Esperanto-Grammatik Dirk Willkommen, 2001 American Esperanto Magazine, 1920 Spatial Interrogatives in Europe and Beyond Thomas Stolz, Nataliya Levkovych, Aina Urdze, Julia Nintemann, Maja Robbers, 2017-08-07 The extant generalizations about the grammar of space rely heavily on the analyses of declarative sentences There is a need to check whether these generalizations also hold in the domain of interrogation To this end this book analyzes data from some 450 languages including non standard varieties The focus is on paradigms of spatial interrogatives such as English where whither and whence and their internal organization These paradigms are checked for recurrent patterns of morphological mismatches such as syncretism and different degrees of complexity e g the number of segments The data base consists of a large parallel literary corpus Le petit prince and translations thereof which is complemented by further sources of information such as descriptive grammars The data are analyzed from a synchronic perspective However diachronic issues are addressed unsystematically too It is shown that the distribution of phenomena which characterize paradigms of spatial interrogatives are subject to areal linguistic factors This is the first typological study of spatial interrogatives It provides new insights for students of the grammar of space morphological paradigms and language typology **A Complete Grammar of Esperanto, the International Language** Ivy Kellerman Reed, 1910 **Word-Formation** Peter O. Müller, Ingeborg Ohnheiser, Susan Olsen, Franz Rainer, 2015-09-14 This handbook comprises an in depth presentation of the state of the art in word formation The five volumes contain 207 articles written by leading international scholars The XVI chapters of the handbook provide the reader in both general articles and individual studies with a wide variety of perspectives word formation as a linguistic discipline history of science theoretical concepts units and processes in word formation rules and restrictions semantics and pragmatics foreign word formation language planning and purism historical word formation word formation in language acquisition and aphasia word formation and language use tools in word formation research The final chapter comprises 74 portraits of word formation in the individual languages of Europe and offers an innovative perspective These portraits afford the first overview of this kind and will prove useful for future typological research This handbook will provide an essential reference for both advanced students and researchers in word formation and related fields within linguistics *Catalog of Copyright Entries. branches of communication science the handbooks will give researchers both an overview and orientation To attain these objectives the series will aim for a standard comparable to that of the leading handbooks in other disciplines and to this end will strive for comprehensiveness theoretical explicitness reliable documentation of data and findings and up to date methodology The editors both of the series and of the individual volumes and the individual contributors are committed to this aim The languages of publication are English German and French The main aim of the series is to provide an appropriate account of the state of the art in the various areas of linguistics and communication science covered by each of the various handbooks however no inflexible pre set limits will be imposed on the scope of each volume The series is open ended and can thus take account of further developments in the field This conception coupled with the necessity of allowing adequate time for each volume to be prepared with the necessary care means that there is no set time table for the publication of the whole series Each volume will be a self contained work complete in itself The order in which the handbooks are published does not imply any rank ordering but is determined by the way in which the series is organized the editor of the whole series enlist a competent editor for each individual volume Once the principal editor for a volume has been found he or she then has a completely free hand in the choice of co editors and contributors The editors plan each volume independently of the others being governed only by general formal principles The series editor only intervene where questions of delineation between individual volumes are concerned It is felt that this modus operandi is best suited to achieving the objectives of the series namely to give a competent account of the present state of knowledge and of the perception of the problems in the area covered by each volume
