Essential Speech and Language Technology for Dutch Peter Spyns,Jan Odijk,2013-02-26 The book provides an overview of more than a decade of joint R D efforts in the Low Countries on HLT for Dutch It not only presents the state of the art of HLT for Dutch in the areas covered but even more importantly a description of the resources data and tools for Dutch that have been created are now available for both academia and industry worldwide The contributions cover many areas of human language technology for Dutch corpus collection including IPR issues and building in particular one corpus aiming at a collection of 500M word tokens lexicology anaphora resolution a semantic network parsing technology speech recognition machine translation text summaries generation web mining information extraction and text to speech to name the most important ones The book also shows how a medium sized language community spanning two territories can create a digital language infrastructure resources tools etc as a basis for subsequent R D At the same time it bundles contributions of almost all the HLT research groups in Flanders and the

Netherlands hence offers a view of their recent research activities Targeted readers are mainly researchers in human language technology in particular those focusing on Dutch It concerns researchers active in larger networks such as the CLARIN META NET FLaReNet and participating in conferences such as ACL EACL NAACL COLING RANLP CICling LREC CLIN and DIR both in the Low Countries InterSpeech ASRU ICASSP ISCA EUSIPCO CLEF TREC etc In addition some chapters are interesting for human language technology policy makers and even for science policy makers in general **The Adventure travel guide for Belgium** ,2025-09-25 **Belgium in International Tax Planning** Patrick A. A. Vanhaute,2008 This book focuses on commercial and company law and corporate income tax It provides a systematic and comprehensive overview of the current tax planning opportunities that exist in Belgium After some essential legal knowledge of Belgium the chapters consider the Belgian tax regime special features of the Belgian tax system specific anti avoidance provisions and international tax planning tax incentives special tax regimes and tax planning opportunities including the tax treaties with Hong Kong the USA and the UAE **Modeling Cities and Regions as Complex Systems** Roger White,Guy Engelen,Inge Uljee,2024-06-11 The theory and practice of modeling cities and regions as complex self organizing systems presenting widely used cellular automata based models theoretical discussions and applications Cities and regions grow or occasionally decline and continuously transform themselves as they do so This book describes the theory and practice of modeling the spatial dynamics of urban growth and transformation As cities are complex adaptive self organizing systems the most appropriate modeling framework is one based on the theory of self organizing systems an approach already used in such fields as physics and ecology The book presents a series of models most of them developed using cellular automata CA which are inherently spatial and computationally efficient It also provides discussions of the theoretical methodological and philosophical issues that arise from the models A case study illustrates the use of these models in urban and regional planning Finally the book presents a new dynamic theory of urban spatial structure that emerges from the models and their applications The models are primarily land use models but the more advanced ones also show the dynamics of population and economic activities and are integrated with models in other domains such as economics demography and transportation The result is a rich and realistic representation of the spatial dynamics of a variety of urban phenomena The book is unique in its coverage of both the general issues associated with complex self organizing systems and the specifics of designing and implementing models of such systems Routledge Handbook of Regionalism & Federalism John Loughlin,John Kincaid,Wilfried Swenden,2013-07-18 Almost all states are either federal or regionalized in some sense It is difficult to find a state that is entirely unitary and the Routledge Handbook of Regionalism and Federalism necessarily takes in almost the entire world Both federalism and regionalism have been subjects of a vast academic literature mainly from political science but sometimes also from history economics and geography This cutting edge examination seeks to evaluate the two types of state organization from the perspective of political science producing a work that is analytical rather than simply descriptive

The Handbook presents some of the latest theoretical reflections on regionalism and federalism and then moves on to discuss cases of both regionalism and federalism in key countries chosen from the world's macro regions. Assembling this wide range of case studies allows the book to present a general picture of current trends in territorial governance. The final chapters then examine failed federations such as Czechoslovakia and examples of transnational regionalism: the EU, NAFTA and the African Union. Covering evolving forms of federalism and regionalism in all parts of the world and featuring a comprehensive range of case studies by leading international scholars, this work will be an essential reference source for all students and scholars of international politics, comparative politics and international relations.

Water and Liberalisation Matthias Finger, Jeremy Allouche, Patricia Luis-Manso, 2007-01-01. In most network industries, new dynamics are leading to an unprecedented opening up to competition and private sector participation. With the development of a single European market, the in-stages liberalisation process of public utilities has spread to almost all sectors. However, the water supply and sanitation (WSS) sector is considered somehow different and it has been excluded until recently from the restructuring processes achieved in other sectors. *Water and Liberalisation: European Water Scenarios* presents a better understanding of the specific demands of the WSS sector. Covering the operators' strategies, the regulatory dynamics as well as their interactions on the evolution of the sector, it addresses the likelihood, the nature and the forms the WSS sector may take in Europe in the foreseeable future. Adopting a neutral political stance, the book analyses the implications of alternative scenarios in economic, ecological, social, legal and institutional terms. Key sections include: In-depth introduction to the current situation in the WSS sector; The European water supply and sanitation markets; The institutional framework of the water supply and sanitation sector in the EU; a comparative analysis; Analysis of the EU explicit and implicit policies and approaches in the sector; Analysis of the strategies of the water operators in Europe; scenarios on the evolution of the water sector in Europe; Economic, environmental; Major implications per scenario.

Routledge Revivals: Regional Development in Western Europe (1975) Hugh Clout, 2017-11-22. First published in 1975, this book provides a straightforward examination of regional differences and regional development in the countries of Western Europe. Professor Clout divides this into two parts. The first examines a series of themes with reference to the whole of Western Europe and the second part discusses regional development in individual countries or groups of countries. Contributions by experts from the UK and from mainland Europe present an essentially geographic approach, combining thematic and country-by-country discussions.
