Essays In Economics Volume 2 Consumption And Econometrics:

Essays in economics J. Tobin, 1975 In a period marked by revisionism in economic theory and retrenchment in the public goals of economic policy Tobin remains committed to the standard he has upheld throughout his professional life He is an eclectic Keynesian in theory whose socioeconomic concern is to reduce poverty inequality and discrimination through the maintenance of full employment and economic growth and through such policies as the negative income tax and other income transfers These 28 essays covering Tobin's work in macroeconomics from the early 1940s to 1970 are grouped into three parts macroeconomic theory economic growth and money and finance James Tobin is Sterling Professor of Economics at Yale Essays in Economics Volume 3 Theory and Policy was published by The MIT Press in 1982

Consumption and Econometrics, 1975

Essays in Economics James Tobin, 1987-07 Volume 2 of James Tobin's Essays in Economics brings together twenty papers published between 1940 and 1972 These cover macroeconomics particularly the theory of the relationship between unemployment and inflation and the dilemma their connection poses for policy consumption function which is also related to macroeconomic theory and to the theory of individual behavior consumer theory and statistical method applied to the problem of rationing and the development and application of econometric methods suitable for the empirical analysis of consumer behavior James Tobin received the Nobel Prize in 1981 and is Sterling Professor of Economics at Yale Essays in Economics Volume 1 Macroeconomics and Volume 3 Theory and Policy are both available from The MIT Press

Essays in Economics James Tobin, 1987 Volume 2 of James Tobin's Essays in Economics brings together twenty papers published between 1940 and 1972 These cover macroeconomics particularly the theory of the relationship between unemployment and inflation and the dilemma their connection poses for policy consumption function which is also related to macroeconomic theory and to the theory of individual behavior consumer theory and statistical method applied to the problem of rationing and the development and application of econometric methods suitable for the empirical analysis of consumer behavior James Tobin received the Nobel Prize in 1981 and is Sterling Professor of Economics at Yale Essays in Economics Volume 1 Macroeconomics and Volume 3 Theory and Policy are both available from The MIT Press

A History of Macroeconomics from Keynes to Lucas and Beyond Michel De Vroey, 2016-01-07 This book retraces the history of macroeconomics from Keynes's General Theory to the present Central to it is the contrast between a Keynesian era and a Lucasian or dynamic stochastic general equilibrium DSGE era each ruled by distinct methodological standards In the Keynesian era the book studies the following theories Keynesian macroeconomics monetarism disequilibrium macroeconomics Patinkin Leijonhufvud and Clower non Walrasian equilibrium models and first generation new Keynesian models Three stages are identified in the DSGE era new classical macroeconomics Lucas RBC modelling and second generation new Keynesian modeling The book also examines a few selected works aimed at presenting alternatives to Lucasian macroeconomics While not eschewing analytical content Michel De Vroey focuses on substantive assessments and

the models studied are presented in a pedagogical and vivid yet critical way *The Nobel Memorial Laureates in Economics*
Howard R. Vane, Chris Mulhearn, 2005 this book will continue to share shelf space next to my current textbooks As a librarian such utility makes this a desirable addition to any educator's collection As a history of economic thought book Vane and Mulhearn have brought together a breadth of information that can be found through disparate sources but at a cost of effort and especially for students qualitative decisions regarding sources The convenience of their starting methodology breadth over depth coverage and clear intention of writing to an audience of students makes this a useful text Kirk Douglas Johnson *Journal of the History of Economic Thought* The essays summarizing the main achievements of the prize winners are well written and to the point They are short enough that they never cause the reader to lose interest but substantive enough to let you know what the winners' accomplishments amount to These compact factually accurate essays mark the real value of the book as a reference work there is little for which to fault the authors Vane and Mulhearn have done a very nice job with the book and it is an added bonus that it includes a formal portrait photograph of each prize winner Bradley W Bateman *History Political Economy* Vane and Mulhearn have produced a useful reference work John Quiggin *Economic Analysis and Policy* This collection has the capacity to surprise the reader You learn all sorts of new and sometimes admirable things about these economists and about the richness of the profession that is often obscured from students of the subject John Lodewijks *History of Economics Review* This volume provides a non technical description of the main published works of every Nobel Memorial Economics winner from the first annual award in 1969 to 2004 This is a reference book par excellence it will interest not only those having some involvement with economics past or present but it should also attract more general readers wanting to unravel some of the mysteries surrounding economics and economists *Economic Outlook and Business Review* Vane and Mulhearn have produced an introduction to the careers and major publications of the 55 economists awarded the Bank of Sweden Prize in Economic Sciences in Memory of Alfred Nobel between 1969 and 2004 The short essays on each economist are readable and accurate they provide a discussion of the subjects major contributions and an introduction to the secondary literature often with the outstanding reports on the laureates work provided to the Economic Prize Committee of the Royal Swedish Academy of Sciences The collection is introduced with a review of the prize and the common characteristics of the winners thus far all neatly summarized in a table with each laureate's year and country of birth university year of first and higher degrees affiliation at the time of the award field of study and a summary citation This volume provides a very useful introduction to the development of economic ideas in the last three quarters of the 20th century Highly recommended D E Moggridge *Choice* Every serious research economist will want to have a look at this comprehensive work Edwin Burmeister *Research Professor of Economics Duke University US* The award of the Nobel Prize has for more than thirty years been economists way of informing the public at large about what work most of them think is important and about who has done it Anyone seeking to understand the development of recent economic ideas and the

