## **Handbook On Chinas Wto Accession And Its Impacts:**

*Handbook On China's Wto Accession And Its Impacts* Cheong Ching, Hung-yee Ching, 2003-06-20 It has taken China 15 long years of tough negotiations to achieve accession to the World Trade Organization WTO By becoming a full member of the WTO China has in fact made three tiers of commitments The first tier is the commitment to the objectives of the WTO such as free trade most favoured nations national treatment and transparency as expounded in the various documents setting up the organization and its predecessor the GATT The second tier is the commitment to the set of rules governing trade for specific sectors such as agricultural and textile goods or information technology and telecommunications This is set out in China's accession protocol The third tier is the commitment to bilateral agreements which China signed with her major trading partners Their support is mandatory before China can be admitted to the WTO and therefore she has to satisfy each of them through elaborate bilateral negotiations This handbook highlights the important commitments that China has made to the international community and analyzes the potential impact of such commitments on China Part I of the book outlines China's commitments to convert her economy from a centrally planned one to a free market one as far as cross border movement of goods services and personnel is concerned It reproduces China's commitments in a tabular format to facilitate reading and is supplemented with brief references to WTO regulations where appropriate so that readers get to know how China's commitments relate to WTO obligations Part II examines the impacts of China's WTO membership as a whole and on her specific economic sectors Part III consists of Tables and Figures selected from a Report compiled by the US General Accounting Office presenting some of the Office's analysis and findings of China's commitments on WTO accession Appendix 1 lists all the legal instruments pertaining to China's accession to the WTO Appendix 2 reprints the Protocol of China's Accession China's schedule of commitments on services rearranged in a format more comprehensible to the general reader is included as Appendix 3 so that concerned readers can find out for themselves how their professions may be affected Appendix 4 reprints the GATS Services Sectoral Classification GNS W 120 and part of the CPC Provisional version This appendix is attached to facilitate readers to check whether their specific professions which are spelt out in 3 6 digit codes are included in Chinese commitments

**Handbook on China's Wto Accession and Its Impacts** Cheong Ching, Hung Yee Ching, 2003 This handbook highlights the important commitments that China has made to the international community and analyzes the potential impact of such commitments on China Part I of the book outlines China's commitments to convert her economy from a centrally planned one to a free market one as far as cross border movement of goods services and personnel is concerned It reproduces China's commitments in a tabular format to facilitate reading and is supplemented with brief references to WTO regulations where appropriate so that readers get to know how China's commitments relate to WTO obligations Part II examines the impacts of China's WTO membership as a whole and on her specific economic sectors Part III consists of tables and figures selected from a report compiled by the US General Accounting Office presenting some of the

Office's analysis and findings of China's commitments on WTO accession Appendix 1 lists all the legal instruments pertaining to China's accession to the WTO Handbook on China's Accession to the WTO and Business Opportunities Or the World Ching Cheong, 2002 China's Implementation of the Rulings of the World Trade Organization Weihuan Zhou, 2019-10-03 Amid the ongoing crisis surrounding the WTO China's role and behaviour in the multilateral trading system has attracted overwhelming attention This timely monograph provides the first comprehensive and systemic analysis of China's compliance with the rulings of the WTO's dispute settlement mechanism DSM It covers all the disputes in which China has been a respondent during its 17 year WTO membership and offers a detailed discussion of China's implementation of adverse WTO rulings its approaches to settling WTO disputes the possible explanations for such approaches and post compliance issues The book shows how China has utilised the limitations and flexibilities of WTO rulings to ensure that its implementation of the rulings not only delivers adequate compliance but also maintains its own interests Overall this book argues that the issues relating to the quality of China's compliance and post compliance practices concern the loopholes within the DSM itself which may be utilised by all WTO Members However despite the loopholes China's record of compliance suggests that the DSM has been largely effective in inducing compliance and influencing domestic policy making It is therefore in the interest of all WTO Members and other stakeholders to protect the DSM as the crown jewel of the multilateral trading system

China and the WTO Esther Lam, 2009-10-08 Joining the World Trade Organization WTO enables China to reform its legal order and to move towards a system incorporating major principles of the rule of law The WTO also serves as an external impetus that guides contemporary Chinese legal reform and orients it in ways that domestic forces alone could not achieve and sustain Much discussion on the WTO and the Chinese legal system has focused on the issue of compliance whether the Chinese legal system has the capacity to fulfill China's WTO accession commitments The focus of this work is less concerned with compliance issues per se but rather with the extent to which the WTO's requirements vis vis China actually affect the Chinese legal system The fine difference between the two approaches lies in the fact that efforts by the Chinese government to meet its WTO obligations necessarily impact the Chinese legal order and its way of functioning even if their end results may or may not lead to full compliance with what is required of it by the WTO This timely work exposes many behind the scene dealings and relies on valuable information that is not publicly available Not only does it preserve for the historical record important details of the Chinese WTO accession it also sheds light on the travaux préparatoires of China's accession agreement and the negotiation history of important issues some of which remain relevant and highly contentious today As expressed by WTO Director General Pascal Lamy in his foreword to the book through this work Esther Lam succeeds in demonstrating how WTO membership can benefit both the acceding country and the wider WTO family of nations

China's Trade Policy on International Air Transport Chrystal Zhang, Kareem Yarde, 2020-08-09 This book is a political economic analysis of China's transformation to become a global aviation power It aims to identify the driving forces that have shaped China's ever evolving international air transport policy direction and goals in the past four decades and further determines how and to

what extent these driving forces have shaped China's considerations and strategies when executing its policy goals through bilateral air services negotiations. The findings reveal that China's international air transport policymaking has remained in the domain of the country's aviation regulator which has enjoyed an exclusivity to exercise its power on the air transport sector. The book argues that China's international air transport policy direction is in alignment with the country's overall strategic mission and its goal is set to support the country's endeavour to realise the China dream. It concludes that factors at all levels interact with each other with a far reaching impact on the country's policy direction and goal setting however these factors are constrained by time and circumstances. *The Employment Impact of China's WTO Accession* A. S. Bhalla, Shufang Qiu, S. Qiu, 2003-11-20. The book explores the macroeconomic and sectoral employment implications in agriculture industry and services of China's World Trade Organisation accession. It argues that while short run employment losses may occur in the longer term China will be able to generate additional employment particularly in the tertiary sectors and that it can maintain its comparative advantage in labour intensive exports by relocating production from high cost coastal areas to the hinterland with abundant supply of cheap labour. It also argues that although China is likely to benefit in the long run in the short and medium term China is likely to face enormous problems including increased unemployment as weaker links cease to be protected by tariffs and the problem of restructuring state owned enterprises.

China's Challenge to US Supremacy John G. Glenn, 2017-02-27. This book analyzes China's development in the wider context of the global trade investment security knowledge and production regimes established by the United States. It argues that although China has thus far been able to enjoy rapid growth within this global architecture it will have to deal with a more challenging external environment as other states react to its rise. More specifically it is facing growing pressure to realign its currency a greater number of trade investment and intellectual property disputes a more hostile security environment and exclusionary regional trans Pacific and trans Atlantic trade agreements. It is also being confronted by an array of internal issues from an ageing population and weaknesses in the high tech sector to over reliance on foreign companies for exports non performing loans and a burgeoning

state debt This in turn has led an increasing number of firms to relocate to other countries For the time being the author concludes China's global ambitions and challenge to US supremacy will have to be scaled back This insightful work will appeal to students and scholars of China's politics economy and development
