Escholarship A Lita Guide:

Escholarship Debra Shapiro, 2005 *Library Linked Data in the Cloud* Carol Jean Godby, Shenghui Wang, Jeffrey K. Mixer, 2015-05-25 This book describes OCLC's contributions to the transformation of the Internet from a web of documents to a Web of Data. The new Web is a growing cloud of interconnected resources that identify the things people want to know about when they approach the Internet with an information need. The linked data architecture has achieved critical mass just as it has become clear that library standards for resource description are nearing obsolescence. Working for the world's largest library cooperative, OCLC researchers have been active participants in the development of next generation standards for library resource description. By engaging with an international community of library and Web standards experts, they have published some of the most widely used RDF datasets representing library collections and librarianship. This book focuses on the conceptual and technical challenges involved in publishing linked data derived from traditional library metadata. This transformation is a high priority because most searches for information start not in the library nor even in a Web accessible library catalog but elsewhere on the Internet. Modeling data in a form that the broader Web understands will project the value of libraries into the Digital Information Age. The exposition is aimed at librarians, archivists, computer scientists, and other professionals interested in modeling bibliographic descriptions as linked data. It aims to achieve a balanced treatment of theory, technical detail, and practical application. The ABCs of ERM Jessica Zellers, Tina M. Adams, Katherine Hill, 2018-01-22 The ever shifting landscape of electronic resources challenges even the most tech savvy information professionals. Now, however, you can surmount those challenges with the solid backing offered in this practical book. Despite their being visible, valuable, and expensive components of public and academic library collections, electronic resources remain somewhat mysterious to many librarians. How do you deal with vendors? how do you decide which e resources to buy? how do you optimize access for remote users and perhaps most importantly how do you motivate your public to use them? Created by three front line practitioners, this guide answers all of those questions and more, offering practical advice to information professionals involved in any aspect of electronic resource management, from selecting, acquiring, and activating to managing, promoting, and deselecting. It features clear instructions along with definitions, checklists, FAQs, and sidebars comprising sensible tips and anecdotal asides for the involved librarian. Written in a lively style and brimming with helpful information, this is the guide you'll wish you had in library school and a resource you will refer to again and again. Directory of Information Management Software for Libraries, Information Centers, Record Centers, 2006 **XML for Catalogers and Metadata Librarians** Timothy W. Cole, Myung-Ja K. Han, 2013-05-23 This book provides a foundation of knowledge for catalogers, metadata librarians, and library school students on the Extensible Markup Language (XML), one of the most commonly listed qualifications in today's cataloger and metadata librarian job postings. How are today's librarians to manage and describe the ever expanding volumes of resources in both digital and print formats? The use of XML in cataloging and

Márquez,2019-10-29 Esta obra analiza la problemática actual de la enorme producción y almacenamiento mundial de información en forma de documentos electrónicos o digitales así como los problemas derivados de ello en cuanto a la confianza o falta de ella. Estudia y establece los factores que determinan e inciden en la confianza desde múltiples enfoques disciplinarios especialmente desde la bibliotecología y la archivística y en variados tipos de información digital: libros, revistas, académicas, sitios web, comercio electrónico y especialmente en los documentos de archivo y los archivos así como en las personas e instituciones que los manejan. La creación o pérdida de confianza en la administración pública es uno de los temas de mayor preocupación para una gran cantidad de gobiernos en el mundo. Los temas de gobierno abierto, transparencia, rendición de cuentas y participación ciudadana no pueden construirse sin la confianza de los ciudadanos y las instituciones en los archivos gubernamentales de ahí la gran importancia de la creación de confianza en los documentos de archivo públicos y la gran problemática que implica la pérdida o decremento de esa confianza sobre todo en esta época de gran escepticismo en las administraciones públicas a escala mundial.
