Being and Power. A Phenomenological Ontology of Forms of Life Daniel Rueda Garrido,2024-01-23 Why do we act as we do Why do we assume that the way of being and behaving in our community is right good and common sense Why do we fail to understand those who act and feel differently These are some of the questions that this book raises and attempts to answer This ontology is rooted in the phenomenological tradition but with the innovation of taking the form of life as the central ontological unit We are our form of life but as a transcendental immanent reality this is not directly equivalent to culture or society it is rather the political realisation in the world of an image of the human being shared by a given community This overcomes the traditional dualities of individual and society consciousness and body facticity and freedom actuality and possibility The subject is a subject because it identifies with that image which is equivalent to the

intersubjective consciousness of how one should act and be in the world This gives rise to multiple forms of life The latter implies a certain power to be who one wants to be In this way the book is an invitation to self examination for if our form of life is voluntary i e capitalism it shatters the illusion that one cannot live in any other way and places us before the anguished but inevitable task of justifying its adoption or resorting to its abandonment The book offers a dynamic analysis of human existence as the actualisation of a form of life that is at the same time the exercise of a certain power over those who seek to live otherwise especially when that form is institutionalised by a government as the essence of the national or transnational community

What is Life? Josef Seifert, 2021-11-15 This book makes four bold claims 1 life is an ultimate datum open to philosophical analysis and irreducible to physical reality hence all materialist reductionist explanations most current theories of life are false 2 All life presupposes soul entelechy without which a being would at best fake life 3 The concept of life is analogous and the most direct access to life in its irreducibility is gained through consciousness 4 All life possesses an objective and intrinsic value that needs to be respected human life possesses beyond this an inviolable dignity Life and personal life are pure perfections it being absolutely better to possess personal life than not to possess it Chapter 1 the metaphysical essence and the many meanings of life as well as its transcendental character Chapter 2 the irreducibility of biological life its amazing empirical and philosophically intelligible essential features and the ways of knowing them Chapter 3 the immediate evidence and indubitable givenness of mental conscious life as well as questions of brain death and immortality Chapter 4 the inviolable objective dignity of personal life and its self transcendence a new theory of the fourfold source of human dignity and rights Chapter 5 in dialogue form methods and results of philosophy versus those of empirical life sciences

The Reproduction of Life Death Dawne McCance, 2019-07-02 During the 1975 76 academic year Jacques Derrida delivered a seminar La vie la mort Life Death at the

cole normale supérieure in Paris Based on archival translations of this untapped but soon to be published seminar *The Reproduction of Life Death* offers an unprecedented study of Derrida's engagement with molecular biology and genetics particularly the work of the biologist François Jacob Structured as an itinerary of three rings each departing from and coming back to Nietzsche Derrida's seminar ties Jacob's logocentric account of reproduction to the reproductive program of teaching that characterizes the academic institution challenging this mode of teaching as auto reproduction along with the concept of academic freedom on which it is based McCance also brings Derrida's critique of Jacob's theory of auto reproduction together with his reading of reproductivity the tendency to repeat reproduce that is theorized and enacted in Freud's *Beyond the Pleasure Principle* The book further shows how Derrida's account of life death relates to his writings on autobiography and the signature and to such later concerns as the question of the animal McCance brings extensive archival research together with a deep knowledge of Derrida's work a background in genetics to offer a fascinating new account of an encounter between philosophy and the hard sciences that will be of interest to theorists in a wide range of disciplines concerned with the question of life

Jesus Son of God—Son of Man Jesus Is Our Pattern J. Harlow Holmes, 2019-05-10 This is a Commentary like no other today It reveals the true nature of Jesus as He walked on the earth and fulfilled the very necessary role that was required because of Adam's fall It fulfills the passage of I Corinthians 15:45 the last Adam Jesus had to be like us in order to take our place He was not God in flesh as preached today from most pulpits He was the manifestation of God His Father Manifestation is the KEY word He was God manifested in the flesh When the Apostles saw Jesus in action they saw God the Father John 14:9-11 We can see God in Jesus Another important message is that Jesus was our pattern We the Church should be doing the things that He did today He Said to the disciples As the Father sent Me so send I you John 20:21 Then He included us in His prayer in John 17:20-21 The Bible has been translated by those who believe in the doctrine of the Trinity This came from Constantine and the first Nicene Creed in the 300s AD with the penalty of death involving over 200 Bishops if they did not sign it as he commanded It seems that two were willing to die for the truth All that was required to emphasize that Jesus was God just involved some prepositions and pronouns However the bulk of Jesus' confession indicates otherwise The Prologue is the foundation of proof that Jesus was a human being just like you and me The Lord told me that most everyone is a product of someone else's teaching today However when I was first filled with the Holy Spirit in my mid twenties Jesus told me to let Him teach me I have been faithful to that command for nearly 65 years This commentary is the result of that command

