Nagy,A. Balogh,Thomas E. Cravens,Michael Mendillo,Ingo Müller-Wodarg,2008-12-31 Andrew F Nagy Originally published in the

journal Space Science Reviews Volume 139 Nos 1 4 DOI 10 1007 s11214 008 9353 0 Springer Science Business Media B V
2008 Keywords Aeronomy The term aeronomy has been used widely for many decades but its origin has mostly been lost
over the years It was introduced by Sydney Chapman in a Letter to the Editor entitled Some Thoughts on Nomenclature in
Nature in 1946 Chapman 1946 In that letter he suggested that aeronomy should replace meteorology writing that the word
meteor is now irrelevant and misleading This proposal was apparently not received with much support so in a short note in
Weather in 1953 Chapman 1953 wrote If despite its obvious convenience of brevity in itself and its derivatives it does not
commend itself to aeronomers I think there is a case for modifying my proposal so that instead of the word being used to
signify the study of the atmosphere in general it should be adopted with the restricted sense of the science of the upper
atmosphere for which there is no convenient short word In a chapter he wrote in a 1960 book Chapman 1960 he give his nal
and de nitive de nition by stating that Aeronomy is the science of the upper region of the atmosphere where dissociation and
ionization are important The Workshop on Comparative Aeronomy was held at ISSI during the week of June 25 29 2007
