Handbook Of Social Work In Health And Aging:

Handbook of Social Work in Health and Aging Barbara Berkman, 2006-02-09 The Handbook of Social Work in Health and Aging is the first reference to combine the fields of health care aging and social work in a single authoritative volume These areas are too often treated as discrete entities while the reality is that all social workers deal with issues in health and aging on a daily basis regardless of practice specialization As the baby boomers age the impact on practice in health and aging will be dramatic and social workers need more specialized knowledge about aging health care and the resources available to best serve older adults and their families The volume s 102 original chapters and 13 overviews written by the most experienced and prominent gerontological health care scholars in the United States and across the world provide social work practitioners and educators with up to date knowledge of evidence based practice guidelines for effectively assessing and treating older adults and their families new models for intervention in both community based practice and institutional care and knowledge of significant policy and research issues in health and aging A truly monumental resource this handbook represents the best research on health and aging available to social workers today The Oxford Handbook of Social Work in Health and Aging Daniel B. Kaplan, Barbara Berkman, 2016 This Second Edition of the Handbook addresses the evolving interdisciplinary health care context and the broader social work practice environment as well as advances in the knowledge base which guides social work service delivery in health and aging This includes recent enhancements in the theories of gerontology innovations in clinical interventions and major developments in the social policies that structure and finance health care and senior services In addition the policy reforms of the 2010 Patient Protection and Affordable Care Act set in motion a host of changes in the United States healthcare system with potentially profound implications for the programs and services which provide care to older adults and their families In this volume the most experienced and prominent gerontological health care scholars address a variety of populations that social workers serve and the arenas in which they practice followed by detailed recommendations of best practices for an array of physical and mental health conditions The volume s unprecedented attention to diversity health care trends and implications for practice research policy make the publication a major event in the field of gerontological social work This is a Must Read for all social work social work educators practitioners and students interested in older adults and their families The Oxford Handbook of Social Work in Health and Aging Daniel Kaplan, Barbara Berkman, 2015-11-09 The Second Edition of the Handbook of Social Work in Health and Aging describes innovations in clinical practice for populations that social workers serve overviews of the arenas in which they practice and major developments in the social policies that structure and finance health care and senior services

<u>Social Work with the Aged and Their Families</u> Roberta R. Greene,2017-07-12 In recent years theoreticians researchers and practitioners have become increasingly interested in older adults and the aging process This volume draws on related disciplines to better understand the biological psychological and social aspects of aging Social Work with the Aged and Their

Families covers areas of central interest to those coping with the needs of an aging population Among the topics addressed are assessment of the aging taking into account biological age psychological age and socio cultural and spiritual age Greene also considers the importance of the family system family roles and development functional age individual and family intervention and group and community interventions The scientific and systematic study of aging is known as gerontology Geriatric social workers are those who have applied established social work theories in an attempt to find suitable techniques for working with their elderly clients The need for specialized services has given birth to various services and programs For example meals on wheels and home health care services have been designed to meet specific physical needs of older adults However mental health services have lagged far behind as practitioners struggled to adapt such specialties as family therapy to families of later years A major contribution of this book now in its third edition is the functional age model of intergenerational treatment FAM which is an outgrowth of that demand The functional age model of intergenerational treatment is an integrative theoretical framework for social workers interested in clinical social work practice with older adults and their families Since its initial construction in 1986 the model has been augmented by more recent concepts related to successful aging spirituality and resiliency These additions together with the original assessment and intervention strategies present the major converging conceptual trends that constitute a model for twenty first century social work The SAGE Handbook of Social Work Mel Gray, James Midgley, Stephen A practice in the field of aging Webb, 2012-06-22 This Handbook is the world's first generic major reference work to provide an authoritative guide to the theory method and values of social work in one volume Drawn from an international field of excellence the contributors each offer a critical analysis of their individual area of expertise The result is this invaluable resource collection that not only reflects upon the condition of social work today but also looks to future developments Split into seven parts the Handbook investigates Policy dimensions Practice Perspectives Values and ethics The context of social work Research Future challenges It is essential reading for all students practitioners researchers and academics engaged in social work
