Engaging Communities Suzanne Blum Malley,Ames Hawkins,2012-09-03 This book exists is here for you as a resource because we the authors editors of this text Suzanne Blum Malley and Ames Hawkins saw very similar very exciting things happening in our classrooms using ethnographic research methods in our inquiry based first year writing classrooms We have watched our students develop strong voices as writers while also using critical analytical skills and addressing important ideas of ethics identity and representation In our classrooms we have seen a greater level of investment in ethnographic projects than we have seen in more traditional rhetorically based assignments Ethnographic writing by creating a very authentic role for the researcher and a connection to community offers a means to address the alienation and or boredom that many non traditional writers and first year college students feel when confronted with the traditional composition curriculum any curriculum actually More importantly ethnographic research allows students to access what can seem so terribly difficult when framed in other assignments to pursue a line of inquiry rather than a topic to research ethically and to write with authority Though we initially wrote this text with the first year writing classroom in mind we have come to understand that there are many courses that also present students with ethnographic writing assignments These courses may or may not be designed to spend much time on the question of how to get started with these projects In addition instructors might want to supplement the basic methodological approach with their own course content We are also aware that textbook size and cost has exploded in recent years We believe in preserving the internet as an open source space and wish to reinforce our belief with practice As a result of these realizations we have reorganized the project in order to

- 1 Make it relevant and accessible to students in nearly any college classroom who might be assigned an ethnographic writing project
- 2 Allow instructors to supplement the core methodology presented here in Chapters 1 6 as they see fit using any number of Supplemental Modules that offer additional materials lenses and multi modal examples of and for issues and ideas discussed in the core text
- 3 Make it accessible and available via the internet and other technological platforms to students

and instructors everywhere A disclaimer we want to make clear that while we use and invoke methodological principles and practices associated with ethnography we are not claiming Engaging Communities as a text that teaches ethnography as a research methodology This book has been designed to help students most likely undergraduates perhaps high school possibly graduates envision interesting hands on research projects that are eventually converted translated into written text Throughout the text we often use the word ethnographic in order to describe our methodological presentation and theoretical concerns as this term reflects the pedagogical teaching and rhetorical arguing concerns of ethnography rather than the actual disciplinary understanding of the methodology We choose to use to teach this way because ethnographic writing allows for specific discussion regarding how to involve and interest a reader in evoking physical and emotional connection with writing rather than simply becoming informed or persuaded by any specific piece of writing Back cover
