Eskimos Of Northwestern Alaska A Biolo:

Eskimos of Northwestern Alaska Paul L. Jamison, Stephen L. Zegura, Frederick A. Milan, 1978 A contribution to the International Biological Program reporting results of research into the biological variation of northwest Alaskan Eskimos including demography nutrition physiology genetics etc

The Human Biology of Circumpolar Populations F. A. Milan, 1980-02-07 This study elucidates the biological and behavioural processes leading to the successful adaptation of circumpolar human populations

The Inupiaq Eskimo Nations of Northwest Alaska Ernest S. Burch, 1998 In what distinguished anthropologist James VanStone has described as a superb example of salvage ethnography The Inupiaq Eskimo Nations of Northwest Alaska presents a social geography of this far corner of the continent as it was during the early historic period Author Ernest S Burch Jr who has studied the area for over thirty years contends that the Inupiaq Eskimos of northwest Alaska were organized into several autonomous societies equivalent to nations as we think of them today but at the hunter gatherer level of complexity This book is a clearly written introduction to these tiny nations it is based primarily on information the author was given by the last generation of Inupiaq elders born while oral narrative still was the primary form of historical record for their societies The book emphasizes the identity of the nations in the region their locations in space and time and the numbers lifeways general distribution and seasonal movements of their members The discussion of each district includes brief summaries of previous research done there and accounts of how each nation met its demise during the second half of the nineteenth century The work presents a substantial body of information that has never been published in book form before and that can never be acquired again It will endure as a major connecting link between archeological and historical research in northwest Alaska and thus is of critical importance to understanding long term social change in the region

Current Developments in Anthropological Genetics Michael H. Crawford, James H. Mielke, 2012-12-06 This volume examines the interrelationship of ecology subsistence patterns and the observed genetic variation in human populations Hence the book is divided conceptually into the following categories nonhuman primates hunters and gatherers nomads swidden agriculturalists peasants and farmers religious isolates and modern and urban aggregates While many of these populations have experienced and are experiencing acculturation as a result of contact with technologically more advanced groups the genetic structures described in this volume attempt to reconstruct the traditional patterns as well as genetic changes because of contact Most chapters also integrate biological genetic social and demographic data within an ecological frame thus presenting a holistic view of the population structures of ecologically distinct groups The first chapter examines the body of early nonhuman primate literature that emphasized ecological determinism in effecting the population structure of our primate ancestors relatives It also examines more recent literature since 1970 in which it became apparent that greater flexibility exists in primate social structure within specific environmental frameworks Thus it appears that our nonhuman primate evolutionary heritage is not one of ecological determinism in social organization

but one of flexibility and rapid change suggesting the evolutionary success of our species is based upon a system of flexibility and that social adaptations can be accomplished in a number of diverse ways Encyclopedia of the Arctic Mark Nuttall, 2005-09-23 With detailed essays on the Arctic's environment wildlife climate history exploration resources economics politics indigenous cultures and languages conservation initiatives and more this Encyclopedia is the only major work and comprehensive reference on this vast complex changing and increasingly important part of the globe Including 305 maps This Encyclopedia is not only an interdisciplinary work of reference for all those involved in teaching or researching Arctic issues but a fascinating and comprehensive resource for residents of the Arctic and all those concerned with global environmental issues sustainability science and human interactions with the environment *The Arctic* Jack D.
