Handwriting Recognition Zhi-Qiang Liu, Jin-Hai Cai, Richard Buse, 2012-11-07 Over the last few decades research on handwriting recognition has made impressive progress The research and development on handwritten word recognition are to a large degree motivated by many application areas such as automated postal address and code reading data acquisition in banks text voice conversion security etc As the prices of scanners computers and handwriting input devices are falling steadily we have seen an increased demand for handwriting recognition systems and software pack ages Some commercial handwriting recognition systems are now available in the market Current commercial systems have an impressive performance in recognizing machine printed characters and neatly written texts For in stance High Tech Solutions in Israel has developed several products for container ID recognition car license plate recognition and package label recognition Xerox in the U S has developed TextBridge for converting hardcopy documents into electronic document files In spite of the impressive progress there is still a significant perfor mance gap between the human and the machine in recognizing off line unconstrained handwritten characters and words The difficulties encoun tered in recognizing unconstrained handwritings are mainly caused by huge variations in writing styles and the overlapping and the interconnection of neighboring characters Furthermore many applications demand very high recognition accuracy and reliability For example in the banking sector although automated teller machines ATMs and networked banking sys tems are now widely available many transactions are still carried out in the form of cheques Type-2 Fuzzy Graphical Models for Pattern Recognition Jia Zeng, Zhi-Qiang Liu, 2014-09-17 This book discusses how to combine type 2 fuzzy sets and graphical models to solve a range of real world pattern recognition problems such as speech recognition handwritten Chinese character recognition topic modeling as well as human action recognition It covers these recent developments while also providing a comprehensive introduction to the fields of type 2 fuzzy sets and graphical models Though primarily intended for graduate students researchers and practitioners in fuzzy logic and pattern recognition the book can also serve as a valuable reference work for researchers without any previous knowledge of these fields Dr Jia Zeng is a Professor at the School of Computer Science and Technology Soochow University China Dr Zhi Qiang Liu is a Professor at the School of Creative Media City University of Hong Kong China E-Business and Telecommunications Mohammad S. Obaidat, José L. Sevillano, Joaquim Filipe, 2012-11-29 This book constitutes the refereed proceedings of the 8th International Joint Conference on E Business and Telecommunications ICETE 2011 held in Seville Spain in July 2011 The 118 revised full papers presented were carefully reviewed and selected from 409 submissions The topics covered are data communication networking e business optical communication systems security and cryptography signal processing and multimedia applications and wireless networks and information systems These are the main knowledge areas that define the six component conferences namely DCNET ICE B OPTICS SECRYPT SIGMAP and WINSYS which together form the ICETE joint conference Text Entry Systems I. Scott MacKenzie, Kumiko

Tanaka-Ishii, 2010-07-28 Text Entry Systems covers different aspects of text entry systems and offers prospective researchers and developers global guidelines for conducting research on text entry in terms of design strategy evaluation methodology and requirements a discussion of the history and current state of the art of entry systems and specific guidelines for designing entry systems for a specific target depending on devices modalities language and different physical conditions of users Text entry has never been so important as it is today This is in large part due to the phenomenal relatively recent success of mobile computing text messaging on mobile phones and the proliferation of small devices like the Blackberry and Palm Pilot Compared with the recent past when text entry was primarily through the standard gwerty keyboard people today use a diverse array of devices with the number and variety of such devices ever increasing The variety is not just in the devices but also in the technologies used entry modalities have become more varied and include speech recognition and synthesis handwriting recognition and even eye tracking using image processing on web cams Statistical language modeling has advanced greatly in the past ten years and so therein is potential to facilitate and improve text entry increasingly the way people communicate This book covers different aspects of text entry systems and offers prospective researchers and developers Global guidelines for conducting research on text entry in terms of design strategy evaluation methodology and requirements History and current state of the art of entry systems including coverage of recent research topics Specific guidelines for designing entry systems for a specific target depending on devices modalities language and different physical conditions of users Encyclopedia of Computer Science and Technology Harry Henderson, 2009 Presents an illustrated A Z encyclopedia containing approximately 600 entries on computer and technology related topics Remote **Sensing** Boris Escalante, 2012-06-13 This dual conception of remote sensing brought us to the idea of preparing two different books in addition to the first book which displays recent advances in remote sensing applications this book is devoted to new techniques for data processing sensors and platforms We do not intend this book to cover all aspects of remote sensing techniques and platforms since it would be an impossible task for a single volume Instead we have collected a number of high quality original and representative contributions in those areas Software Engineering, Artificial Intelligence, Networking and Parallel/Distributed Computing 2011 Roger Lee, 2011-06-12 The purpose of the 12th Conference Software Engineering Artificial Intelligence Networking and Parallel Distributed Computing SNPD 2011 held on July 6 8 2011 in Sydney Australia was to bring together scientists engineers computer users and students to share their experiences and exchange new ideas and research results about all aspects theory applications and tools of computer and information sciences and to discuss the practical challenges encountered along the way and the solutions adopted to solve them The conference organizers selected 14 outstanding papers from SNPD 2011 all of which you will find in this volume of Springer's Studies in Computational Intelligence **Proceedings of the Fourth International Conference on Signal** and Image Processing 2012 (ICSIP 2012) Mohan S,S Suresh Kumar, 2013-01-11 The proceedings includes cutting edge