profession that has created them must deal with the Prize's history and Vane and Mulhearn have provided an indispensable guide to it brief readable and accurate David Laidler Professor Emeritus and Bank of Montreal Professor University of Western Ontario Canada This is a splendid account of the personal stories of the Nobel Laureates in Economics the diversity of practice of recent economists and perhaps above all the nature of

East Asian Economic Issues, Vol 3 Donghyun Park, Jon D Kendall, Randolph Gee Kwang Tan, 1997-11-29 This book is a compilation of papers written jointly by the staff and students of the Applied Economics Division of the Nanyang Business School It is unique in that all the works included are the result of an extensive equal and mutually beneficial collaboration between the students and staff At the same time they embody the highest level of technical and analytical rigor and will be immensely relevant and useful to readers interested in East Asian economic issues In particular this volume will prove valuable for anyone interested in both the microeconomic and macroeconomic developments affecting Singapore and ASEAN

Key Thinkers on Development David Simon, 2019-04-02 Since its publication in 2006 as *Fifty Key Thinkers on Development* this invaluable reference has established itself as the leading biographical handbook in its field providing a concise and accessible introduction to the lives and key contributions of development thinkers from across the ideological and disciplinary spectrum This substantially expanded and fully updated second edition in the relaunched series without the numerical constraint includes an additional 24 essays filling in many gaps in the original selection greatly improving the gender balance and diversifying coverage to reflect the evolving landscape of development in theory policy and practice It presents a unique guide to the lives ideas and practices of leading contributors to the contested terrain of development studies and development policy and practice Its thoughtful essays reflect the diversity of development in theory policy and practice across time space disciplines and communities of practice Accordingly it challenges Western centrism Orientalism and the like while also demonstrating the enduring appeal of development in different guises David Simon has assembled a highly authoritative team of contributors from different backgrounds regional settings and disciplines to reflect on the lives and contributions of leading authorities on development from around the world These include Modernisers like Kindleberger Perroux and Rostow Dependencistas such as Frank Furtado Cardoso and Amin Progressives and critical modernists like Hirschman Prebisch Helleiner Sen Streeten and Wang Political leaders enunciating radical alternative visions of development such as Mao Nkrumah and Nyerere Progenitors of religiously or spiritually inspired development such as Gandhi Ariyaratne and Vivekananda Development environment thinkers like Agarwal Blaikie Brookfield Ostrom and Sachs International institution builders like Singer Hammarskjöld Kaul and Ul Haq Anti and post development thinkers and activists like Escobar Ghosh Quijano and Roy *Key Thinkers on Development* is therefore the essential handbook on the world's most influential development thinkers and an invaluable guide for students of development and sustainability policy makers and practitioners seeking an accessible overview of this diverse field and its leading voices

