## **Hanging Out In The Virtual Pub:**

*Hanging Out in the Virtual Pub* Lori Kendall, 2002-06-27 Lori Kendall is one of the first to explore the brave new world of social relations as they have evolved on the Internet. In this highly readable ethnography she examines how men and women negotiate their gender roles on an online forum she calls BlueSky. The result is a first rate analysis of the emerging social phenomenon of Internet mediated communication and a ground breaking study of the social and cultural effects of a medium that allows participants to assume identities of their own choosing. Despite the common assumption that the personas these men and women craft for themselves bear little resemblance to reality, Kendall discovers that the habits of BlueSky stick surprisingly close to the facts of their actual lives and personalities.

**Hanging Out in the Virtual Pub** Lori Kendall, 2002 In this ethnography Lori Kendall examines how men and women negotiate their gender roles on an online forum she calls BlueSky. **Hanging Out in the Virtual Pub** Lori Sue Kendall, 1998 *Virtual English* Jillana B. Enteen, 2009-12-16 Virtual English examines English language communication on the World Wide Web focusing on Internet practices crafted by underserved communities in the US and overlooked participants in several Asian Diaspora communities. Jillana Enteen locates instances where subjects use electronic media to resist popular understandings of cyberspace, computer mediated communication, nation and community, presenting unexpected responses to the forces of globalization and predominate US value systems. The populations studied here contribute websites, conversations and artifacts that employ English strategically, broadening and splintering the language to express their concerns in the manner they perceive as effective. Users are thus afforded new opportunities to transmit information, conduct conversations, teach and make decisions, shaping in the process both language and technology. Moreover, web designers and writers conjure distinct versions of digitally enhanced futures. Computer mediated communication may attract audiences previously out of reach. The subjects of Virtual English challenge prevailing deployments and conceptions of emerging technologies. Their online practices illustrate that the Internet need not replicate current geopolitical beliefs and practices and that reconfigurations exist in tandem with dominant models.

*Virtual Communities* Felicia Wu Song, 2009 Does contemporary Internet technology strengthen civic engagement and democratic practice? The recent surge in online community participation has become a cultural phenomenon enmeshed in ongoing debates about the health of American civil society. But observations about online communities often concentrate on ascertaining the true nature of community and democracy, typically rehearsing familiar communitarian and liberal perspectives. This book seeks to understand the technology on its own terms, focusing on how the technological and organizational configurations of online communities frame our contemporary beliefs and assumptions about community and the individual. It analyzes key structural features of thirty award winning online community websites to show that while the

values of individual autonomy egalitarianism and freedom of speech dominate the discursive content of these communities the practical realities of online life are clearly marked by exclusivity and the demands of commercialization and corporate surveillance Promises of social empowerment are framed within consumer and therapeutic frameworks that undermine their democratic efficacy As a result online communities fail to revolutionize the civic landscape because they create cultures of membership that epitomize the commodification of community and public life altogether