Timing and Temporality in Islamic Philosophy and Phenomenology of Life

Anna-Teresa Tymieniecka, 2007-09-19 From time immemorial concern with timing of life has been crucial for the regulation of human praxis as well as for the philosophical quest to understand existence by seeking its meaning The two used to inform each other until modernity when they parted In spite of the extensive progress in manipulating change and motion and of the abundance of metaphysical attempts to enlighten human beings about their fate the puzzling nature of temporality and

timing of reality remains controversial The present collection of studies seeks a new answer by initiating a novel investigation informed by the ancient wisdom of the Greco Arabic Islamic sources and inheritance on the one side and the contemporary discernment of Occidental phenomenology of life on the other in a common dialogical effort to unravel this great enigma of existence Papers by Anna Teresa Tymieniecka William C Chittick Reza Akbarian Daniela Verducci Michael F Andrews Seyyed Mohammed Khamenei Nader El Bizri Mehdi Aminrazavi Massimo Durante Abdul Rahim Afaki Maria Chiara Teloni A L Samian Kathleen Haney Jad Hatem Robert J Dobie Michel Dion **The Book of Chinese Medicine, Volume 1** Henry H. Introduction to a Phenomenology of Life Renaud Barbaras, 2022-01-04 In Introduction to a Phenomenology of Life renowned French philosopher Renaud Barbaras aims to construct the basis for a phenomenology of life Called an introduction because it has to deal with philosophical limits and presuppositions it is much more as Barbaras investigates life in its phenomenological senses approached through the duality of its intransitive and transitive senses Originally published in French Introduction une ph nom nologie de la vie Introduction to a Phenomenology of Life first defines the problem of life phenomenologically then studies the failures of the phenomenological movement to adequately think about life and finally elaborates a new original and productive approach to the problem Combining original interpretations and expert readings of philosophers such as Heidegger Henry Bergson and Merleau Ponty Barbaras offers a powerful and important contribution to phenomenology and continental thought *Death and the Meaning of Life* graf Leo Tolstoy, 2000 Presents materials that reveal the essence of Tolstoy s beliefs on immortality death God and the meaning of life Contains two booklets About Immortality No 751 and About Death No 752 compiled by Tolstoy comprising quotations from various philosophers explaining the meaning that death gives to life essays explaining the actions that Tolstoy thought must be taken to grow spiritually and finally diary entries translated here for the first time in English pertaining to spiritual themes made during the last year of Tolstoy s life *Life* Valentin Matcas, 2014-04-20 You are an intelligent living human being and in order to assure your meaning and success throughout life you have to know everything about life everywhere in all forms and realities You have to learn everything about nature society and organic life about the true origins of life about creating life and about the divine and about your own meaning in life and in the world as an intelligent living human being While these are not random ideas but these specific needs for higher knowledge are embedded continuously within your own higher level intelligent needs and meanings just because this is the case with all intelligent life But is this important knowledge about life actually available to you and everyone else Yes or no since there are many instances to consider Yet when you are capable to

find the necessary knowledge about life meaning society and the world you are truly capable to live your life at the intelligent human level While if you cannot find it you keep on searching since your own higher level needs and meanings never leave you alone until you learn everything necessary in life and in the world And so you do otherwise you end up living your life on lower developmental levels addicted in servitude or only intuitively through animal instincts And it certainly matters just because you are an intelligent living human being by nature now forced to live life below your level unfulfilled and even punished intrinsically for your continuous failure But where exactly can you find this important knowledge Who can shine a living light on the accurate truth Do you still wait for science to do so when science had already offered you everything that it knows since high school Throughout this book we model life in all significant details as we study everything alive and intelligent from the smallest cellular components to the entire human body mind and spirit and to all forms of life because everything is alive and meaningful in the world If you want to learn more about life in all forms and realities this book is for you

Philosopher Terry Pinkard revisits Sartre s later work illuminating a pivotal stance in Sartre s understanding of freedom and communal action Jean Paul Sartre s Critique of Dialectical Reason released to great fanfare in 1960 has since then receded in philosophical visibility As Sartre s reputation is now making a comeback it is time for a reappraisal of his later work In Practice Power and Forms of Life philosopher Terry Pinkard interprets Sartre s late work as a fundamental reworking of his earlier ideas especially in terms of his understanding of the possibility of communal action as genuinely free which the French philosopher had previously argued was impossible Pinkard reveals how Sartre was drawn back to Hegel a move that was itself incited by Sartre s newfound interest in Marxism Pinkard argues that Sartre constructed a novel position on freedom that has yet to be adequately taken up and analyzed within philosophy and political theory Through Sartre Pinkard advances an argument that contributes to the history of philosophy as well as key debates on action and freedom
