brain Authoritative content world leading contributors provide readers with a reputable dynamic and authoritative account of the topics under discussion Comprehensive style content in depth complex coverage of topics offers students at upper undergraduate level and above full insight into topics under discussion *Geriatric Otolaryngology* Karen H. Calhoun, David E. Eibling, 2006-01-13 Opening with a clear overview of the biology and demographics of aging this text authoritatively summarizes the most recent knowledge on disorders of the ears nose paranasal sinuses oral cavity larynx voice throat and neck in the geriatric population With chapters by prominent leaders in the discipline this reference serves as an invaluable source of guidance on perioperative assessment operative procedures and outcomes and new strategies for reconstructive and cosmetic surgery **The Neuropsychology of Smell and Taste** G. Neil Martin, 2013-06-19 Smell and taste are our most misunderstood senses Given a choice between losing our sense of smell and taste or our senses of sight and hearing most people nominate the former rather than the latter Yet our sense of smell and taste has the power to stir up memories alter our mood and even influence our behaviour In *The Neuropsychology of Smell and Taste* Neil Martin provides a comprehensive critical analysis of the role of the brain in gustation and olfaction In his accessible and characteristic style he shows why our sense of smell and taste do not simply perform basic and intermittent functions but lie at the very centre of our perception of the world around us Through an exploration of the physiology anatomy and neuropsychology of the senses the neurophysiological causes of smell and taste disorders and their function in physical and mental illness Neil Martin provides an accessible and up to date overview of the processes of gustation and olfaction *The Neuropsychology of Smell and Taste* provides a state of the art overview of current research in olfactory and gustatory perception With sections describing the effect of odour and taste on our behaviour and evaluating the contribution current neuroimaging technology has made to our understanding of the senses the book will be of interest to researchers and students of neuropsychology and neuroscience and anybody with an interest in olfaction and gustation **Flavor** Patrick Etiévant, Elisabeth Guichard, Christian Salles, Andree Voilley, 2016-05-27 *Flavor From Food to Behaviors Wellbeing and Health* is the first single volume resource focused on the different mechanisms of flavor perception from food ingestion to sensory image integration and the physiological effects that may explain food behaviors The information contained is highly multidisciplinary starting with chemistry and biochemistry and then continuing with psychology neurobiology and sociology The book gives coherence between results obtained in these fields to better explain how flavor compounds may modulate food intake and behavior When available physiological mechanisms and mathematical models are explained Since almost half a billion people suffer from obesity and food related chronic diseases in the world and since recent research has investigated the possible roles of pleasure linked to the palatability of food and eating pleasure on food intake food habits and energy regulation this book is a timely resource on the topic This book links these results in a logical story starting in the food and the food bolus and explaining how flavor compounds can reach different receptors contribute to the emergence of a sensory image and

modulate other systems recognized as controlling food intake and food behavior The influence of age physiological disorders or social environments are included in this approach since these parameters are known to influence the impact of food flavor on human behavior Uniquely brings together multidisciplinary fields to explain in a narrative structure how flavor compounds may modulate food intake and behavior Includes discussions of chemistry and biochemistry psychology neurobiology and sociology Presents an extremely current view that offers a wide perspective on flavor an area of rapidly expanding knowledge Edited by renowned experts in the field of flavor perception

Taste, Nutrition and Health Beverly J. Tepper, Iole Tomassini Barbarossa, 2020-06-25 The sensation of flavor reflects the complex integration of aroma taste texture and chemesthetic oral and nasal irritation cues from a food or food component Flavor is a major determinant of food palatability the extent to which a food is accepted or rejected and can profoundly influence diet selection nutrition and health Despite recent progress gaps in knowledge still remain regarding how taste and flavor cues are detected at the periphery conveyed by the brainstem to higher cortical levels and then interpreted as a conscious sensation Taste signals are also projected to central feeding centers where they can regulate hunger and fullness Individual differences in sensory perceptions are also well known and can arise from genetic variation environmental causes or a variety of metabolic diseases such as obesity metabolic syndrome and cancer Genetic taste smell

variation could predispose individuals to these same diseases Recent findings have opened new avenues of inquiry suggesting that fatty acids and carbohydrates may provide nutrient specific signals informing the gut and brain of the nature of the ingested nutrients This Special Issue Taste Nutrition and Health presents original research communications and comprehensive reviews on topics of broad interest to researchers and educators in sensory science nutrition physiology public health and health care

