

FOR YOUTH DEVELOPMENT  
FOR HEALTHY LIVING  
FOR SOCIAL RESPONSIBILITY

Dear Parents/Guardians,

Thank you for enrolling your child/children in the Bangor Region YMCA Swim Lessons. Your child is in for a fun, safe and positive experience!

The Bangor Region YMCA's goal is to increase Safety Around the Water. Because Maine has abundant locations for recreation around water, it is extremely important that children and adults know how to swim and enjoy water safely. Our YMCA is dedicated to this goal by providing a program for all ages and ability levels.

Our swim lessons program meets national YMCA standards. We focus on integrating water safety benchmark skills such as "Swim, Float, Swim" and "Jump, Push, Turn, and Grab" at a beginner level to help children learn what to do in an emergency. At an advanced level, we will prepare them for competitive swimming and lifeguarding. At the Y, we celebrate your child's achievements, give them a sense of belonging, and build positive relationships. To foster this, our program will teach the whole child by integrating character and safety lessons into each session. Lastly, we want to increase our communication with you. Therefore, you will receive mid-session and end-of-session progress reports from your child's instructor.

If there are any limitations or special needs your child may have that could impact their health, safety or ability to understand and follow directions or perform various skills, please let us know before the session begins so we can make the needed accommodations. All of our Certified Swim Instructors are equipped with the teaching techniques to best reach students with diverse abilities.

We know that many parents/guardians (old and new) have many questions. For that reason, we are providing this handbook full of information that you will need to know for a successful lesson experience. Inside is information regarding locker room usage, policies, and other guidelines. Please take the time to read and review this handbook.

Feel free to contact us with any additional questions or concerns that you may have by emailing Shawn Rich at [srich@bangorymca.org](mailto:srich@bangorymca.org) or Tammy Hodgdon at [thodgdon@bangorymca.org](mailto:thodgdon@bangorymca.org)

Thank you for choosing our Y to teach your child/children this important life skill.

Sincerely,

Bangor Region YMCA Aquatics

**Handbook of Environmental Health** Stephen Battersby,W.H. Bassett,2004-05-27 This classic definitive reference work for all those involved in environmental health is now available in its 19th edition Significant changes include those made to chapters on food safety and hygiene environmental protection the organisation and management of environmental health in the UK port health and waste management New chapters have been added on health development an introduction to health and housing contaminated land and environmental health in emergency planning as well as a new glossary of abbreviations and acronyms New material on training and standards IT practical risk assessment and investigatory powers is also included Each chapter reflects the wider background against which the subjects must be studied and the new concepts and approaches that have emerged over the past few years      **Intercollegiate Swimming Guide** ,1916      **Handbook**

Amateur Swimming Association (Great Britain),1968      Handbook of Summer Athletic Sports Various,Fred

Whittaker,2014-11-17 Example in this ebook PEDESTRIANISM A wonderful increase of popularity has lately attended the art of walking The steady improvement made in speed and endurance by professional and amateur walkers and the introduction of international contests have brought this about within a few years When the firm of Beadle and Adams published their first Dime book of Pedestrianism the only American walker of reputation was Edward Payson Weston The record of professionals and amateurs had then developed nothing greater than the performances of Captain Barclay of England who first did a thousand miles in a thousand hours Weston s famous walk from Portland to Chicago caused the only ripple of excitement in the sporting world on the subject of walking from the time of Barclay up to 1870 Since that period things have changed greatly Weston s achievements have inspired others and those others have not only equaled but excelled Weston on many occasions The names of O Leary Rowell Corkey and Blower Brown all men born in the British Islands have been recorded above those of Weston at different times but it remains to the glory of the American pedestrian that in 1879 he beat them all All these changes and ups and downs in pedestrianism for the last ten years have made the old books obsolete and the publishers of the former Dime Book of Pedestrianism have determined to issue a new edition fully up to the times in all respects Besides practical instructions in walking founded on the different styles of noted professionals we shall annex much matter never before put in a handbook concerning the preparation of tracks measurements timing and scoring for the information of that large class of people living in country towns and villages who have plenty of walkers but no experience in the conduct of matches and no opportunity to see how things are done in first class matches Every one can walk but not every one can become a great walker Any young man of good health and strength can learn to walk five miles in an hour but

the number of men who can walk twenty five miles in five hours is very small and will always remain so If we take the population of any town or village we shall find that out of every hundred young men from eighteen to twenty five years of age there are about sixty more or less given to athletic sports twenty who are very enthusiastic about them and six or eight who would make good walkers runners and general athletes Of this six or eight there is generally one who is better than his fellows and he becomes the village champion in one sport or another This is about the true proportion one per cent of the young male community that is capable of being taken at random and converted into good professional walkers A general system of early physical training would soon increase this proportion but as we are never likely to see any such system adopted we must be content with what we can get Out of those capable of becoming great walkers and striving to become so the proportion of second rate men is quite large To be continue in this ebook
