Espacio público y privatización del conocimiento Pablo Gentili,2005 *La privatización de lo público* Melchor Peiro Guerrero,2022-07-27 La participaci n ciudadana para la defensa de lo p blico y la oposici n a su privatizaci n es el factor clave que en M xico como en otros pa ses ha constituido la l nea de defensa de la propiedad p blica y de reforzamiento de la ciudadan a basada en los dictados de la democracia Resaltan en estos conflictos las partes actuantes como son la ciudadan a el Estado y el ente privatizador A ra z del desacuerdo y la protesta social que emerge frente a los actos de privatizaci n se conforman diversos movimientos ciudadanos que act an en nombre de la sociedad y el bien com n bajo figuras como el colectivo el frente la asociaci n civil y otras que son consignadas en esta investigaci n La obra toma como caso de estudio a Culiac n Sinaloa donde se realiz una investigaci n contextualizada del fen meno en estudio que incluy a Tijuana B C plano nacional y a Belo Horizonte MG Brasil como ejemplo internacional Las coincidencias legales y las formas de actuaci n de la autoridad p blica en las tres ciudades establecen que la ciudadan a tiene ante s el grave problema de la falsa representaci n popular ya que es generalmente por la v a de actos ilegales alimentados por la corrupci n en diversas formas que la privatizaci n contin a avanzando dejando a su paso graves afectaciones a la sociedad

Research 2.0 and the Impact of Digital Technologies on Scholarly Inquiry Esposito, Antonella,2016-09-27 The academic landscape has been significantly enhanced by the advent of new technology These tools allow researchers easier information access to better increase their knowledge base Research 2.0 and the Impact of Digital Technologies on Scholarly Inquiry is an authoritative reference source for the latest insights on the impact of web services and social technologies for conducting academic research Highlighting international perspectives emerging scholarly practices and real world contexts this book is ideally designed for academicians practitioners upper level students and professionals interested in the growing field of digital scholarship

The Politics of Academic Autonomy in Latin America Fernanda Beigel,2016-03-03 Academic autonomy has been a dominant issue among Latin American social studies given that the production of knowledge in the region has been mostly suspected for its lack of originality and the replication of Euro American models Politicization within the higher education system and recurrent military interventions in universities have been considered the main structural causes for this heteronomy and thus the main obstacles for scientific achievements This groundbreaking book analyses the struggle for academic autonomy taking into account the relevant differences between the itinerary of social and natural sciences the connection of institutionalization and prestige building professionalization and engagement From the perspective of the periphery academic dependence is not merely a vertical bond that ties active producers and passive reproducers Even though knowledge produced in peripheral communities has low rates of circulation within the international academic system this doesn t imply that their production is or always has been the result of a massive import of foreign concepts and resources This book intends to show that the main differences between mainstream academies and peripheral circuits are

not precisely in the lack of indigenous thinking but in the historical structure of academic autonomy which changes according to a set of factors mainly the role of the state in the higher education system This historical structure explains the particular features of the process of professionalization in Latin American scientific fields *Centers and Peripheries in Knowledge Production* Leandro Rodriguez Medina,2013-10-01 This book examines the circulation of knowledge within globalization focusing on the differences between centers and peripheries of knowledge production in the social sciences It explores not only how knowledge is appropriated in peripheral fields but also how foreign ideas shape those fields and the trajectories of scholars and uses actor network theory to explain circulation of knowledge as an extension of socio technical networks that transcend borders

Sociology in Ecuador Philipp Altmann,2022-11-23 This Palgrave Pivot presents a concise yet comprehensive history of sociology in Ecuador The case of Ecuador is especially interesting as Ecuadorian sociology oscillated between theoretical debates some of them out of time and a constant search for ways of applying them to the local reality In the decades after its formal creation in 1915 early academic sociology in Ecuador worked creatively with already outdated theories around positivism and organicism to understand the indigenous population s position the regional fragmentation and the formation of a coherent nation state in Ecuador After a short attempt of installing a more technical sociology in the 1960s those topics were taken up and re read by Marxist inspired critical sociology after the 1970s leading to the nation wide institutionalization of one particular tradition that could connect to continental debates This book engages with several relevant debates in social sciences and humanities particularly by adding to the thriving research on social sciences and the role of the university and higher education in Latin America Furthermore it touches some recently influential topics in sociology Ecuadorian sociology can be read as Southern Theory or engaged with from a postcolonial or decolonial perspective the research on how ideas travel are diffused or localized is vital for understanding sociology in Ecuador the relation between academia and politics and more

