Handbook of Milk of Non-Bovine Mammals Young W. Park, George F. W. Haenlein, 2008-02-28 No one can deny the fact that the cow is the primary dairy animalspecies to provide humans with nutritious dairy foods through itsabundance of lacteal secretion The goat or other minor dairyspecies will never be able to compete with the cow in terms of thevolume of milk production Yet the contribution of milks fromother secondary domesticated dairy species to the survival andwell being of mankind around the world is immense and invaluable Testament to the importance of non bovine milk is that more people drink the milk of goats than that of any other single species inthe world In developing and under developed counties the secondary dairyspecies play a crucial role in supplying the food and nutritionalneeds of the people in those regions Due to the unavailability ofcow milk and the low consumption of meat the milks of minorspecies such as goat buffalo sheep and camel are critical dailyfood sources of protein phosphate and calcium Furthermore because of important and inherent hypoallergenic properties milksof certain species such as goat milk have been recommended assubstitutes in diets for those

with cow milk allergies Editors Park and Haenlein have assembled dairy and nutrition experts from around the world to contribute to the Handbook of Milk of Non Bovine Mammals Secondary dairy species addressed are the goat sheep buffalo mare camel yak deer reindeer sow llama alpaca moose musk ox caribou ass elk pinniped polar bear and human The book comprehensively covers the most important aspects of milk production including trends and methods of raw milk production in different regions compositional nutritional therapeutic physico chemical and microbiological characteristics of the milks processing technology and types distribution and consumption of the manufactured products from minor species milks Of special note is coverage comparing specific human health attributes of milk from the various species including nutritional allergenic immunological and cultural factors Because secondary dairy species have such a significant impact on human well being and survival in many parts of the world the Handbook of Milk of Non Bovine Mammals is an essential reference book of leading edge information for dairy scientists nutritionists food chemists allergy specialists health professionals and allied professionals
