**General** Richard Cantillon, Richard Cantillon is one of the key figures in the early history of economics. He was certainly not the first to think about economic problems but he was the first to have clear insight into the way the economy functions as a system. He was arguably the first to structure a theory of how the economy works. In this sense he could be called the first real economist. Today his ideas on population determination of prices, wages and interest, the role of the entrepreneur, banking and the influence of money supply on the economy are increasingly quoted and appreciated. This is a translation of the *ssai sur la nature du commerce en general*, his only surviving work. It was circulated in manuscript form for many years after his death and was extremely influential, albeit not well known at least throughout the eighteenth century. *Essays on the Nature of Commerce in General* shaped the development of economics through its formative influence on François Quesnay and Adam Smith. It is a cornerstone upon which all subsequent economic theory has been built. Transaction is proud to breathe new life into this classic work as part of its distinguished series in economic theory and history. In his new introduction, Anthony Brewer showcases Cantillon the prophetic thinker for a new generation of readers. This volume's broad-based appeal and great cultural import can no longer afford to be overlooked. Students of economic theory, intellectual historians and sociologists will find this volume indispensable. Richard Cantillon 1680-1734. Little is known about Cantillon except that he was Irish and turned briefly from a successful banking career mainly in France to write one of the most outstanding works in the history of the subject. *L'ssai* Anthony A. Brewer is professor of the history of economics at the University of Bristol. He is on the editorial advisory board of the scholarly journal *History of Political Economy* and has held visiting posts at Duke University and Chuo University, Tokyo. He is the author of *Richard Cantillon: Pioneer of Economic Theory*, *Marxist Theories of Imperialism: A Critical Survey* and *A Guide to Marx's Capital*.

A Review of Economic Theory Edwin Cannan,2016-11-10 Though Cannan in his early years as an economist was a critic of classical economics and an ally of interventionists he moved sharply to the side of classical liberalism in the early 20th century In this book originally published in 1929 Edwin Cannan discussed in comparative terms the general problems of economics and in particular the theories of production value and distribution and the attempts that had been made to solve them Examining key principles of economics in historical terms the author draws his own conclusions only after a full discussion of various viewpoints

A History of Irish Economic Thought Thomas Boylan,Renee Prendergast,John Turner,2013-03-01 For a country that can boast a distinguished tradition of political economy from Sir William Petty through Swift Berkeley Hutcheson Burke and Cantillon through to that of Longfield Cairnes Bastable Edgeworth Geary and Gorman it is surprising that no systematic study of Irish political economy has been undertaken In this book the contributors redress this glaring omission in the history of political economy for the first time providing an overview of developments in Irish political economy from the seventeenth to the twentieth century Logistically this is achieved through the provision of individual contributions from a group of recognized experts both Irish and international who address the contribution of major historical figures in Irish political economy along the analysis of major thematic issues schools of thought and major policy debates within the Irish context over this extended period

**The History of Economic Thought** Steven G Medema,Warren J. Samuels,2013-05-29 From the ancients to the moderns questions of economic theory and policy have been

an important part of intellectual and public debate engaging the attention of some of history's greatest minds. This book brings together readings from more than two thousand years of writings on economic subjects. Through these selections the reader can see first hand how the great minds of past grappled with some of the central social and economic issues of their times and in the process enhanced our understanding of how economic systems function. This collection of readings covers the major themes that have preoccupied economic thinkers throughout the ages including price determination and the underpinnings of the market system, monetary theory and policy, international trade and finance, income distribution and the appropriate role for government within the economic system. These ideas unfold, develop and change course over time at the hands of scholars such as Aristotle, St Thomas Aquinas, John Locke, François Quesnay, David Hume, Adam Smith, Thomas Robert Malthus, David Ricardo, John Stuart Mill, Karl Marx, William Stanley Jevons, Alfred Marshall, Irving Fisher, Thorstein Veblen, John Maynard Keynes, Milton Friedman and Paul Samuelson. Each reading has been selected with a view to both enlightening the reader as to the major contributions of the author in question and to giving the reader a broad view of the development of economic thought and analysis over time. This book will be useful for students, scholars and lay people with an interest in the history of economic thought and the history of ideas generally. 'Economy' in European History Luigi Alonzi, 2022-02-24

Prompted by the linguistic turn of the late 20th century, intellectual and conceptual historians continue to devote a great deal of attention to the study of concepts in history. This innovative and interdisciplinary volume builds on such scholarship by providing a new history of the term economy. Starting from the Greek idea of the law of the household, Luigi Alonzi traces the different meanings assumed by the word economy during the middle ages and early modern era, highlighting the semantic richness of the word and its uses in various political and cultural contexts. Notably, there is a particular focus on the so-called Oeconomica literature, tracking the reception of works by Plato, Aristotle, the pseudo-Aristotle and Xenophon in the Italian and France Renaissance. This tradition was incredibly influential in civic humanism and in texts devoted to power and command and thus affected later debates on Natural Law and the development of new scientific disciplines in the 17th and 18th centuries. In exploring this, the analysis of the function of translations in the transmission and transformation of meanings becomes central. Economy in European History shines much needed light on an important challenge that many historians repeatedly face: the fact that words can and do change over time. It will thus be a vital resource for all scholars of early modern and European economic history. **Essay on the Nature of Commerce** Richard Cantillon, 2017-07-23

The *Essai sur la Nature du Commerce en Général* written between 1730 and 1734 is now printed for the first time in England. It follows the French text of 1755 with all faults of grammar, spelling, accent and punctuation. The imperfections, unimportant in themselves, go far to refute the assertion of some authorities that the *Essai* is a translation, supposed or in other words was composed in French, as it stands.
