*The Age of Entrepreneurship* Robert Bennett, Harry Smith, Carry van Lieshout, Piero Monteburro, Gill Newton, 2019-06-27 This landmark research volume provides the first detailed history of entrepreneurship in Britain from the nineteenth century to the present. Using a remarkable new database of more than nine million entrepreneurs, it gives new understanding to the development of Britain as the world's first industrial nation. Based on the first long-term whole population analysis of British small business, it uses novel methods to identify from the 10 yearly population census the two to four million people per year who operated businesses in the period 1851-1911. Using big data analytics, it reveals how British businesses evolved over time, supplementing the census-derived data on individuals with other sources on companies and business histories. By comparing to modern data, it reveals how the late Victorian period was a golden age for smaller and medium-sized business, driven by family firms, the accelerating participation of women, and the increasing use of incorporation as significant vehicles for development. A unique resource and citation for future research on entrepreneurship of crucial significance to economic development policies for small business around the world and above all, the key entry point for researchers to the database which is deposited at the UK Data Archive, this major publication will change our understanding of the scale and economic significance of small businesses in the nineteenth century

*Divergent Paths : How Culture and Institutions Have Shaped North American Growth* Marc Egnal, Professor of History, York University, 1996-06-11. Why are some countries without an apparent abundance of natural resources such as Japan economic success stories while others languish in the doldrums of slow growth? In this comprehensive look at North American economic history, Marc Egnal argues that culture and institutions play an integral role in determining economic outcome. He focuses his examination on the eight colonies of the North, five colonies of the South, which together made up the original thirteen states, and French Canada. Using census data, diaries, travelers' accounts, and current scholarship, Egnal systematically explores how institutions such as slavery in the South and the seigneurial system in French Canada, and cultural arenas such as religion, literacy, entrepreneurial spirit, and intellectual activity influenced development. He seeks to answer why three societies with similar standards of living in 1750 became so dissimilar in development. By the mid-nineteenth century, the northern states had surged ahead in growth, and this gap continued to widen into the twentieth century. Egnal argues that culture and institutions allowed this growth in the North, not resources or government policies. Both the South and French Canada stressed hierarchy and social order more than the drive for wealth. Rarely have such parallels been drawn between these two societies. Complete with numerous helpful appendices, figures, tables, and maps, *Divergent Paths* is a rich source of unique perspectives on economic development with strong implications for emerging societies.