The Ischemic Penumbra Geoffrey A. Donnan, Jean-Claude Baron, Stephen M. Davis, Frank R. Sharp, 2007-04-13 The Ischemic Penumbra presents the current status of concepts and research on this topic and identifies the latest methods for clinicians to quickly and efficiently recognize viable cerebral tissue for enhanced stroke management Focusing on state of the science technologies and current trends the book examines imaging strategies utilizing PET SP

Toxicology of the Nose and Upper Airways John B. Morris, Dennis J. Shusterman, 2016-04-19 The application of molecular biologic methods recognition of neurogenic inflammatory processes and utilization of genetic knockout animals are just some of the advances in toxicology of the upper airways in recent years Toxicology of the Nose and Upper Airways presents a culmination of knowledge gained as a result of both human and experimental

Olfaction and the Brain Warrick J. Brewer, David Castle, Christos Pantelis, 2006-10-19 Olfaction and its relation to mental health is an area of growing interest evidenced by the 2004 Nobel Prize in Physiology or Medicine being awarded for discoveries relating to odorant receptors and the organization of the olfactory system Olfaction is of particular interest to specialists seeking a fuller understanding of schizophrenia Clear deficits in the sense of smell could predict schizophrenia in apparently unaffected individuals In this book first published in 2006 Warrick Brewer and his team of experts set out our understanding of olfaction and mental health relating it to broader principles of neural development and processing as a foundation for understanding psychopathology The neuropathological neuropsychological and neuropsychiatric aspects of olfactory function and dysfunction are all covered drawing on neuroimaging techniques where appropriate and indications for future research and applications are discussed

Cancer Symptom Science Charles S. Cleeland, Michael J. Fisch, Adrian J. Dunn, 2010-11-18 Cancer Symptom Science is the first interdisciplinary compilation of research on the mechanisms underlying the expression of cancer related symptoms It presents innovations in clinical animal and in vitro research research methods in brain imaging and statistical descriptive approaches to understanding the mechanistic basis of symptom expression This volume also provides perspectives from patients government and industry By collecting and synthesizing the developing threads of new approaches to understanding cancer related symptoms the book promotes a pioneering framework for merging behavioral and biological disciplines to clarify mechanisms of symptom evolution incorporating new technologies testing novel agents for symptom control and improving patient functioning and quality of life both during and after cancer treatment With an expert editorial team led by Charles S Cleeland an internationally recognized leader in cancer pain assessment and treatment this is essential reading for surgical clinical and medical oncologists academic researchers and pharmaceutical companies developing new agents to

control symptom expression **Sleep Disorders and Neurological Disease** Antonio Culebras, 1999-09-22 This book examines the neuroanatomy neurophysiology and neuroclinical aspects of sleep and asserts that all sleep problems originate in brain dysfunction whether structural as in brain tumors behavioral as in insomnia degenerative as in fatal familial insomnia neurochemical as in narcolepsy or neuromuscular as in sleep apnea Examines the role of melatonin in sleep initiation and maintenance Written by a varied group of international experts who focus on the fabric of neurological mechanisms and manifestations that underlie sleep Sleep Disorders and Neurological Disease investigates the refreshing properties of sleep and its influence on alertness attention concentration memory and mood describes sleep dysfunction resulting from common neurological disorders including Parkinson s disease and multiple sclerosis explains intrinsic sleep disorders such as narcolepsy and idiopathic CNS hypersomnia outlines the historical development of the neurochemistry electrophysiology neurophysiology and chronobiology of sleep disorders investigates sleep pathology and sleep disorder medications discusses parasomnias including sleep wake transition and arousal disorders covers state dissociations such as Charles Bonnet syndrome and phantom limb phenomena suggests treatments for improving the sleep of patients with extrapyramidal disorders and more
