will help apply current interdisciplinary and cultural concerns to a subject traditionally viewed largely through a social and economic history lens. Whilst offering a unique reference source for anyone interested in the history of a particular country's textile industry, the true strength of this project lies in its capacity of international comparison. By providing global comparative studies of key textile industries and workers both geographically and thematically, this book provides a comprehensive and contemporary analysis of a major element of the world's economy. This allows historians to challenge many of the received ideas about globalization, for instance, highlighting how global competition for lower production costs is by no means a uniquely modern issue and has been a feature of textile production for much of the last 350 years. As such, this collection will be welcomed by all scholars engaged in the history of the textile industry and international trade.

Scottish Society, 1707–1830 Christopher A. Whatley, 2000
This book challenges conventional wisdom and provides new insights into Scottish social and economic history. Christopher A. Whatley argues that the Union of 1707 was vital for Scottish success but in ways which have hitherto been overlooked. He proposes that the central place of Jacobitism in the historiography of the period should be revised. Comprehensive in its coverage, the book is based not only on an exhaustive reading of secondary material but also incorporates a wealth of new evidence from previously little used or unused primary sources.

Transformation of Scotland Tom M. Devine, 2019-07-29
This is the first comprehensive history of the Scottish economy over the last three centuries to appear in a generation. Written by leading scholars in the field, it presents state of the art research in an accessible style to all those interested in understanding the historical context of modern Scotland. Fresh interpretations are revealed on such key and controversial issues as the impact of the Union of 1707, the Clearances, the rise and fall of Scottish heavy industry and the recent

transformation of the modern economy The distinctive features of the Scottish economic system are stressed but these are also analysed within a British and international context The focus of the volume is both broad and detailed with full treatment of agriculture finance industry and the service sector as well as the impact of momentous economic changes on the lives of the people and the massive new role in the twentieth century of the state in economic affairs At a time of intense debate on the present and future condition of Scotland under a devolved parliament and executive this book provides the essential background and the long run perspectives on the challenges and opportunities facing the nation Modern Scottish History: 1707 to the Present Anthony Cooke, Ian Donnachie, Ann MacSween, Christopher A. The Irish in the West of Scotland, 1797-1848 Martin Mitchell,2001-01-01 The prevailing historical view of the Catholic Irish in the first half of nineteenth century Scotland is that they were despised by native workers because of their religion and because most were employed as strike breakers or low wage labour As a result of this hostility the Catholic immigrants were viewed as a separate isolated community concerned mainly with Irish and Catholic issues and unable or unwilling to participate in trade unions strikes and radical reform movements The Protestant Irish immigrants on the other hand were believed to have integrated with little difficulty mainly because of religious families and cultural ties with the Scots This study presents a radically different view It demonstrates that whereas some Irish workers were used as a blackleg or cheap labour others participated in trade unions and strikes alongside native workers most notably in spinning weaving and mining industries The various agitations for political change in the region are analysed revealing that the Irish Catholic and Protestant were significantly involved in all of them It is also shown that Scottish reformers welcomed and indeed actively sought Catholic Irish participation The campaigns for Catholic emancipation and the repeal of the Act of Union of 1800 are reviewed as are the attitudes of the Scottish Catholic clergy to the political activities of their overwhelmingly Irish congregations
