Carson of Venus Edgar Rice Burroughs,2007-01-01 CARSON OF VENUS volume 2 Carson of Venus Carson is left for dead and Duare is enslaved Carson s only mission now is to find and rescue Duare and make his escape with her to their new kingdom of Korva Carson s adventures continue in Escape on Venus where typically strange people and places and an even stranger menagerie of weird and wonderful creatures impede at every step Carson s attempts to find true happiness with Duare Leonaur s Carson of Venus 2 contains two more classic scientific romances written with all the magical pace and verve we have come to expect from this master storyteller [Escape on Venus - Publishing People Series](#) Edgar Rice Burroughs,2020-10-16 IF YOU will look at any good map of Venus you will see that the land mass called Anlap lies northwest of the island of Vepaja from which Duare and I had just escaped On Anlap lies Korva the friendly country toward which I pointed the nose of our plane Of course there is no good map of Venus at least none that I ever have seen because the scientists of the southern hemisphere of the planet the hemisphere to which Chance carried my rocket ship have an erroneous conception of the shape of their world They believe that Amtor as they call it is shaped like a saucer and floats

upon a sea of molten rock This seems quite evident to them for how else might the spewing of lava from the craters of volcanoes be explained They also believe that Karbol Cold Country lies at the periphery of their saucer whereas it is as a matter of fact the Antarctic region surrounding the south pole of Venus You may readily perceive how this distorts their conception of actual conditions and is reflected in maps which are to say the least weird Where actually the parallels of longitude converge toward the pole their conception would be that they converged toward the Equator or the center of their saucer and that they were farthest apart at the periphery of the saucer **Escape on Venus** Edgar Rice Burroughs, 1941

Escape on Venus; Illus. by John Coleman Burroughs Edgar Rice Burroughs, **Pseudoscience and the Paranormal** Terence Hines, 2010-09-30 Television the movies and computer games fill the minds of their viewers with a daily staple of fantasy from tales of UFO landings haunted houses and communication with the dead to claims of miraculous cures by gifted healers or breakthrough treatments by means of fringe medicine The paranormal is so ubiquitous in one form of entertainment or another that many people easily lose sight of the distinction between the real and the imaginary or they never learn to make the distinction in the first place In this thorough review of pseudoscience and the paranormal in contemporary life psychologist Terence Hines teaches readers how to carefully evaluate all such claims in terms of scientific evidence Hines devotes separate chapters to psychics life after death parapsychology astrology UFOs ancient astronauts cosmic collisions and the Bermuda Triangle faith healing and more New to this second edition are extended sections on psychoanalysis and pseudopsychologies especially recovered memory therapy satanic ritual abuse facilitated communication and other questionable psychotherapies There are also new chapters on alternative medicine which is now marketed in our drug stores and on environmental pseudoscience with special emphasis on the evidence that certain technologies like cell phones or environmental agents like asbestos cause cancer Finally Hines discusses the psychological causes for belief in the paranormal despite overwhelming evidence to the contrary This valuable highly interesting and completely accessible analysis critiques the whole range of current paranormal claims **Atmospheric Evolution on Inhabited and Lifeless**

Worlds David C. Catling, James F. Kasting, 2017-04-13 As the search for Earth like exoplanets gathers pace in order to understand them we need comprehensive theories for how planetary atmospheres form and evolve Written by two well known planetary scientists this text explains the physical and chemical principles of atmospheric evolution and planetary atmospheres in the context of how atmospheric composition and climate determine a planet's habitability The authors survey our current understanding of the atmospheric evolution and climate on Earth on other rocky planets within our Solar System and on planets far beyond Incorporating a rigorous mathematical treatment they cover the concepts and equations governing a range of topics including atmospheric chemistry thermodynamics radiative transfer and atmospheric dynamics and provide an integrated view of planetary atmospheres and their evolution This interdisciplinary text is an invaluable one stop resource

for graduate level students and researchers working across the fields of atmospheric science geochemistry planetary science astrobiology and astronomy Comparative Climatology of Terrestrial Planets Stephen J. Mackwell, Amy A. Simon-Miller, Jerald W. Harder, Mark A. Bullock, 2014-01-30 Through the contributions of more than sixty leading experts in the field Comparative Climatology of Terrestrial Planets sets forth the foundations for this emerging new science and brings the reader to the forefront of our current understanding of atmospheric formation and climate evolution Provided by publisher **Interplanetary Mission Analysis and Design** Stephen Kemble, 2006-09-01 The present impetus to drive down the overall cost of space missions is leading to ever increasing demands for more efficient design techniques over a wide range of interplanetary missions and the methods now being utilised to do this are described in this timely and authoritative work
