Machine Learning for Criminology and Crime Research Gian Maria Campedelli, 2022-06-09 Machine Learning for Criminology and Crime Research At the Crossroads reviews the roots of the intersection between machine learning artificial intelligence AI and research on crime examines the current state of the art in this area of scholarly inquiry and discusses future perspectives that may emerge from this relationship As machine learning and AI approaches become increasingly pervasive it is critical for criminology and crime research to reflect on the ways in which these paradigms could reshape the study of crime In response this book seeks to stimulate this discussion The opening part is framed through a historical lens with the first chapter dedicated to the origins of the relationship between AI and research on crime refuting the novelty narrative that often surrounds this debate The second presents a compact overview of the history of AI further providing a nontechnical primer on machine learning The following chapter reviews some of the most important trends in computational criminology and quantitatively characterizing publication patterns at the intersection of AI and criminology through a network science approach This book also looks to the future proposing two goals and four pathways to increase the positive societal impact of algorithmic systems in research on crime The sixth chapter provides a survey of the methods

emerging from the integration of machine learning and causal inference showcasing their promise for answering a range of critical questions With its transdisciplinary approach Machine Learning for Criminology and Crime Research is important reading for scholars and students in criminology criminal justice sociology and economics as well as AI data sciences and statistics and computer science Militarizing the American Criminal Justice System Peter B. Kraska,2001 Controlling threats to national security has long been the mission of the U S military while civilian law enforcement has dealt with domestic problems of crime illegal drugs and internal disorder This groundbreaking collection argues persuasively that the conventional distinctions between these two forces are becoming blurred and considers the far reaching consequences of the disquieting trend to militarize the nation s criminal justice system The contributors examine the historical and current interrelationships between the military and police illuminating such areas as the ideological similarities between waging real wars and fighting the wars on drugs and crime the reshaping of the military s role after the end of the Cold War the rapidly growing influence of advanced military technology in civilian society and the adaptation of military models such as boot camps and SWAT teams in policing and corrections As the lines between the military industrial complex and the criminal justice enterprise become ever more clouded this work provides a much needed evaluation of the thorny issues dangers and public policy ramifications raised by the entanglement between militari Cops Nad Computers J. Thomas McEwen,1990-02 Discusses the emerging role of microcomputer systems in criminal justice agencies CJ Focuses on the four types of microcomputers in existence today Several general applications now found in CJ agencies are discussed in detail Database management systems are the most visible application and an entire chapter is devoted to it in addition to describing seven specific applications Electronic Bulletin Board Systems BBS and advanced applications on microcomputers including expert systems are also discussed A final chapter presents conclusions on the impact of microcomputers in CJ agencies

Research Handbook on the Law of Artificial Intelligence Woodrow Barfield,Ugo Pagallo,2025-06-09 This second edition provides a broad range of perspectives on the legal implications of artificial intelligence AI across different global jurisdictions Contributors identify the potential threats that AI poses to the protection of rights and human wellbeing anticipating future developments in technological and legal infrastructures **The Encyclopedia of Police Science** William G. Bailey,1995 The first edition 1989 is cited in ARBA 1990 and the Supplement to Sheehy A reference that contains signed alphabetical entries which examine all major aspects of American policing and police science including history current practices new initiatives social pressures and political factors The second edition considerable expands its scope with 70 new entries and revisions and updates of others In this edition greater emphasis is placed on the coverage of drug abuse suppression new types of crime federal mandates for action and international developments that affect American police Annotation copyright Book News Inc Portland OR **The Technology of Policing** Peter K. Manning,2011 With the rise of surveillance technology in the last decade police departments now have an array of sophisticated tools for tracking

monitoring even predicting crime patterns In particular crime mapping a technique used by the police to monitor crime by the neighborhoods in their geographic regions has become a regular and relied upon feature of policing Many claim that these technological developments played a role in the crime drop of the 1990s and yet no study of these techniques and their relationship to everyday police work has been made available Noted scholar Peter K Manning spent six years observing three American police departments and two British constabularies in order to determine what effects these kinds of analytic tools have had on modern police management and practices While modern technology allows the police to combat crime in sophisticated detail oriented ways Manning discovers that police strategies and tactics have not been altogether transformed as perhaps would be expected In *The Technology of Policing* Manning untangles the varying kinds of complex crime control rhetoric that underlie much of today's police department discussion and management and provides valuable insight into which are the most effective and which may be harmful in successfully tracking criminal behavior *The Technology of Policing* offers a new understanding of the changing world of police departments and information technology's significant and undeniable influence on crime management

Crime Prevention in the Urban Community Koichi Miyazawa, Setsuo Miyazawa, 2023-09-20 One of today's most pressing issues in criminology and crime prevention is the problem of crime in our cities and towns and its prevention The topic of crime prevention in the Urban Community was discussed at the 47th International Course of the International Society for Criminology ISC held at Chuo University Tokyo It was the very first time such an ISC meeting was held in Asia and this meant that finally a relatively large number of Japanese and other Asian participants were able to express their views on criminal policy and crime prevention in urban centres all over the world Crime in urban communities is not an exclusively Western phenomenon but it is also a considerable problem in other parts of the world This makes an interchange of ideas between Western Eastern and Third World criminologists particularly important General characteristics of the urban communities that suffer from a high crime rate are ethnic and racial tensions a mix of old housing areas and new business districts a prevailing sense of anonymity slums and juvenile delinquency The existence of these general characteristics besides mutual differences makes cooperation in the crime prevention sphere definitely worth the effort

The Cambridge Handbook of the Law of Algorithms Woodrow Barfield, 2020-11-05 Algorithms are a fundamental building block of artificial intelligence and increasingly society but our legal institutions have largely failed to recognize or respond to this reality *The Cambridge Handbook of the Law of Algorithms* which features contributions from US EU and Asian legal scholars discusses the specific challenges algorithms pose not only to current law but also as algorithms replace people as decision makers to the foundations of society itself The work includes wide coverage of the law as it relates to algorithms with chapters analyzing how human biases have crept into algorithmic decision making about who receives housing or credit the length of sentences for defendants convicted of crimes and many other decisions that impact constitutionally protected groups Other issues covered in the work include the impact of algorithms on the law of

free speech intellectual property and commercial and human rights law **Searching for Answers** National Institute of Justice (U.S.),1993 **The Power of the Prosecutor** Joan E. Jacoby,Edward C. Ratledge,2016-01-11 In this book readers will take a fascinating journey with local prosecutors as they seek to obtain reasonable and appropriate case dispositions while preventing abuse and misuse of the law and protecting the civil rights of their jurisdictions Prosecutors have a powerful and generally little understood role in the criminal justice system Their important powers include accepting or rejecting cases making decisions about dismissing charges or moving cases to disposition and recommending a sentence all of which can critically affect not only individuals but society through their ability to shape our criminal justice system The Power of the Prosecutor Gatekeepers of the Criminal Justice System explores the real world actions and outcomes of local prosecutors through five well known cases documenting the variety of pressures prosecutors face both within and outside their offices as they attempt to make the best decisions about crimes and defendants Written by individuals who have actively engaged prosecutors in practically every U S state over 30 years time the book examines actual case profiles that enable readers to witness how prosecutors reach their behind the scenes decisions and grasp how the criminal justice system operates The authors explain the variations in prosecution including the effects of policies and priorities action choices available and the types of both internal and external relationships with other participants in the system the police the courts the defense counsel and the community they represent Readers will come away with in depth knowledge and understanding of the complexities and pressures faced by prosecutors in upholding justice under a wide variety of conditions
