Brown, Piotr Górecki, 2017-05-15 Conflict is defined here broadly and inclusively as an element of social life and social relations Its study encompasses the law not just disputes concerning property but wider issues of criminality coercion and violence status sex sexuality and gender as well as the phases and manifestations of conflict and the behaviors brought to bear on it It engages too with the nature of the transformation spanning the Carolingian period and its implications for the meanings of power violence and peace *Conflict in Medieval Europe* represents the American school of the study of medieval conflict and social order Framed by two substantial historiographical and conceptual surveys of the field it brings together two generations of scholars the pioneers who continue to expand the research agenda and younger colleagues who represent the best emerging work on this subject The book therefore both marks the trajectory of conflict studies in the United States and presents a set of original highly individual contributions across a shifting conceptual range indicative of a major transition in the field *Ethics and Exemplary Narrative in Chaucer and Gower* John Allan Mitchell, 2004 **Crusading and the Crusader States** Andrew Jotischky, 2017-02-17 *Crusading and the Crusader States* follows the progress of the major crusading expeditions offers insights into their continuing failure and charts the development of new attitudes towards Islam and its followers This new edition takes into account the wealth of rich and varied recent research to demonstrate that crusading should be seen as central to the European experience in the Middle Ages and engages in the key historiographical debates of the past decade This includes new research on how crusades were formed the political culture networks liturgies and crusading culture in the East It is essential reading for all students of the Crusades and medieval history *Fulk Nerra, the*

Neo-Roman Consul 987-1040 Bernard S. Bachrach, 2023-09-01 This is the first comprehensive biography of Fulk Nerra an important medieval ruler who came to power in his teens and rose to be master in the west of the French Kingdom Descendant of warriors and administrators who served the French kings Fulk in turn built the state that provided a foundation for the vast Angevin empire later constructed by his descendants Bernard Bachrach finds the terms constructed and built more than metaphorical in relation to Fulk's career He shows how Fulk and the Angevin counts who followed him based their long term state building policy on Roman strategies and fortifications described by Vegetius This creative adaptation of Roman ideas and tactics according to Bachrach was the key to Fulk's successful consolidation of political power Students of medieval and military history will find here a colorful impressively researched biography This is the first comprehensive biography of Fulk Nerra an important medieval ruler who came to power in his teens and rose to be master in the west of the French Kingdom Descendant of warriors and administrators who served the French kings Fulk in turn The Kindness of Strangers John Boswell, 1998-11 Using a wide variety of sources John Boswell examines the evidence that parents of all classes gave up unwanted children exposing them in public places donating them to the church or delivering them in later centuries to foundling hospitals He shows what happened to these children and he illuminates the moral codes that condoned abandonment A Cumulative Bibliography of Medieval Military History and Technology Kelly DeVries, 2008 This is the second update of A Cumulative Bibliography of Medieval Military History and Technology which appeared in 2002 It is meant to do two things to present references to works on medieval military history and technology not included in the first two volumes and to present references to all books and articles published on medieval military history and technology from 2003 to 2006 These references are divided into the same categories as in the first two volumes and cover a chronological period of the same length from late antiquity to 1648 again in order to present a more complete picture of influences on and from the Middle Ages It also continues to cover the same geographical area as the first and second volume in essence Europe and the Middle East or again influences on and from this area The languages of these bibliographical references reflect this geography **The Knowledge of Childhood in the German Middle Ages, 1100-1350** James A. Schultz, Jr., 2015-10-01 James A Schultz has brought a historiographic approach to nearly two hundred Middle High German texts narrative didactic homiletic legal religious and secular He explores what they say about the nature of the child the role of inherited and individual traits the status of education the remarkable number of disruptions these children suffered as they grew up the rites of passage that mark coming of age the various genres of childhood narratives and the historical development of such narratives Lordship in the County of Maine, C. 890-1160 Richard Ewing Barton, 2004 The vision and chronology of tenth and eleventh century lordship on offer here departs from the model of feudal mutation and emphasizes two major themes the centrality of intangible charismatic elements of honor prestige and acclamation and the lack of foundation for any notion of feudal transformation while acknowledging changes in the geography of power across the tenth and eleventh centuries the

argument insists that the practicalities of the practice of lordship remained essentially the same between 890 and 1160

