Behavioral Neurobiology of Anxiety and Its Treatment
Murray B. Stein, Thomas Steckler, 2010-07-30
The book is part of a series on Current Topics in Behavioral Neurosciences which has as its focus anxiety and its treatment. We have brought together a distinguished cadre of authors with the aim of covering a broad array of topics related to anxiety disorders ranging from clinical diagnosis, epidemiology, preclinical neuroscience, and animal models to established and innovative therapeutic approaches. The book aims at bridging these disciplines to provide an update of literature relevant to understanding anxiety, its consequences, and its management. Following is a brief overview of the chapters and their content meant to serve as a guide to navigating the book. The first section covers clinical aspects of anxiety disorders. Joe Bienvenu and colleagues provide an incisive overview of diagnostic considerations in the anxiety disorders in which they emphasize the strengths and shortcomings of our current nosologic systems. This is followed by a review and update of the epidemiology of anxiety disorders by Ron Kessler and colleagues which provides an authoritative survey of anxiety disorder incidence, prevalence, and risk factors. This is complemented by a comprehensive review of the literature on disorders that co-occur with anxiety disorders by Kathleen Merikangas and Sonja Alsemgeest Swanson. Their review highlights the tremendous comorbidity that occurs not only within the anxiety disorders but also with other mental and physical health conditions.

Pathophysiology - E-Book
Jacquelyn L. Banasik, Lee-Ellen C. Copstead-Kirkhorn, 2012-12-21
A clear, comprehensive introduction to disease. Pathophysiology 5th Edition explores the etiology, pathogenesis, clinical manifestations, and treatment of disorders. Units are organized by body system and each begins with an illustrated review of anatomy and normal physiology. A discussion then follows on the disease processes and abnormalities that may occur with a focus on the pathophysiologic concepts involved. Written by leading educators Lee Ellen Copstead and Jacquelyn Banasik, Pathophysiology simplifies a rigorous subject with practical learning resources and includes coverage of the latest scientific findings and relevant research. 900 full-color illustrations clarify complex pathophysiological concepts. Easy-to-read style includes many tables, boxes, and figures to highlight and simplify content. Key Questions at the beginning of each chapter highlight key objectives and help you develop and use critical thinking skills. Key Points boxes focus on the most important information. Geriatric Considerations boxes analyze the age-related changes associated with a specific body system. A chapter summary gives you a quick wrap-up of the key content in each chapter. NEW Pediatric Considerations boxes with accompanying flow charts describe conditions and changes specific to young children. NEW Updated content includes the latest information on new treatment advances, the relationship between stress and inflammation to cardiovascular disease, and much more throughout the text.
