Essays on the Theory of Joint Production Luigi L. Pasinetti, 1988 Essays on the Theory of Joint Production Luigi L. Pasinetti, 1980-06-18 **Mr Sraffa on Joint Production and Other Essays** Bertram Schefold, 1989-09-21 An attempt to provide a formal analysis of joint production the text of which was originally the author's PhD thesis The work is designed to lead from the most abstract and general concepts of the theory of value to applications in the areas of the measurement of capital and growth of international trade and of natural resources Joint Production and Responsibility in Ecological Economics Baumgartner, S. Faber, M. Schiller, J., 2006 an ambitious and compelling book provides a paradigmatic approach to ecological economics that although based on familiar elements is nonetheless fresh and original It is a work that should be read by a diverse set of students and researchers interested in this field Richard B Howarth *Environmental Values* *The Economic Theory of Structure and Change* Mauro Baranzini, Roberto Scazzieri, 1990 This wide ranging 1991 inquiry into the general field of structural economic analysis provides a thorough appraisal of the method of economic dynamics **Topics in Classical Micro- and Macroeconomics** Peter Flaschel, 2010-03-14 This book on Classical micro and macrodynamics includes revised versions of papers which were written between 1983 and 2000 some jointly with co authors and it supplements them with recent work on the issues which are raised and treated in them It attempts to demonstrate to the reader that themes of Classical economics in particular in the tradition of Smith Ricardo and Marx can be synthesized into a coherent whole from the perspective of formal model building This is accomplished by means of mathematical techniques which on the one hand provide a consistent accounting framework labor values and prices of production as point of reference for Classical micro and macro dynamics and which on the other hand attempt to apply these accounting schemes or suitable extensions of them by showing their usefulness as tools of analysis of the implications of technological change labor values and as potential tools for understanding the dynamics of market prices and of income distribution around their centers of gravity production prices and the wage profit curve **Dynamics of Uneven Development** Lynn Mainwaring, 1990 All in all this is an excellent work on trade growth and especially international investment with a unified theme S M Murshed *The Economic Journal* This book is an impressive contribution to the literature on North South models of international economic relations and their implications for development Scott MacDonald *The World Economy* The challenge of providing a simple yet illuminating and integrated analysis of trade development and international capital flows is clearly a daunting one Lynn Mainwaring has nevertheless met that challenge well in this impressive book Ian Steedman University of Manchester UK This important new book critically examines the argument that structural asymmetries between the rich industrialised countries of the global north or centre and the poor largely primary producing countries of the south or periphery could be responsible for an unequal division of the gains from international trade and investment It explores this view by developing a model of Centre Periphery relations using building blocks provided by Sraffa Leontief Pasinetti Goodwin and others *Money,*

Finance and Crises in Economic History Annalisa Rosselli, Nerio Naldi, Eleonora Sanfilippo, 2018-09-03 Recently students and scholars have expressed dissatisfaction with the current state of economics and have called for the reintroduction of historical perspectives into economic thinking Supporting the idea that fruitful lessons can be drawn from the work of past economists this volume brings together an international cross section of leading economists and historians of economic thought to reflect on the crucial role that money crises and finance play in the economy The book draws on the work of economists throughout history to consider afresh themes such as financial and real explanations of economic crises the role of central banks and the design of macroeconomic policies These themes are all central to the work of Maria Cristina Marcuzzo and the contributions both reflect on and further her research agenda This book will be of interest to researchers in the history of economic thought and those who wish to gain a deeper understanding of the variety and diversity in approaches to economic ideas throughout history

Theories of Value from Adam Smith to Piero Sraffa Ajit Sinha, 2018-08-06 This book presents a comprehensive account of more than 200 years of controversy on the classical theories of value and distribution The author focuses on four perhaps most critical classics Adam Smith's *Wealth of Nations* David Ricardo's *Principles of Political Economy* Karl Marx's *Capital* and Piero Sraffa's *Production of Commodities by Means of Commodities* The book highlights several significant differences in the widely celebrated theories of the four authors as it searches for the classical standpoint that separates them from the moderns It also challenges canonical interpretations to analyse their flaws and weaknesses in addition to the already obvious strengths and critically engages with the major alternative interpretations and criticisms of the theories With a new Afterword that follows up on the debates and developments since the first edition this book will appeal to scholars and academics of economic theory and philosophy as well as to the general reader