Research and International Trade Policy

Negotiations Mercedes Botto,2010-11-16 The international trade negotiations that were launched throughout Latin America in the 1990s required developing countries to seek out research that could help them make informed decisions This book examines the complex links between the research centers and international organizations who produced the information and the governments who used it *Socially Responsible Higher Education* Budd L. Hall,Rajesh Tandon,2021-05-03 Listen to the podcast Is the university contributing to our global crises or does it offer stories of hope Much recent debate about higher education has focussed upon rankings quality financing and student mobility The COVID 19 pandemic the climate crisis the calls for decolonisation the persistence of gender violence the rise of authoritarian nationalism and the challenge of the United Nations Sustainable Development Goals have taken on new urgency and given rise to larger questions about the social relevance of higher education In this new era of uncertainty and perhaps opportunity higher education institutions can play a vital role in a great transition or civilisational shift to a newly imagined world Socially Responsible Higher Education

International Perspectives on Knowledge Democracy shares the experiences of a broadly representative and globally dispersed set of writers on higher education and social responsibility broadening perspectives on the democratisation of knowledge. The editors have deliberately sought examples and viewpoints from parts of the world that are seldom heard in the international literature. Importantly they have intentionally chosen to achieve a gender and diversity balance among the contributors. The stories in this book call us to take back the right to imagine and reclaim the public purposes of higher education.

Economía política del conocimiento en el sur global Jorge Daniel Vásquez,Cristina Cielo,Pedro Andrés Bravo,2020-09-29 La Universidad y la producción del conocimiento se encuentran en una encrucijada en los Estados y países del sur global y sus proyectos nacionales. En el discurso de las políticas públicas y de las agencias internacionales no solo se espera un papel fundamental de la educación superior en la movilidad social, papel adjudicado desde la democratización y masificación de las universidades en la última parte del siglo XX. De acuerdo con las agendas internacionales y los planes gubernamentales el papel que deben desempeñar ahora es mucho más importante. A las universidades se les encarga el desarrollo económico del país y su posicionamiento en la economía global. Además tienen un puesto central en la transformación planificada de la matriz productiva. Se espera que el conocimiento tenga un lugar privilegiado en la producción y en la economía nacional.

Knowledge Circulation Wiebke Keim,Leandro Rodríguez Medina,Rigas Arvanitis,Natacha Bacolla,Chandni Basu,Stéphane Dufoix,Stefan Klein,Mauricio Nieto Olarte,Barbara Riedel,Clara Ruvituso,Gernot Saalmann,Tobias Schlechtriemen,Hebe Vessuri,2023-06-30 Knowledge is a result of never ending processes of circulation. This accessible volume is the first comprehensive multidisciplinary work to explore these processes through the perspective of scholars working outside of Anglo American paradigms. Through a variety of literature reviews, examples of recent research and in depth case studies the chapters demonstrate that the analysis of knowledge circulation requires a series of ontological and epistemic commitments that impact its conceptualisation and methodologies. Bringing diverse viewpoints from across the globe and from a range of disciplines including anthropology, economics, history, political science, sociology and Science. ii spaces and actors of circulation; iii academic media and knowledge circulation; iv the political economy of academic knowledge circulation; v the geographies, geopolitics and historical legacies of the global circulation of academic knowledge; vi the relationships between academic and extra academic knowledges; and vii methodological approaches to studying the circulation of academic knowledge. This handbook will be essential reading for academics, researchers and postgraduate researchers in the humanities and social sciences interested in the circulation of knowledge.

Knowledge Matters Diana Rhoten,Craig Calhoun,2011-02-22 Universities Are Changing Around The World In China and Africa there is massive expansion while many of America s greatest public universities are experiencing major budget cuts In Latin America universities have been affected by dictatorships and privatization but are now growing in ways central to economic development In Europe universities built as state institutions are being told to raise more money from private sources and are being reorganized so they will compete better in global rankings In this context clarity about the public mission of universities is vital yet it is lacking both outside and inside academia When universities educate students is this simply a private benefit because it advances their careers Or is it a public good because informed citizens are integral to democracy and essential for national economic development How important is equal opportunity What are the effects of hierarchy Who pays now and who will pay tomorrow Should the results of academic research be private property for sale or openly available for public use Who sets the university research agendas What kinds of scholarship flourish and what kinds suffer Should producing competitive research take priority over educating competent students Do international rankings distort these and other university priorities or provide needed objective assessments What are the university s roles and responsibilities in terms of knowledge creation and dissemination today And

