Hanaway, 2012-03-19 Persian has been a written language since the sixth century B C Only Chinese Greek and Latin have comparable histories of literacy Although Persian script changed first from cuneiform to a modified Aramaic then to Arabic from the ninth to the nineteenth centuries it served a broader geographical area than any language in world history It was the primary language of administration and belles lettres from the Balkans under the earlier Ottoman Empire to Central China under the Mongols and from the northern branches of the Silk Road in Central Asia to southern India under the Mughal Empire Its history is therefore crucial for understanding the function of writing in world history Each of the chapters of Literacy in the Persianate World opens a window onto a particular stage of this history starting from the reemergence of Persian in the Arabic script after the Arab Islamic conquest in the seventh century A D through the establishment of its administrative vocabulary its literary tradition its expansion as the language of trade in the thirteenth century and its adoption by the British imperial administration in India before being reduced to the modern role of national language in three countries Afghanistan Iran and Tajikistan in the twentieth century Two concluding chapters compare the history of written Persian with the parallel histories of Chinese and Latin with special attention to the way its use was restricted and channeled by social practice This is the first comparative study of the historical role of writing in three languages including two in non Roman scripts over a period of two and a half millennia providing an opportunity for reassessment of the work on literacy in English that has accumulated over the past half century The editors take full advantage of this opportunity in their introductory essay PMIRC volume 4 **Essays on the Sources for Chinese History** Charles P. Fitzgerald, Research School of Pacific Studies. Canberra. Department of Far Eastern History, 1975 **Borders of Chinese Civilization** Douglas Howland, 1996-04-25 D R Howland explores China's representations of Japan in the changing world of the late nineteenth century and in so doing examines the cultural and social borders between the two neighbors Looking at Chinese accounts of Japan written during the 1870s and 1880s he

undertakes an unprecedented analysis of the main genres the Chinese used to portray Japan the travel diary poetry and the geographical treatise In his discussion of the practice of brush talk in which Chinese scholars communicated with the Japanese by exchanging ideographs Howland further shows how the Chinese viewed the communication of their language and its dominant modes history and poetry as the textual and cultural basis of a shared civilization between the two societies With Japan's decision in the 1870s to modernize and westernize China's relationship with Japan underwent a crucial change one that resulted in its decisive separation from Chinese civilization and according to Howland a destabilization of China's worldview His examination of the ways in which Chinese perceptions of Japan altered in the 1880s reveals the crucial choice faced by the Chinese of whether to interact with Japan as kin based on geographical proximity and the existence of common cultural threads or as a barbarian an alien force molded by European influence By probing China's poetic and expository modes of portraying Japan *Borders of Chinese Civilization* exposes the changing world of the nineteenth century and China's comprehension of it This broadly appealing work will engage scholars in the fields of Asian studies Chinese literature history and geography as well as those interested in theoretical reflections on travel or modernism *State and Economy in Republican China* William C. Keith Schoppa, 2000-08-05 China the world's oldest and most populous state remains an enigma to most people in the West even at a time when that country is playing an increasingly prominent role on the international stage At the heart of modern Chinese history have been the efforts of the Chinese people to transform their polity into a modern nation state the Confucian orthodoxy into an ideology that can help direct that process and an agrarian economy into an industrial one These efforts are ongoing and of great importance This book is both an introduction to the major features of modern Chinese history and a resource for researchers interested in virtually any topic relating to the Chinese experience of the last 220 years This valuable reference contains a historical narrative providing a comprehensive overview of five core aspects of Chinese history domestic politics society the economy the world of culture and thought and relations with the outside world a compendium of 250 short
