Handbook Of New Zealand Mammals:

The Handbook of New Zealand Mammals Carolyn King, David Forsyth, 2021-01-20 The Handbook of New Zealand Mammals is the only definitive reference on all the land breeding mammals recorded in the New Zealand region including the New Zealand sector of Antarctica It lists 65 species including native and exotic wild and feral living and extinct residents vagrants and failed introductions It describes their history biology and ecology and brings together comprehensive and detailed information gathered from widely scattered or previously unpublished sources The description of each species is arranged under standardised headings for easy reference Because the only native land breeding mammals in New Zealand are bats and seals the great majority of the modern mammal fauna comprises introduced species whose arrival has had profound effects both for themselves and for the native fauna and flora The book details changes in numbers and distribution for the native species and for the arrivals it summarises changes in habitat diet numbers and size in comparison with their ancestral stocks and some of the problems they present to resource managers For this third edition the text and references have been completely updated and reorganised into Family chapters The colour section includes 14 pages of artwork showing all the species described and their main variations plus two pages of maps

[The Handbook of New Zealand Mammals](#) Carolyn M. King, Mammal Society. New Zealand Branch, 1990 This book is the first comprehensive account of all 46 species of land breeding mammals known in New Zealand native and exotic wild and feral living and extinct It describes their history biology and ecology and brings together much information which has been gathered from widely scattered sources or was hitherto unpublished The description of each species is arranged under conventional headings and is standardized for easy reference Because the only native land breeding mammals in New Zealand are bats and seals the great majority of the modern mammal fauna comprises introduced species whose arrival has had profound effects both for themselves and for the native fauna and flora Each species account emphasizes the ecological effects of the introductions for the natives changes in numbers and distribution and for the arrivals changes in habitat diet numbers and size in comparison with their ancestral stocks The editor's introduction summarizes the general history and characteristics of the mammal fauna of New Zealand and describes some of the problems that mammals present to resource managers in contemporary times The twenty nine contributors are all leading authorities in mammal science in New Zealand and all have studied in the field the species they describe This book will become the definitive work on the mammals of New Zealand and a standard source of reference for mammal biologists both in New Zealand and elsewhere in the world It will also be of considerable interest to ecologists interested in evolutionary adaptation in mammals

[The Handbook of New Zealand Mammals](#) Carolyn M. King, 1990 This landmark book is the first comprehensive account of all 46 land breeding mammal species known in New Zealand native and exotic wild and feral living and extinct With contributions from 29 leading authorities in the field the book describes New Zealand mammal history biology and ecology and brings together much information previously unpublished or scattered

throughout diverse literatures Standardized for easy reference each species is arranged under conventional headings The book emphasizes throughout that because the only native land breeding mammals in New Zealand are bats and seals the great majority of modern mammal fauna comprises introduced species whose arrivals have had profound effects both for introduced and native species changes in numbers distributions arrivals habitat and diet Distribution maps skull diagrams dentition diagrams and photographs of each species are included as well The editor s introduction masterfully summarizes the general history and characteristics of New Zealand fauna and describes some of the problems that mammals present to research managers The Handbook of New Zealand Mammals will surely be the subject s definitive reference for years to come and will appeal to researchers students and interested layperson s alike **The Handbook of New Zealand**

Mammals ,2021 Biological Invasions in New Zealand Robert B. Allen,William G. Lee,2006-07-04 Man s recent colonization of New Zealand has dramatically altered the resident biota and resulted in the introduction of numerous alien organisms to these once remote islands In reverse there is increasing evidence of a lesser known export of species to other regions of the world This volume presents an in depth review of the level and rate of such invasions and investigates what controls the success of invaders and the consequences for ecosystems both on land and offshore It provides invasion biologists everywhere with tests of current theories about those factors leading to the success of invaders as well as evaluating principles for understanding the nature of their impacts that form a solid basis for the effective management of biological invasions worldwide Mammals of the South-west Pacific Tyrone Lavery,Tim Flannery,2023-06-01 Islands are special because they promote unique forms of life and large proportions of the species they hold are found nowhere else on Earth The mammals of the South west Pacific are no exception with many distributed only across single islands or archipelagos Mammals of the South west Pacific details the natural history for more than 180 species of marsupials bats and rodents from 24 Pacific nations and territories Species profiles are accompanied by distribution maps illustrations and photographs many being the first images ever captured for the species By combining available knowledge with unpublished data collected over years of field work Mammals of the South west Pacific forms a definitive guide to the mammals from this region Collins Guide to the Mammals of New Zealand Mike Daniel,A.
