Hutson, Traci Ardren, 2020-06-17 The Maya World brings together over 60 authors representing the fields of archaeology art history epigraphy geography and ethnography who explore cutting edge research on every major facet of the ancient Maya and all sub regions within the Maya world The Maya world which covers Guatemala Belize and parts of Mexico Honduras and El Salvador contains over a hundred ancient sites that are open to tourism eight of which are UNESCO World Heritage Sites and many thousands more that have been dug or await investigation In addition to captivating the lay public the ancient Maya have attracted scores of major interdisciplinary research expeditions and hundreds of smaller projects going back to the 19th century making them one of the best known ancient cultures The Maya World explores their renowned writing system towering stone pyramids exquisitely painted murals and elaborate funerary tombs as well as their creative agricultural strategies complex social economic and political relationships widespread interactions with other societies and remarkable cultural resilience in the face of historical ruptures This is an invaluable reference volume for scholars of the ancient Maya including archaeologists historians and anthropologists Philosophy of the Ancient Maya Alexis McLeod, 2017-12-26 This book investigates some of the central topics of metaphysics in the philosophical thought of the Maya people of Mesoamerica particularly from the Preclassic through Postclassic periods This book covers the topics of time change identity and truth through comparative investigation integrating Maya texts and practices such as Classic Period stelae Postclassic Codices and Colonial era texts such as the Popol Vuh and the books of Chilam Balam and early Chinese philosophy **New Directions in the Study of Ancient Geography** Duane W. Roller, 2020-07-28 This volume brings together five essays that represent the latest directions in the study of geography in classical antiquity Arranged chronologically these contributions cover several centuries and cultures ranging from ancient Mesopotamia to the Roman Empire and deal with topics such as ancient cosmology literary interpretations of geography ancient navigation and geography in the Roman Imperial world Beginning in the ancient Near

East Paul T Keyser's essay considers how Greek scholars whose views on the cosmos are still relevant today were influenced by early Near Eastern beliefs about the universe. Moving to the Hellenistic period, Duane W Roller presents and provides commentary on a navigational guide for Ptolemaic seamen written by Ptolemy II's chief of naval staff Timosthenes of Rhodes. Georgia L Irby provides an analysis of a literary map, the Shield of Aeneas from Vergil's Aeneid, as well as a detailed study of Pomponius Mela and his Chorographia, the earliest surviving Greco-Roman geographical treatise and the only extant independent geographical work in Latin. An essay by Molly Ayn Jones Lewis completes the volume by describing how Tacitus's Germania of the early second century AD is a work heavily reliant on environmental determinism, an issue that is still relevant today. Together, these essays demonstrate the great diversity of both ancient geographical writing and modern scholarship on ancient geography. This volume will be greeted with enthusiasm by ancient historians and classical studies scholars, particularly those interested in the cultural and political facets of geography.

Second Witness: Analytical and Contextual Commentary on the Book of Mormon Brant A. Gardner, 2007-09-01. Stop looking for the Book of Mormon in Mesoamerica and start looking for Mesoamerica in the Book of Mormon. Second Witness, a new six-volume series from Greg Kofford Books, takes a detailed verse-by-verse look at the Book of Mormon. It marshals the best of modern scholarship and new insights into a consistent picture of the Book of Mormon as a historical document. Taking a faithful but scholarly approach to the text and reading it through the insights of linguistics, anthropology, and ethnohistory, the commentary approaches the text from a variety of perspectives: how it was created, how it relates to history and culture, and what religious insights it provides. The commentary accepts the best modern scholarship, which focuses on a particular region of Mesoamerica as the most plausible location for the Book of Mormon's setting. For the first time, that location, its peoples, cultures, and historical trends are used as the backdrop for reading the text. The historical background is not presented as proof but rather as an explanatory context. The commentary does not forget Mormon's purpose in writing. It discusses the doctrinal and theological aspects of the text and highlights the way in which Mormon created it to meet his goal of convincing the Jew and Gentile that Jesus is the Christ, the Eternal God.

