Hands On The Past:

Timeless Truth in the Hands of History Gale Heide, 2012-03-16 What is the purpose of theology for the church Systematic theology provides an inroad into this question by offering both a method for doing theology and an explanation for the purpose of that method However system is itself the product of a specific understanding of knowledge grounded in rational demonstration of facts This study attempts to address the historical debate over when systematic theology began Much of the debate is centered on the definition of system and revolves around the use or lack thereof of external philosophical categories or language Specific historical figures have been selected to serve as illustrations of how theological prolegomena functioned in works prior to and following the influence of Enlightenment thought In the early chapters it will be seen that theology was neither totally saturated with nor totally devoid of external philosophical reference points or programmatic intentions On the contrary both external points of reference and programmatic intentions have played a role in theology since the church s inception In other words certain elements of system e g logic non contradiction organization have played a role in theological investigation and construction since at least the second century The last two chapters of this study demonstrate that these may not be the same influences that have marked post Enlightenment systematics One of the primary characteristics of pre Enlightenment theology is its intentional focus on the life of the church Theology like the Scriptures was often written for specific circumstances Enlightenment influences significantly changed the intentions of much of theology in that theological knowledge was studied and displayed for the sake of knowledge itself The church no longer mattered or was at best an afterthought in the realm of what is now seen as the domain of academic theology

New Lithuania in Old Hands Ida Harboe Knudsen,2012-05-01 Based on detailed ethnographic material *New Lithuania in Old Hands* analyzes the impact that European Union accession has had upon the country s aging smallscale farmers and describes how the reality of Lithuania s EU membership has been a far cry from the scenarios of wealth and overabundance once promised The text reveals that in many instances membership has resulted in a return to subsistence production increased insecurity and a reinforcement of kinship obligations Thus instead of treating the European Union as an elite project and voicing the support of various other segments of the population this volume shows how broad parts of the rural population have been affected by and engaged in processes of change following Lithuania s accession changes that threaten to have a large impact upon the future of the country s family structures and its farming demographic
