Norcross University of Scranton, 2002-08-22 This book is the result of the American Psychological Association's Division of Psychotherapy Div 29 Task Force aimed at applying psychological science to the identification and promulgation of effective psychotherapy Many efforts to improve therapy have focused on codifying evidence based treatments but in doing so have left the psychotherapeutic relationship behind Clinical experience and research findings underscore that the therapeutic relationship accounts for as much of the outcome as particular treatments This volume's 25 chapters identify the elements of effective therapy relationships and methods of customizing psychotherapy to each patient

Personality Assessment in Managed Health Care James N. Butcher, 1997-08-28 In response to the many challenges facing mental health professionals in the era of managed care this highly respected group of contributors from academia managed care and full time clinical practice outline the importance of personality assessment particularly through the use of MMPI 2 Butcher and his colleagues argue that psychological assessment plays an indispensable role in managed care both because it is an essential tool for evaluating the effectiveness of therapy and because of its significant contributions to the structuring and shortening of the process of therapy By providing working examples of psychological treatment in the context of managed care this book shows us that the most effective treatments use personality assessment as their foundation

Psychotherapy Abbreviation Terry S. Trepper, Helena E. Papay, 2014-03-18

Psychotherapy Abbreviation is a field-tested approach designed to train both experienced and student mental health professionals to do brief therapy that is effective and highly satisfactory to clients. This book is unique in that it is the only text that is compatible with almost all approaches to treatment, making it suitable as a primer of brief therapy usable by virtually all psychotherapists. Most other brief therapy books are affiliated with a specific theory of psychopathology, making each limited to those who share the author's theoretical orientation. Pekarik wrote this text based on his own brief therapy training manual because he could not find a text suitable for the wide range of psychotherapy approaches represented by the therapists whom he trains in his research, teaching, and consulting work. By offering a unique approach derived from the active ingredients common to all forms of brief therapy and the literature on client treatment preferences, Psychotherapy Abbreviation simplifies the abbreviation process and makes it accessible to all therapists. Pekarik's strategies have been field-tested; he has used them to train hundreds of therapists who have demonstrated success with clients, increased client satisfaction, improved treatment effectiveness, and lowered dropout rates. These same therapists also doubled the proportion of cases they treated with brief therapy. This how-to-do-it text is extremely practical. It assumes that the reader already has a theory and set of therapy techniques true of even most graduate students. The emphasis is then placed on the treatment abbreviation process itself. Because of this highly focused approach, the text will like the technique it describes be concise and brief. By avoiding association with any particular school of therapy, Pekarik's approach is usable by all schools of therapy. Therapists and future therapists now in graduate school will benefit from Psychotherapy Abbreviation as it explores these topics: rationale for the abbreviation of psychotherapy, practical and ethical issues to consider in client selection, a conceptual model for treatment abbreviation, rapid assessment and case conceptualization, establishing a brief therapy focus, goal establishment, and negotiation, adapting standard psychotherapy techniques to the brief format, practice issues in brief

therapy Psychotherapy Abbreviation is two part Part one is an orientation to this model of brief therapy in which Pekarik emphasizes a research based rationale for doing brief therapy presents a general theory of why brief treatments work and provides guidelines for the identification of appropriate clients for brief therapy The second part of the text is devoted to technical skills training It begins with an overview of the techniques common to most schools of brief therapy and describes a universal model of brief therapy Readers are then taken step by step through a description of the four most important abbreviation techniques presented in the typical order of use with clients To encourage readers to consistently apply the recommended techniques Pekarik includes one particular training case which he describes in detail and uses it in all of the technical skills chapters in special Case Application sections of these chapters Before describing the detailed applications Pekarik prompts readers to consider how they would apply the abbreviating technique presented in that chapter to the case With individual exercises he gives special attention to how readers can adapt their personal therapy styles and theoretical orientations to brief therapy As a result readers develop both a rationale and abbreviation strategy compatible with their values and practical needs as therapists The exercises are found in each chapter in special exercise
