Esquibe Dune Theorie Des Emotions:

Sartre: Literature and Theory Rhiannon Goldthorpe, 1984 In this major study Rhiannon Goldthorpe takes up the challenge of Sartre's diversity in an original and provocative way Her detailed and comprehensive exploration of the relationship between the theoretical and literary works pays due attention to their characteristic complexity The discussion of *La Nausée* *Les Mouches* *Huis clos* *Les Mains sales* and *Les Quatre Sœurs* for example does not present these literary texts as mere illustrations of Sartre's theories of consciousness imagination and emotion but as subtle philosophical and linguistic investigations in their own right In addition by reference to recently published fragments from Sartre's earlier work Goldthorpe calls into question existing views of Sartre's intellectual development and provides a new history of the crucial Sartrean concept of commitment

Esquisse d'une théorie des émotions Jean-Paul Sartre, 2010 Un texte introductif à la phénoménologie allemande et tout particulièrement à la pensée de Husserl À partir d'une critique des théories psychologiques traditionnelles Sartre en vient à définir l'émotion non comme un simple mécanisme affectif mais comme un mode d'existence de la conscience Fragment du manuscrit perdu de *La psychologie*

Decolonizing Emotions in French Algeria Christiane-Marie Abu Sarah, 2024-08-22 Alongside the diplomatic struggles of the early Cold War European politicians worked to shape emotions about the postwar order advocating fear of communism and hope for postwar recovery In this context the French Empire in North Africa emerged as one important emotional battleground where Algerian nationalists and anti colonial campaigners challenged French narratives about imperial pride and native hysteria During the Algerian War 1954-1962 emotions thus became a pivotal part of the independence struggle Accordingly *Decolonizing Emotions* tracks affective politics during the revolution focusing on members of the Front de libération nationale FLN Combattants de la libération CDL and Jeune Résistance Delving into the manifestos poetry and personal diaries of anti colonial activists the book

reveals a rich world of transgressive sentiments emotional exile and affective border crossings The stories that surface show how Algerians used biopower to combat an affective regime that refused native populations the right to be angry The book further chronicles how Europeans complicated ideas of humanitarian pity and confronted the French production of political apathy It is a history that holds modern relevance speaking to contemporary debates over race relations and national pride the pathologizing of Muslim emotions and the contested process of how myths die demythologization Reading Sartre Jonathan Webber,2010-10-04 Reading Sartre is an indispensable resource for students of phenomenology existentialism ethics and aesthetics and anyone interested in the relationship between phenomenology and analytic philosophy Specially commissioned chapters examine Sartre s achievements and consider his importance to contemporary philosophy *Simone de Beauvoir, Philosophy, & Feminism* Nancy Bauer,2001 In the introduction to *The Second Sex* Simone de Beauvoir notes that a man never begins by establishing himself as an individual of a certain sex his being a man poses no problem Nancy Bauer begins her book by asking Then what kind of a problem does being a woman pose Bauer s aim is to show that in answering this question *The Second Sex* dramatizes the extent to which being a woman poses a philosophical problem In exploring what it might mean to philosophize as a woman Beauvoir produced a book that not only sparked the contemporary feminist movement but also Bauer argues made an important but still profoundly undervalued contribution to the philosophical tradition *Introduction to Phenomenology* Dermot Moran,2002-06-01 Introduction to Phenomenology is an outstanding and comprehensive guide to phenomenology Dermot Moran lucidly examines the contributions of phenomenology s nine seminal thinkers Brentano Husserl Heidegger Gadamer Arendt Levinas Sartre Merleau Ponty and Derrida Written in a clear and engaging style Introduction to Phenomenology charts the course of the phenomenological movement from its origins in Husserl to its transformation by Derrida It describes the thought of Heidegger and Sartre phenomenology s most famous thinkers and introduces and assesses the distinctive use of phenomenology by some of its lesser known exponents such as Levinas Arendt and Gadamer Throughout the book the enormous influence of phenomenology on the course of twentieth century philosophy is thoroughly explored This is an indispensable introduction for all unfamiliar with this much talked about but little understood school of thought Technical terms are explained throughout and jargon is avoided Introduction to Phenomenology will be of interest to all students seeking a reliable introduction to a key movement in European thought **The Existentialism of Jean-Paul Sartre** Jonathan Webber,2009-01-13 Webber argues for a new interpretation of Sartrean existentialism On this reading Sartre is arguing that each person s character consists in the projects they choose to pursue and that we are all already aware of this but prefer not to face it Careful consideration of his existentialist writings shows this to be the unifying theme of his theories of consciousness freedom the self bad faith personal relationships existential psychoanalysis and the possibility of authenticity Developing this account affords many insights into various aspects of his philosophy not least concerning the origins structure and effects of bad faith

and the resulting ethic of authenticity This discussion makes clear the contributions that Sartre's work can make to current debates over the objectivity of ethics and the psychology of agency character and selfhood Written in an accessible style and illustrated with reference to Sartre's fiction this book should appeal to general readers and students as well as to specialists