BOOK JACKET The Oxford Handbook of the Merovingian World Bonnie Effros, Isabel Moreira, 2020 The Merovingian world has become more visible in Anglophone historical studies in the past two decades as attention to the social and economic networks of empires and modes of communication has begun to change older frameworks that viewed these centuries in terms of decline and characterized them as the Dark Ages The Merovingian epoch witnessed something which we understand from the perspective of hindsight a tilt to the middle ages The forty six essays included in this volume thus highlight the vitality and importance of the Merovingian kingdoms in the fifth through eighth centuries Rather than suggest that this was a chaotic and obscure interlude between the Fall of the Roman Empire and the Rise of the Carolingians and named for a dynasty with a reputation for few accomplishments and even fewer memorable kings the essays demonstrate that the Merovingian era is an important field in its own right The Handbook's contributors highlight recent research that moves beyond the political developments that were until recently the bread and butter of most historians and include many contributions based on material culture that shed new light on subjects that previously were inaccessible They demonstrate that the Merovingian world was at the center of a wide ranging Merovingian empire of elites peasants economies and cultures and its story must be told through archaeology bio archaeology architecture hagiographic literature manuscripts liturgy visionary literature and eschatology patristics numismatics and material culture In addition to mainland France the essays encompass the geographic conduits of power culture and trade that connected the Merovingian world with Anglo Saxon England Ireland Frisia Spain Italy North Africa and the Byzantine Empire This network empire of intersecting and often conflicting identities political interests religions economies patronage and cultures were intrinsically connected to contemporary developments not just among the Burgundians and Visigoths but among the Byzantines Avars Anglo Saxons Frisians and the Irish fields that were once viewed like the Merovingians themselves in isolation These important developments reveal why the Merovingian period has attracted new audiences and why it will never be viewed as a backwater again

Legal Culture in the Early Medieval West Patrick Wormald, 1999-01-01 Wormald's essays seek to establish that legal history is not just the history of law nor even that of society but also that of elite and popular culture in complex and creative symbiosis This collection will appeal to all interested in the institutions and ideologies of the premodern world

BOOK JACKET Antoine Busnoys Paula Marie Higgins, 1999 This volume brings together twenty original essays by distinguished scholars of late medieval music on the life works and cultural context of the composer Antoine Busnoys c 1430 1492 musician to Charles the Bold Duke of Burgundy and one of the most celebrated composers of the fifteenth century The essays present the results of much new research on music ceremony and ritual in the late Middle Ages intertextual contextual and hermeneutic approaches to the music of Busnoys and his contemporaries methods for assessing issues of authorship and anonymity readings of theorists on compositional procedures and the performance of fifteenth century music

and assessments of Busnoys's legacy to the musical culture of the late Middle Ages. Particularly noteworthy are the studies providing new light on the origins of the *L'homme armé* mass tradition, unpublished documents on Busnoys's activity in churches in Poitiers and Brussels, previously unidentified liturgical sources for his plainchant *cantus firmi*, and studies and complete editions of several anonymous works newly attributed to Busnoys. These widely ranging essays offer a wealth of novel approaches to the study of musical culture in the late Middle Ages that is of interest not only to medievalists but to students of all fields of music historical inquiry.

When Ego Was Imago Brigitte Bedos-Rezak, 2010-11-26 The diffusion of personal signs of identity during the twelfth century introduced individuals to mediated forms of communication. The book analyses the conditions for and the implications of their partnering with material signs and images in expressing self and accountability.

