At Howard Rock's birth a shaman predicted that he would become a great man. Born in 1911 in a sod igloo in Point Hope, an ancient Eskimo village, Howard became an accomplished artist and crusading newspaper editor who helped to defend his people from a controversial Atomic Energy Commission proposal to excavate a harbor near his native village with an atomic blast. *Art and Eskimo Power* chronicles the life of this influential artist, editor, and founder of the *Tundra Times*, under whose leadership the newspaper helped to organize Alaska's native people to press their aboriginal land claims before Congress, which ultimately led to their being awarded over 1 billion and 40 million acres.

An Annotated Bibliography of Inuit Art Richard C. Crandall, Susan M. Crandall, 2015-07-25. Archaeological digs have turned up sculptures in Inuit lands that are thousands of years old, but Inuit art as it is known today only dates back to the beginning of the 1900s. Early art was traditionally produced from soft materials such as whalebone, and tools and objects were also fashioned out of stone, bone, and ivory because these materials were readily available. The Inuit people are known not just for their sculpture but for their graphic art as well, the most prominent forms being lithographs and stonecuts. This work affords easy access to information to those interested in any type of Inuit art. There are annotated entries on over 3,761 articles, books, catalogues, government documents, and other publications.

Art Et Architecture Au Canada Loren Ruth Lerner, Mary F. Williamson, 1991-01-01. Identifies and summarizes thousands of books, article, exhibition catalogues, government publications, and theses published in many countries and in several languages from the early nineteenth century to 1981.

Native American Art in the Twentieth Century W. Jackson Rushing III, 2013-09-27. This illuminating and provocative book is the first anthology devoted to Twentieth Century Native American and First Nation art. Native American Art brings together anthropologists, art historians, curators, critics, and distinguished Native artists to discuss pottery, painting, sculpture, printmaking, photography, and performance art by some of the most celebrated Native American and Canadian First Nation artists of our time. The contributors use new theoretical and critical approaches to address key issues for Native American art, including symbolism and spirituality, the role of patronage and museum practices, the politics of art criticism, and the aesthetic power of indigenous knowledge. The artist contributors, who represent several Native nations including Cherokee, Lakota, Plains Cree, and those of the Plateau country, emphasise the importance of traditional stories, mythologies, and ceremonies in the production of contemporary art. Within great poignancy they write about recent art in terms of home, homeland, and aboriginal sovereignty. Tracing the continued resistance of Native artists to dominant orthodoxies of the art market and art history, *Native American Art in the Twentieth Century* argues forcefully for Native art's place in modern art.

Workmanship and the State of the Industrial Arts Thorstein Veblen, 2023-12-07 In *The Instinct of Workmanship and the*
State of the Industrial Arts Thorstein Veblen presents a profound critique of the social and economic structures that shape
industrial production With a keen sociological lens Veblen explores the innate human drive toward creativity and
craftsmanship arguing that societal norms often stifle this instinct in contemporary industrial societies The book blends
rigorous analysis with a distinctive prose style incorporating humor and irony to illuminate the paradoxes of capitalism
Placing the evolution of industrial arts within the broader context of social evolution Veblen elucidates how cultural values
shape technological progress and human labor Thorstein Veblen was an influential economist and social critic active during
the late 19th and early 20th centuries His formative experiences as a member of the Midwestern farming community and his
academic background in sociology informed his views on how economic activities affect societal relations Veblen s interest in
the interplay between technology and craftsmanship arose from his desire to advocate for a more equitable industrial system
that respects the innate artistic tendencies of workers as opposed to mere profit driven motives This book is essential for
readers interested in economic sociology industrial relations and the philosophy of technology Veblen s incisive arguments
remain relevant in today s discussions on productivity labor rights and the value of creative work As such it invites a
reevaluation of how we perceive work in the contemporary world making it a must read for scholars and general readers

The instinct of workmanship, and the state of industrial arts Thorstein Veblen, 2023-07-10 In *The Instinct of Workmanship*
and the State of Industrial Arts Thorstein Veblen explores the intricate relationship between human instinct and industrial
productivity challenging the prevailing economic theories of his time With a keen analytical lens Veblen critiques the

capitalist framework and its impact on the art of craftsmanship arguing for the inherent human desire to create and improve. The book employs a rich analytical style blending sociology and economics to underscore the significance of workmanship in the industrial age while advocating for a return to a more creative approach to work rather than viewing it merely as a means of subsistence or profit. Thorstein Veblen, a prominent American economist and social theorist, emerged in a time marked by rapid industrialization and profound social change. His own experiences within the capitalist society and profound interest in social behavior led him to examine how these institutions affected the human capacity for craftsmanship. Veblen's background in both sociology and economics fundamentally shaped his critiques of economic practices, making him a significant figure in the development of institutional economics. This book is a must read for anyone interested in understanding the sociocultural implications of industrial practices today. Veblen's insights resonate with contemporary discussions about the role of creativity and craftsmanship in a technology-driven economy, making this work both timely and relevant.

The Way of Inuit Art Emily Elisabeth Auger, 2005. Inuit art, both ancient and contemporary, has inspired the interest of scholars, collectors, and art lovers around the globe. This book examines Inuit art from prehistory to the present with special attention to methodology and aesthetics, exploring the ways in which it has been influenced by and has influenced non-Inuit artists and scholars. Part One gives the history of the main art-producing prehistoric traditions in the North American Arctic, concentrating on the Dorset, who once flourished in the Canadian region. It also demonstrates the influence of theories such as evolutionism, diffusionism, ethnographic comparison, and shamanism on the interpretation of prehistoric Inuit art. Part Two demonstrates the influence of such popular theories as nationalism, primitivism, modernism, and postmodernism on the aesthetics and representation of twentieth-century Canadian Inuit art. This discussion is supported by interviews conducted with Inuit artists. A final chapter shows the presence of Inuit art in the mainstream multi-cultural environment with a discussion of its influence on Canadian artist Nicola Wojewoda. The work also presents various Inuit artists' reactions to Wojewoda's work.

Eskimo Artists Hans Himmelheber, 1993. Hans Himmelheber describes the cultural and artistic heritage of the Yup'ik in southwestern Alaska during the late 1930s. His work is remarkable because he emphasized drawing, carving, and painting as part of a narrative process instead of focusing on Yup'ik art as artifacts. *Eskimo Artists* is rich in examples attributed to named orators, and interpretation is kept to a minimum. Himmelheber includes family histories, daily and ceremonial activities of the men and women he met, and their opinions about artistic expression.