tomorrow In this collection scholars report from Asia Africa Europe Latin America and North America They confront the realities and challenges of higher education as it is torn between multiple public and private agendas This comparative perspective illuminates both the continuing importance of the university s public mission and the pressing need to clarify it Diana Rhoten is the founder and director of the Knowledge Institutions Program and the Digital Media and Learning Project at the Social Science Research Council She has published in a range of academic journals and advises cultural scientific and educational institutions on issues of organizational design creative collaboration and adaptive change Craig Calhoun is president of the Social Science Research Council and University Professor of the Social Sciences at New York University He has served in a variety of academic leadership positions including as a dean and has conducted research in many international settings His most recent book is an edited collection Robert K Merton Sociology of Science and Sociology as Science Columbia Ciencia y tecnolog ía en la Argentina contemporánea Aguiar, Diego,Lugones, Manuel,Aristimuño, Francisco,Bekerman, Fabiana,Del Bello, Juan Carlos,Svampa, Fernando,Feld, Adriana,Montesino, Gastón,Niembro, Andrés,D'Onofrio, María Guillermina,2015-02-25 Este libro se enfoca en las transformaciones de las pol ticas que afectaron al sistema p blico de investigaci n cient fica entre 1980 y 2021 ocup ndose del an lisis de organismos p blicos e instrumentos transversales que permean a las distintas instituciones involucradas Dividido en tres partes la primera aborda la cuesti n del financiamiento de la ciencia y la tecnolog a a partir del pormenorizado an lisis de los sucesivos presupuestos p blicos nacionales para dicha finalidad y de los cr ditos del Banco Interamericano de Desarrollo bid entre 1979 y 1989 La segunda secci n se aboca al Consejo Nacional de Investigaciones Cient ficas y T cnicas conicet y la gesti n de los recursos humanos Son los temas principales aqu la carrera del investigador cient fico desde su creaci n hasta el 2003 y las pol ticas de federalizaci n del organismo desde 1983 Finalmente la tercera parte dirige la mirada hacia el problema de la evaluaci n de los recursos humanos con un an lisis de los discursos oficiales sobre la cuesti n y el estudio de los criterios y las pr cticas de evaluaci n del Programa de Incentivos a los Docentes Investigadores poince **Diálogos sobre el modelo agroindustrial argentino** Guillermo Folguera,2024-02-01 Este texto aborda algunas de las principales caracter sticas de la historia del modelo agroindustrial de la Argentina y las consecuencias del cambio abrupto que padeci a partir de los a os noventa bajo el imperativo de la modernizaci n la aparici n y la consolidaci n de multinacionales el rol complejo y contradictorio de las instituciones estatales la modificaci n en el tipo y en el destino de las exportaciones los cambios en las formas de producci n de los cultivos y la ganader a el corrimiento acelerado de la frontera agrcola el aumento en la concentraci n de la propiedad y uso de la tierra los efectos ambientales negativos en diferentes lugares del pa s la intensificaci n de los procesos migratorios a las grandes urbes los cambios laborales y la naturaleza del trabajo rural y hasta el cambio del paradigma alimentario de las poblaciones A partir de m ltiples voces se analizan aqu experiencias en territorio asociadas a dicho modelo la problem tica ambiental el papel de las instituciones p blicas y privadas y la producci n colectiva de saberes **Mujeres y**

perspectivas críticas sobre el concepto de calidad Santiago Gómez Obando, Luis Alberto Pérez Bonfante, Michelle Castrillón Córdoba, Sergio Alejandro Lancheros Cely, Salomé Burbano Delgadillo, David Santiago López Pinzón, 2022-10-07 Este libro reúne reflexiones críticas sobre el concepto de calidad en la educación superior Entender la calidad como una noción multidimensional contextual y de poder constituye la premisa de los textos que aquí se presentan y que han sido elaborados acudiendo a una perspectiva interdisciplinaria que dialoga con la ciencia política la antropología a las ciencias económicas la pedagogía y los estudios rurales Además de presentar una discusión general sobre el concepto de calidad en la educación superior contemporánea el libro propone una aproximación crítica a las tendencias observadas en el caso colombiano y plantea cómo la comprensión de la calidad se enriquece y reconfigura cuando se le confronta con los desafíos que surgen desde la interculturalidad la ruralidad la construcción de paz la formación docente y la pedagogía Hablar de calidad remite a discusiones más amplias sobre los sentidos de la educación superior

La seudorrevolución educativa Andrés Felipe Mora

Cortés, 2016-06-30 En La seudorrevolución educativa el profesor Mora nos invita a hacer una reflexión inaplazable sobre los discursos educativos igualitarios que llaman a la inclusión segmentada y jerarquizada de los estudiantes y reproducen profundizan o conservan las desigualdades sociales El rigor de su análisis exige que el debate sobre el tema en Colombia supere la repetición incesante de la publicidad gubernamental la cual ha tenido eco en diversos sectores de la comunidad académica debido a una creencia que se ha convertido en dogma De acuerdo con ella la educación superior de calidad debe ser un bien meritorio destinado a quienes tienen patrimonio o capacidad de endeudamiento o a los más competentes dentro de los límites impuestos al gasto social por una regla fiscal heredada de los ajustes estructurales del pasado La educación terciaria excedente mediocre y funcional a los procesos de acumulación de capital imperantes en el país está reservada para la