Animal Oppression and Human Violence David A. Nibert, 2013-05-07. Jared Diamond and other leading scholars have argued that the domestication of animals for food, labor, and tools of war has advanced the development of human society. But by comparing practices of animal exploitation for food and resources in different societies over time, David A. Nibert reaches a strikingly different conclusion. He finds in the domestication of animals, which he renames domesecration, a perversion of human ethics: the development of large-scale acts of violence, disastrous patterns of destruction and growth, curbing epidemics of infectious disease. Nibert centers his study on nomadic pastoralism and the development of commercial ranching, a practice that has been largely controlled by elite groups and expanded with the rise of capitalism. Beginning with the pastoral societies of the Eurasian steppe and continuing through to the exportation of Western meat-centered eating habits throughout today's world, Nibert connects the domesecration of

animals to violence invasion extermination displacement enslavement repression pandemic chronic disease and hunger In his view conquest and subjugation were the results of the need to appropriate land and water to maintain large groups of animals and the gross amassing of military power has its roots in the economic benefits of the exploitation exchange and sale of animals Deadly zoonotic diseases Nibert shows have accompanied violent developments throughout history laying waste to whole cities societies and civilizations His most powerful insight situates the domeseccration of animals as a precondition for the oppression of human populations particularly indigenous peoples an injustice impossible to rectify while the material interests of the elite are inextricably linked to the exploitation of animals Nibert links domeseccration to some of the most critical issues facing the world today including the depletion of fresh water topsoil and oil reserves global warming and world hunger and he reviews the U S government s military response to the inevitable crises of an overheated hungry resource depleted world Most animal advocacy campaigns reinforce current oppressive practices Nibert argues Instead he suggests reforms that challenge the legitimacy of both domeseccration and capitalism

Cultural Foundations and Interventions in Latino/a Mental Health Hector Y. Adames, Nayeli Y. Chavez-Dueñas, 2016-07-07 Advancing work to effectively study understand and serve the fastest growing U S ethnic minority population this volume explicitly emphasizes the racial and ethnic diversity within this heterogeneous cultural group The focus is on the complex historical roots of contemporary Latino as their diversity in skin color and physiognomy racial identity ethnic identity gender differences immigration patterns and acculturation The work highlights how the complexities inherent in the diverse Latino a experience as specified throughout the topics covered in this volume become critical elements of culturally responsive and racially conscious mental health treatment approaches By addressing the complexities within group differences and racially heterogeneity characteristic of U S Latino as this volume makes a significant contribution to the literature related to mental health treatments and interventions

The Birth of Technology in Mesoamerica Ethan Gomez, For thousands of years people in Central America have found ways to improve their lives Tools and technologies help us do more work with less effort and make our lives easier But how did those tools and technologies come about The Maya people were among the first groups to make discoveries that led to new technology in Mesoamerica And now scientists uncover more about these ancient people by using modern technologies like computers and lasers In the past people could only see the universe in one way They could not travel very far or very fast But now that science and technology have changed the world we can see things that were hidden before We have new ways of getting from one place to another and new tools and materials that help us make textiles boats and paper and even understand the past Technology has improved in many ways like finding better ways to get from one place to another For example modern technology has made transportation faster easier and more efficient than it used to be Traveling long distances is much easier than before the invention of trains cars and airplanes Education depends mainly on how effective teaching methods were used back then compared to today s standards therefore without proper instruction

methods being utilized by teachers back then there wouldn't be any hope for students success later on down their own paths towards achieving higher learning goals Once again it was scientists using modern technology to help us learn more about the ancient Maya people In Mexico scientists have also studied the old Maya people using modern technology They have discovered that they were more advanced than we thought not just farmers and traders but builders as well The Maya had many things we take for granted today like electricity and airplanes but they also had inventions like books and clocks which we don't have today These discoveries show that even though these fantastic people lived thousands of years ago they could still invent new things back then just like when someone created something today like a bike Archaeologists have found artifacts showing how vital these things were to how these ancient people lived In archaeology the word artifact refers to any object left behind by people in the past Artifacts can be made of many materials including wood stone and metal Archaeologists study these things to learn more about the people who made them and how they lived A few discoveries have revealed things about the ancient people we never knew For example researchers now know that Mayan culture was more advanced than previously thought The old Maya had a complex social structure religious system and calendar that was far more developed than what was once understood by modern day archaeologists They also had a problematic transportation and textile system all previously misunderstood by archaeologists who studied the civilization's remains The world has changed a lot since the ancient Maya lived But there is still so much we don't know about how they lived and what they thought That's why scientists study these artifacts today They want to learn more about them and their culture so we can learn from them too

