Etulain, 2023-05 Distinguished historian Richard W Etulain brings together a generous selection of essays from his sixty year career as a specialist on the US West in this essential volume Each essay provides an invaluable overview of the rise of western literary history and historiography including insightful evaluations of individual historians revealing summaries of regional literature and discussions of western stories yet to be told Together these writings furnish readers with useful considerations of important subjects about the American West All those interested in the American West and its interpreters will find these illuminative moments of literary history and historiography especially appealing

Historical Thinking Sam Wineburg, 2001-03 Since ancient times the pundits have lamented young people's lack of historical knowledge and warned that ignorance of the past surely condemns humanity to repeating its mistakes In the contemporary United States this dire outlook drives a contentious debate about what key events nations and people are essential for history students Sam Wineburg says that we are asking the wrong questions This book demolishes the conventional notion that there is one true history and one best way to teach it Although most of us think of history and learn it as a conglomeration of facts dates and key figures for professional historians it is a way of knowing a method for developing and understanding about the relationships of peoples and events in the past A cognitive psychologist Wineburg has been engaged in studying what is intrinsic to historical thinking how it might be taught and why most students still adhere to the one damned thing after another concept of history Whether he is comparing how students and historians interpret documentary evidence or analyzing children's drawings Wineburg's essays offer rough maps of how ordinary people think about the past and use it to understand the present Arguing that we all absorb lessons about history in many settings in kitchen table conversations at the movies or on the world wide web for instance these essays acknowledge the role of collective memory in filtering what we learn in school and shaping our historical thinking

The Economics of Higher Education in the United States

Thomas Adam,Ayten Burcu Bayram,2019-03-27 In The Economics of Higher Education in the United States editors Thomas Adam and A Burcu Bayram have assembled five essays adapted from the fifty second annual Walter Prescott Webb Memorial Lecture Series that focus on the increasing cost of college a topic that causes great anxiety among students parents faculty administrators legislators and taxpayers Essays focus on the funding of colleges the funding of professional schools and the provision of scholarships and student loans for undergraduate students to reveal the impact of money on the structure of institutions of higher education and the organization of colleges The cost of higher education has risen dramatically as both states and the federal government have significantly lowered their contributions to offset that cost With rising tuition and cost of living on top of a growing student population too many graduates find themselves in financial trouble after earning their undergraduate degree Mounting student debt prevents an increasing number of young professionals from embarking on the very life for which their education was supposed to prepare them How have we come from a political environment in which higher education was perceived as a public good normally free to the user to an environment in which higher education is seen as a privilege subject primarily to market forces The Economics of Higher Education in the United States offers a desperately needed analysis in an attempt to understand and tackle this looming problem