Children Remembered Robert Woods, 2006-09-01 *Children Remembered* discusses the relationship between parents and children in the past. It focuses on the ways in which adults responded to the untimely deaths of children, whether and how they expressed their grief. The study engages with the hypothesis of parental indifference associated with the French cultural historian Philippe Ariès by analysing the changing risk of mortality since the sixteenth century and assessing its consequences. It uses paintings and poems to describe feelings and emotions in ways that are not only highly original but also challenge traditional disciplinary conventions. The circumstances of infant and child mortality are considered for France and England, while example portraits and poems are selected from England and America. While the work is firmly grounded in demography, it is especially concerned with current debates in social and cultural history, with the history of childhood, the way pictorial images can be read, and the use as historical evidence to which literature may be put. This is a wide-ranging and ambitious multi-disciplinary study that will add significantly to our understanding of demographic structures, the ways in which they have conditioned attitudes and behaviour in the past.

Feuding and Peace-Making in Eleventh-Century France Stephen D. White, 2024-10-28 The essays in this volume discuss feuding and peacemaking in France during a period extending from the mid 10th to the early 12th century. They treat various aspects of so-called dispute processing, a term coined by legal anthropologists to refer to the political processes and discursive practices through which conflict is mediated politically, socially, legally, and culturally. Each of the essays can be read both as one element in a larger critique of the theory that a feudal revolution in c. 1000 initiated a century-long era of feudal anarchy in France and as a study on a particular topic in medieval European legal and political history. These include feuding, violence, the emotional dimensions of conflicts among elites, the role of norms and normative argument in disputes, the uses of unilateral ordeals and judicial duels in litigation and alternative strategies for terminating disputes.

Family Forms in Historic Europe Cambridge Group for the History of Population and Social Structure, 1983-03-10 The family forms of historic Europe have been fascinating in their variety. Their importance for the historical development of our continent would be difficult to exaggerate for our relationship with the peoples of the other continents of the world as well. This book is an attempt to recover the different familial systems and

compare them with one another The studies range from Russia Poland Hungary and Austria to Scandinavia Flanders and Britain All the influences which have affected the character and composition of European households are taken into account The analysis covers their function as productive work groups in the procreation and bringing up of children and in the support of the elderly and their relationship with the wider society and its norms along with its political organization central and local Claims that inheritance customs and inheritance practice and the occupation of the household head exerted a powerful influence on the size and composition of households are subjected to rigorous and systematic investigation A History of Childhood Colin Heywood,2017-12-08 Colin Heywood s classic account of childhood from the early Middle Ages to the First World War combines a long run historical perspective with a broad geographical spread This new comprehensively updated edition incorporates the findings of the most recent research and in particular revises and expands the sections on theoretical developments in the new social studies of childhood on medieval conceptions of the child on parenting and on children s literature Rather than merely narrating their experiences from the perspectives of adults Heywood incorporates children s testimonies looking up as well as down Paying careful attention to elements of continuity as well as change he tells a story of astonishing material improvement for the lives of children in advanced societies while showing how the business of preparing for adulthood became more and more complicated and fraught with emotional difficulties Rich with evocative details of everyday life and providing the most concise and readable synthesis of the literature available Heywood s book will be indispensable to all those interested in the study of childhood

The Crisis of the Twelfth Century Thomas N. Bisson,2015-09-22 Medieval civilization came of age in thunderous events like the Norman Conquest and the First Crusade Power fell into the hands of men who imposed coercive new lordships in quest of nobility Rethinking a familiar history Thomas Bisson explores the circumstances that impelled knights emperors nobles and churchmen to infuse lordship with social purpose Bisson traces the origins of European government to a crisis of lordship and its resolution King John of England was only the latest and most conspicuous in a gallery of bad lords who dominated the populace instead of ruling it Yet it was not so much the oppressed people as their tormentors who were in crisis The Crisis of the Twelfth Century suggests what these violent people and the outcries they provoked contributed to the making of governments in kingdoms principalities and towns