Mysterious Mesoamerican Cultures Norah Romney, Mayan ideas spread via broadcast and influenced divergent cultures and languages It is possible to trace the influence of the Mayan civilization far beyond its confines 400 to 600 A.D. One or two of these lesser civilizations may have existed contemporaneously with the great Mayan civilization but most were at their best long after the great culture had declined This chapter will emphasize the ties between these lesser civilizations and the Mayas and analyze their characteristics Toward Mexico and the Isthmus of Panama we will proceed northwest Along the Gulf of Mexico and across the Isthmus of Tehuantepec the Mayas developed their arts of life in narrowing bands In terms of importance Comalcalco appears to be the most westerly Mayan city A large ruin is also located near San Andres Tuxtla and the Tuxtla Statuette is among the earliest dated Maya objects Archaic and Maya figurines coexist in this coastal belt where arid and humid conditions coexist Mayan culture may have originated here Little has been studied on the archaeology of this part of Mexico Although the earliest known rubber specimens were found at Chichen Itza's Sacred Cenote the material's ceremonial and practical uses are primarily related to the Olmeca and Totonac cultures In southern Vera Cruz and western Tabasco where the Aztecs later called Nonoalco the Olmeca may be found Ancient Mexican traditions frequently mention this region as a symbol of Maya civilization Incense water proofing drumstick tips etc were all made from rubber There was also a sacred game played with a large rubber ball with goals set high in parallel walls of a specially

constructed court which could be compared to basketball Olmeca may have been a Mayan tribe but they may also have spoken Mexican The Olmeca ruled parts of the Mexican highlands before the Toltecs according to Ixtlilxochitl's history When the Toltec empire collapsed they may have fled south for we find a group of this name in Nicaragua at the time of the Conquest

Lost Pyramids of Mesoamerica Rhandel Lopez, While most visitors to Mexico visit one of the great Mayan cities it is worth visiting some of the lesser known ruins like Mayapan and Balamku Mayapan is an ancient Maya city in the northern Yucatan Peninsula of Mexico The site has a long history with its first occupation dating back to at least 900 BC and its last occupation dating to around 1450 AD The word Mayapan means Hill of the Jaguar The name refers to the shape of one of three hills that formed it this hill was called Pa Chan Place of the Jaguar It was here that a jaguar deity named Chac reigned When Chac left his post as a god of rain the rain ceased falling on earth for four years until he returned during this time people were forced to irrigate their crops by hand or die from thirst if they failed at growing corn without rainwater overflow from nearby lakes and rivers The city of Teotihuacan is one of the most important archaeological sites in Mexico It was the center of a civilization at its peak around the 1st century B C and was abandoned around 650 AD leaving behind an impressive collection of pyramids and other structures As you explore this site you will discover how these ancient people lived and what they left behind for us to admire today Tulum is a small town on the coast of the Yucatan Peninsula south of Cancun It may not be your first choice if you look for beaches and relaxation But if you want to see some fantastic architecture and walk in the footsteps of the Maya you should definitely make plans to visit Tulum The Mayans built the city between 1200 and 1450 CE Common Era as a seaport for trading with other cultures in Mesoamerica Its popularity rose with increased trade throughout Mexico during this period however it fell into disrepair after Spanish colonization began around 1519 CE when conquistador Hernan Cortes took control over what had been largely autonomous states up until then The buildings are made from limestone quarried from nearby cliffs and from sandstone blocks that were likely carried from much further away by barge or canoe along rivers and lakes since there were no roads The city of Uxmal is a magnificent example of the Puuc style with its buildings built of fine stuccoed brickwork As you explore the site you can see how closely related it is to Chichen Itz and other major Maya sites in the region The Pyramid of the Magician also known as El Castillo is a fantastic pyramid building with 4 sides each having 91 steps and each step 7 feet tall for a total height of 65 feet House of Turtles or Casa del Adivino this building has beautiful decorations both inside and out depicting turtles in different positions some say that these turtles represent wisdom or knowledge Tikal is the largest Mayan ruin in Guatemala and is a UNESCO World Heritage Site The city was the capital of the Maya kingdom of the same name and one of their most potent cities dating back to at least 200 B C if not earlier It was abandoned by the Maya around 900 A D but its temples still tower over the jungle floor today some are even taller than they were when they were first built Palenque Crown of the North is one of the most critical sites in the Maya world Palenque was once a thriving city and capital of one of Mexico's most powerful states It