La Pensée logique et politique de M. Merleau-Ponty Joseph M Labaki, 2021-01-20 Maurice Merleau-Ponty is the giant phenomenologist of his time in the entire French speaking world He is not an epistemologist nor a moralist For him the beginning of the beginning is human flesh the flesh becomes word the word becomes flesh and both die There is science and there is experience perception The mother is the latter They aren't contradictory but complete and depend on each other With regard to language for him there are words and there is grammar A word is never empty but carries its own weight even a lie is full of meaning Liberty resides in grammar an individual function and independent from books It's in the grammar where singularity lives Thinking and talking are the same Wherever there is human life there is meaning and that is irrespective of age culture religion education or social position Merleau-Ponty is not a Marxist nor a communist According to him history is blind it has no mind He also finds a flaw in Freudianism Flesh is an infinite universe full of stars and black holes Following Merleau-Ponty verity is deceiver and deceiver is verity but verity is never absolute One must take a step back There is light and there is shadow they never coincide in human life The shadow is always first and no matter how one tries to run he will never catch his shadow Pre-reflective Consciousness Sofia Miguens, Gerhard Preyer, Clara

Morando, 2015-10-16 Pre-reflective Consciousness Sartre and Contemporary Philosophy of Mind delves into the relationship between the current analytical debates on consciousness and the debates that took place within continental philosophy in the twentieth century and in particular around the time of Sartre and within his seminal works Examining the return of the problem of subjectivity in philosophy of mind and the idea that phenomenal consciousness could not be reduced to functional or cognitive properties this volume includes twenty-two unique contributions from leading scholars in the field Asking questions such as Why we should think that self-consciousness is non-reflective Is subjectivity first personal Does consciousness necessitate self-awareness Do we need pre-reflective self-consciousness Are ego disorders in psychosis a dysfunction of pre-reflective self-awareness How does the Cartesian duality between body and mind fit into Sartre's conceptions of consciousness

Immanence and Illusion in Sartre's Ontology of Consciousness Caleb Heldt, 2020-07-31 This book is a critical re-evaluation of Jean-Paul Sartre's phenomenological ontology in which a theory of egological complicity and self-deception informing his later better known theory of bad faith is developed This novel reinterpretation offers a systematic challenge to orthodox apprehensions of Sartre's conceptualization of transcendental consciousness and the role that the ego plays within his account of pre-reflective consciousness Heldt persuasively demonstrates how an adequate comprehension of Sartre's theories of negation and reflection can reveal the world as it appears to human consciousness as one in which our reality is capable of becoming littered with illusions As the foundation

upon which the rest of Sartre's philosophical project is built it is essential that the phenomenological ontology of Sartre's early writings be interpreted with clarity This book provides such a reinterpretation In doing so a philosophical inquiry emerges which is genuinely contemporary in its aim and scope and which seeks to demonstrate the significance of Sartre's thought not only as significant to the history of philosophy but to ongoing debates in continental philosophy and philosophy of mind

The Early Sartre and Marxism Sam Coombes, 2008 This work highlights key areas of common ground between the ethical aesthetic and political content of works from Sartre's early period and classic Marxist philosophy Taking account of both the specificity of early Sartrean thought and the heterogeneity of Marxist theories it affirms their lasting importance to the radical left critique

Phenomenology World-Wide Anna-Teresa Tymieniecka, 2014-11-14 Phenomenology is the philosophy of our times Through the entire twentieth century this philosophy unfolded and flourished following stepwise the intrinsic logic and dynamism of its original project as proposed by its founder Edmund Husserl Now its seminal ideas have been handed over to a new era The worldwide contributors to this volume make it manifest that phenomenological inspiration knows no cultural barriers It penetrates and invigorates not only philosophical disciplines but also most of the sectors of knowledge transforming our way of seeing the world our actions toward others and our lives Phenomenology's universal spread has however oftentimes diluted its original sense even beyond recognition and led to a weakening of its dynamics There is at present an urgent need to retrieve the original understanding of phenomenology to awaken its dormant forces and redirect

them This is the aim of the present book resourcement and reinvigoration It is meant to be not only a reference work but also a guide for research and study To restore the authentic vision of phenomenology we propose returning to its foundational source in Husserl's project of a universal science unpacking all its creative capacities In the three parts of this work there are traced the stages of this philosophy's progressive uncovering of the grounding levels of reality ideal structures constitutive consciousness the intersubjective lifeworld and beyond The key concepts and phases of Husserl's thought are here exfoliated Then the thought of the movement's classical figures and of representative thinkers in succeeding generations is elucidated Phenomenology's geographic spread is reviewed We then proceed to the culminating work of this philosophy to the phenomenological life engagements so vigorously advocated by Husserl to the life significant issues phenomenology addresses and to how it has enriched the human sciences Lastly the phenomenological project's new horizons on the plane of life are limned horizons with so powerful a draw that they may be said not to beckon but to summon Here is the movement's vanguard This collection has 71 entries Each entry is followed by a relevant bibliography There is a helpful Glossary of Terms and an Index of Names

Emotions in Medieval Arthurian Literature Frank Brandsma,Carolyn Larrington,Corinne J. Saunders,2015 Analysis of how emotion is pictured in Arthurian legend

[The World-Directedness of Emotional Feeling](#) Jean Moritz Müller,2019-08-19 This book engages with what are widely recognized as the two core dimensions of emotion When we are afraid glad or disappointed we feel a certain way moreover our emotion is intentional or directed at something we are afraid of something glad or disappointed about something Connecting with a vital strand of recent philosophical thinking Müller conceives of these two aspects of emotion as unified Examining different possible ways of developing the view that the feeling dimension of emotion is itself intentional he argues against the currently popular view that it is a form of perception like receptivity to value Müller instead proposes that emotional feeling is a specific type of response to value an affective position taking This alternative conceives of emotional feeling as intimately related to our cares and concerns While situating itself within the analytic philosophical debate on emotion the discussion crucially draws on ideas from the early phenomenological tradition and thinks past the theoretical strictures of many contemporary approaches to this subject The result is an innovative view of emotional feeling as a thoroughly personal form of engagement with value
