

Immigration, Industry, and the American Dream

Overview

In this game, formatted as a mystery party, students will role-play representative figures of the immigration boom and second industrial revolution (1850–1920). Some, like Andrew Carnegie, are famous figures from United States history, while others will represent recent immigrants. Students have scripted questions, answers, and clues to use while trying to solve the “Mystery of the Golden Key.” This fun game provides an overview of period issues and attitudes while offering students the opportunity to express their inner hams. Depending on your desired level of involvement, you can run this game with very little prep, or can have students dress up, bring food, and have a well-planned class party.

The total class time to complete the activity should be about two, 50-minute periods. You will assess student learning through discussion and by collecting their finished character sheets at the end of the activity.