boasts some of the most impressive ruins on this list It was first discovered by a German explorer in 1719 while looking for a site to build his own city The main pyramid at Palenque rises over 70 meters 230 ft into the air and its steps are steep enough to pause even hardened explorers when climbing them There are also two smaller temples nearby and many smaller statues depicting jaguars these symbolize power for humans and gods alike

Civilization of the Americas

Ethan Gomez,
Introduction There is much more to Mesoamerica than the Aztec Mayan and Toltec civilizations In fact several different ancient Mesoamerican civilizations had their own gods and religious beliefs These civilizations included the Olmec civilization Zapotec civilization Teotihuacan civilization Maya civilization Toltec civilization and Aztec civilization The Olmec civilization is the first known Mesoamerican civilization The name Olmec comes from the Nahuatl word for rubber people and they were pre Columbian people living in what is now southern Mexico in the modern day states of Veracruz and Tabasco The Olmecs are essential to history because they were the first Mesoamerican people to develop a writing system use hieroglyphics and construct significant stone monuments such as pyramids The calendar developed by the Olmecs was one of their most remarkable achievements They based their calendar on 365 days divided into 18 months of 20 days each plus 5 extra days at the end of each year so it was different from our current calendar They also used zero as part of their number system which is why we still use it today The Zapotec civilization was in the Oaxaca Valley Mexico This Mesoamerican civilization was known for using the Mesoamerican writing system and art The Zapotecs were one of the first civilizations in Mexico to develop a writing system They used it to write on stone or pottery but we don t know what their language sounded like because no one left any written records about them or their lives so all that remains is physical evidence like pottery with pictures and hieroglyphs carved into it This type of evidence is called epigraphic because it s an inscription on something else like a statue The city of Teotihuacan was a center of trade and politics It existed from about 300 BC until 600 AD when it was abandoned The site has been a subject of archaeology since the 19th century it is now an essential source of information on Mesoamerican civilization among the most significant early cities in pre Columbian America The city is located just north of present day Mexico City in the state state province county of Mexico 65 km 40 miles northeast of the Federal District Mexico City The name Teotihuacan means place where men become gods possibly an allusion to their belief that their rulers became divine after death The Teotihuacanos were not only builders but also warriors they fought with neighboring groups over territory and resources Their most important military victory came in 378 AD against Xolalpan by capturing its ruler Cuauht moc and killing many Xolalpan warriors during battle After this victory they took over Xolalpan s lands including Azcapotzalco Colhuacan and Tlaxcala areas where they established their control over those regions along with other surrounding places like Cholula or Chichen Itza until finally falling into decline due to internal conflicts caused by constant wars between various ethnic groups within the Aztec Empire itself during its final years before being conquered by Spanish Conquistadors led by Hern n Cort s after they arrived at Cempoala Island between Veracruz Tamiahua province in July 1519

The Maya of the Cochuah Region Justine M. Shaw, 2015-12 This book the first major collection of data from the Cochuah region investigations presents and analyzes findings on more than eighty sites and puts them in the context of the findings of other investigations from outside the area