research articles from the Fourth International Conference on Signal and Image Processing ICSIP which is organised by Dr N G P Institute of Technology Kalapatti Coimbatore The Conference provides academia and industry to discuss and present the latest technological advances and research results in the fields of theoretical experimental and application of signal image and video processing The book provides latest and most informative content from engineers and scientists in signal image and video processing from around the world which will benefit the future research community to work in a more cohesive Computer Analysis of Images and Patterns André Gagalowicz, Wilfried Philips, 2005-09-27 This volume presents the proceedings of the 11th International Conference on Computer Analysis of Images and Patterns CAIP 2005 This conference ries started about 20 years ago in Berlin Initially the conference served as a forum for meetings between scientists from Western and Eastern block co tries Nowadays the conference attracts participants from all over the world The conference gives equal weight to posters and oral presentations and the selected presentation mode is based on the most appropriate communication medium The program follows a single track format rather than parallel s sions Non overlapping oral and poster sessions ensure that all attendees have the opportunity to interact personally with presenters As for the numbers we received a total of 185 submissions All papers were reviewed by two to four members of the Program Committee The nal selection was carried out by the Conference Chairs Out of the 185 papers 65 were lected for oral presentation and 43 as posters CAIP is becoming well recognized internationally and this year s presentations came from 26 di erent countries South Korea proved to be the most active scienti cally with a total of 16 cepted papers At this point we wish to thank the Program Committee and additional referees for their timely and high quality reviews The paper s mission and review procedure was carried out electronically We also thank the invited speakers Reinhardt Koch and Thomas Vetter for kindly accepting to present invited papers Artificial Intelligence and Soft Computing - ICAISC 2006 Leszek Rutkowski, Ryszard Tadeusiewicz, Lotfi A. Zadeh, Jacek Zurada, 2006-07-01 This book constitutes the refereed proceedings of the 8th International Conference on Artificial Intelligence and Soft Computing ICAISC 2006 held in Zakopane Poland in June 2006 The 128 revised contributed papers presented are organized in topical sections on neural networks and their applications fuzzy systems and their applications evolutionary algorithms and their applications rough sets classification and clustering image analysis and robotics bioinformatics and medical applications various problems of artificial intelligence

**Hybrid Soft Computing for Image Segmentation** Siddhartha Bhattacharyya, Paramartha Dutta, Sourav De, Goran Klepac, 2016-11-12 This book proposes soft computing techniques for segmenting real life images in applications such as image processing image mining video surveillance and intelligent transportation systems. The book suggests hybrids deriving from three main approaches fuzzy systems primarily used for handling real life problems that involve uncertainty artificial neural networks usually applied for machine cognition learning and recognition and evolutionary computation mainly used for search exploration efficient exploitation of contextual information and optimization. The contributed chapters discuss both

Soft Computing: Theories and Applications Millie Pant, Kanad Ray, Tarun K. Sharma, Sanyog Rawat, Anirban Bandyopadhyay, 2017-11-23 This book focuses on soft computing and its applications to solve real life problems occurring in different domains ranging from medical and health care supply chain management and image processing to cryptanalysis It presents the proceedings of International Conference on Soft Computing Theories and Applications SoCTA 2016 offering significant insights into soft computing for teachers and researchers and inspiring more and more researchers to work in the field of soft computing The term soft computing represents an umbrella term for computational techniques like fuzzy logic neural networks and nature inspired algorithms In the past few decades there has been an exponential rise in the application of soft computing techniques for solving complex and intricate problems arising in different spheres of life The versatility of these techniques has made them a favorite among scientists and researchers working in diverse areas SoCTA is the first international conference being organized at Amity University Rajasthan AUR Jaipur The objective of SoCTA 2016 is to provide a common platform to researchers academicians scientists and industrialists working in the area of soft computing to share and exchange their views and ideas on the theory and application of soft computing techniques in multi disciplinary areas The aim of the conference is to bring together young and experienced researchers academicians scientists and industrialists for the exchange of knowledge SoCTA especially encourages the young researchers at the beginning of their career to participate in this conference and present their work on this platform American Book Publishing Record Artificial Intelligence and Soft Computing Leszek Rutkowski, Marcin Korytkowski, Rafał Scherer, Ryszard .2003 Tadeusiewicz, Lotfi A. Zadeh, Jacek M.
