A Handbook of Derivatives for Mass Spectrometry Vladimir Zaikin, John M. Halket, 2009. Chemical derivatisation of functional groups has proved popular since the beginning of organic mass spectrometry as a means to enhance the stability and volatility of the analytes as well as facilitating structure elucidation. This book provides comprehensive information on the wide range of derivatisation methods. Each chapter looks at a particular area of derivatisation and includes extensive references to the literature for further research where necessary. There are nearly 1800 references which as well as full bibliographic information include chapter paper titles where appropriate and Digital Object Identifiers (DOIs) to allow easy retrieval of the online version of the referenced publication. The emergence of atmospheric pressure ionisation and other soft ionisation techniques has not diminished the interest in such chemical techniques as witnessed by the many chemical tags used in quantitative proteomics.

Chapter 9. The last two chapters a substantial part of the book deal with derivatisation for use with soft ionisation of both small and large molecules. Chapters: Silylation, Acylation, Alkylation, Arylation, Cyclic derivatives, Monofunctional compounds, Polyfunctional compounds, On line derivatisation, degradation, Soft ionisation small molecules, Soft ionisation large molecules.

Handbook of Ion Chromatography, 3 Volume Set Joachim Weiss, 2016-09-26. This three volume handbook is the standard reference in the field unparalleled in its comprehensiveness. It covers every conceivable topic related to the expanding and increasingly important field of ion chromatography. The fourth edition is completely updated and revised to include the latest developments in the instrumentation now stretching to three volumes to reflect the current state of applications. Ion chromatography is one of the most widely used separation techniques of analytical chemistry with applications in fields such as medicinal chemistry, water chemistry and materials science. Consequently the number of users of this method is continuously growing underlining the need for an up to date reference. A true pioneer of this method Joachim Weiss studied chemistry at the Technical University of Berlin, Germany where he also received his PhD degree in Analytical Chemistry. In 2002 he did his habilitation in Analytical Chemistry at the Leopold Franzens University in Innsbruck, Austria where he is also teaching liquid chromatography. Since 1982 Dr Weiss has worked at Dionex now being part of Thermo Fisher Scientific where he currently holds the position of Technical Director for Dionex Products within the Chromatography and Mass Spectrometry Division (CMD) of Thermo Fisher.