Drawing Attention to Metaphor Camilla Di Biase-Dyson, Markus Egg, 2020-04-15 The communicative act of drawing attention to metaphor is a relatively recent topic in metaphor studies and one that has remained contentious from a cognitive perspective This book brings philologists of ancient languages together with metaphor experts from several modalities to interrogate whether ancient and modern texts and languages draw attention to figurative tropes in similar ways In this way the diachronic multimodal and pluridisciplinary contributions to this volume critically review the theoretical frameworks underpinning metaphor marking and metaphor analysis from a completely new empirical basis

An Introduction to Mesoamerican Philosophy Alexis McLeod, 2023-08-03 The philosophy of Mesoamerica the indigenous groups of precolonial North Central America is rich and varied but relatively little known In this ground breaking book Alexis McLeod introduces the philosophical traditions of the Maya Nahua Aztecs Mixtecs Zapotecs and others focussing in particular on their treatment of language truth time creation personhood knowledge and morality His wide ranging discussion includes important texts of world literature such as the K iche Maya Popol Vuh and the Aztec Florentine Codex as well as precolonial glyphic texts and imagery This comprehensive and accessible book will give students specialists and other interested readers an understanding of Mesoamerican philosophy and a sense of the current scholarship in the field

The Devil's Milk John Andrew Tully, 2011 Capital as Marx once wrote comes into the world dripping from head to foot from every pore with blood and dirt He might well have been describing the long grim history of rubber From the early stages of primitive accumulation to the heights of the industrial revolution and beyond rubber is one of a handful of commodities that has played a crucial role in shaping the modern world and yet as John Tully shows in this remarkable book laboring people around the globe have every reason to regard it as the devil s milk All the advancements made possible by rubber industrial machinery telegraph technology medical equipment countless consumer goods have occurred against a backdrop of seemingly endless exploitation conquest slavery and war But Tully is quick to remind us that the vast terrain of rubber production has always been a site of struggle and that the oppressed who toil closest to the devil s milk in all its forms have never accepted their immiseration without a fight This book the product of exhaustive scholarship carried out in many countries and several continents is destined to become a classic Tully tells the story of humanity s long encounter with rubber in a kaleidoscopic narrative that regards little as outside its rangewithout losing sight of the commodity in question With the skill of a master historian and the elegance of a novelist he presents what

amounts to a history of the modern world told through the multiple lives of rubber *Time's Urgency* Carlos Montemayor, Robert Daniel, 2019-07-15 The Study of Time XVI Time's Urgency celebrates the 50th anniversary of the International Society for the Study of Time It includes a keynote speech by renowned physicist Julian Barbour a dialogue between British author David Mitchell Katie Paterson and ISST's previous president Paul Harris The volume is divided into dialogues and papers that directly address the issue of urgency and time scales from various disciplines This book offers a unique perspective on the contemporary status of the interdisciplinary study of time It will open new paths of inquiry for different approaches to the important issues of narrative structure and urgency These are themes that are becoming increasingly relevant during our times Contributors are Julian Barbour Dennis Costa Kerstin Cuhls Ileana da Silva Margaret K Devinney Sonia Front Peter A Hancock Paul Harris Rose Harris Birtill David Mitchell Carlos Montemayor Jo Alyson Parker Katie Paterson Walter Schweidler Raji C Steineck Daniela Tan Frederick Turner Thomas P Weissert Marc Wolterbeek and Barry Wood **The Games People Play** Robert Ellis, 2014-04-21 In *The Games People Play* Robert Ellis constructs a theology around the global cultural phenomenon of modern sport paying particular attention to its British and American manifestations Using historical narrative and social analysis to enter the debate on sport as religion Ellis shows that modern sport may be said to have taken on some of the functions previously vested in organized religion Through biblical and theological reflection he presents a practical theology of sport's appeal and value with special attention to the theological concept of transcendence Throughout he draws on original empirical work with sports participants and spectators *The Games People Play* addresses issues often considered problematic in theological discussions of sport such as gender race consumerism and the role of the modern media as well as problems associated with excessive competition and performance enhancing substances As Ellis explains Sporting journalists often use religious language in covering sports events Salvation features in many a headline and talk of moments of redemption is not uncommon Perhaps somewhere beyond the clichéd hyperbole there is some theological truth in all this after all