Fifty Key Thinkers on Development David Simon, 2006 The essential guide to the world's most influential development

thinkers this authoritative text presents a unique guide to the lives and ideas of leading contributors to the contested terrain of development studies Reflecting the diverse interdisciplinary nature of the area the book includes entries on modernisers like Hirshman Kindleberger and Rostow dependencistas such as Frank Cardoso and Amin progressives like Prebisch Helleiner and Streeten political leaders enunciating radical alternative visions of development such as Mao Nkrumah and Nyerere progenitors of religiously or spiritually inspired development such as Gandhi and Ariyaratne development environment thinkers like Blaikie Brookfield and Shiva This is a fascinating and readable introduction to the major figures that have shaped the field ideal for anyone studying or working in the area Interactions in Analytical Political Economy Mark Setterfield,2019-07-23 In this interactive collection of essays many of the leading proponents of analytical political economy examine major macroeconomic issues through the integration of mathematical analysis and non neoclassical economic theory The topics covered include the macroeconomics of the labor market open economy issues economic growth and macroeconomic policy The chapter comment reply format of the book creates a genuine dialogue on each theme and evokes a sense of unfolding debate which draws the reader into the discussion **East Asian Economic Issues** Jon D. Kendall,Donghyun Park,Randolph Tan,1997 This book is a compilation of papers written jointly by the staff and students of the Applied Economics Division of the Nanyang Business School It is unique in that all the works included are the result of an extensive equal and mutually beneficial collaboration between the students and staff At the same time they embody the highest level of technical and analytical rigor and will be immensely relevant and useful to readers interested in East Asian economic issues In particular this volume will prove valuable for anyone interested in both the microeconomic and macroeconomic developments affecting Singapore and ASEAN *New Palgrave Series In Economics Money* John Eatwell,Murray Milgate,Peter Newman,1989 First published in the New Palgrave a dictionary of economics in four volumes 1987 T p verso Includes bibliographical references Economic Thought Since Keynes Michel Beaud,Gilles Dostaler,2005-09-27 Economic Thought Since Keynes provides a concise overview of changing economic thought in the latter part of the twentieth century Offering a concise biography of 150 influential economists since Keynes it is an invaluable reference tool China's Grain Economy Liming Wang,John Davis,2019-06-03 This book was originally published in 2000 China is the largest developing country in the world and is still heavily based on agriculture Currently about 70 per cent of China s total of more than one billion people live in rural areas and about half of the total national labour force is involved in agricultural activities It is clear that agriculture is the foundation for the development of the Chinese national economy Within agriculture the grain economy is the most important sector indeed it has been recognised as a treasure in managing the country by all past Chinese dynasties Ensuring enough grain supply to meet the demands of such a huge population seems to be a long term goal for the Chinese government and this book explores whether China will be able to produce enough grain to keep pace with its population increases **The Economics of Saving** James H. Gapinski,2013-03-09 This

book began when a letter reached my desk in November 1989 Written by Warren Samuels professor of economics at Michigan State University and editor for Kluwer Academic Publishers the letter reviewed the philosophy behind Kluwer's series on recent economic thought and accordingly expressed interest in the controversies that surround contemporary topics in the discipline It graciously went on to invite me to organize consonant with that philosophy a volume of chapters on saving Soon thereafter I learned that the chapters were to be original compositions I also learned that I would have substantial flexibility in structuring the volume and in recruiting contributors who logically would be authorities in the field Succinctly Samuels was inviting me to work with leading scholars in exploring the current controversies in saving one of my favorite subjects That invitation was simply too tempting to refuse Preparation of the book's outline went smoothly It was obvious that the statistics of saving should be covered along with the theories of saving It was equally obvious that special issues must be addressed Ricardian Equivalence supply side doctrine and economic development among others These themes should be handled so as to bring out the ideological tensions in the profession and that criterion helped to shape the list of potential contributors That is both sides of a conflict should be represented and both should be given the same treatment

Asian Economic and Political Issues Frank H. Columbus, 1998 It is predicted by some observers that the 21st century will be remembered as the Asian Century Many of the countries in the region seem to be able to take the economic and trade baton when one of the others experience problems The region in general continues to grow economically politically and militarily The articles presented in this book examine the current political and economic situations in nations across Asia particularly focusing on economic developments Contents Preface The Challenge of Removing Administrative Barriers to FDI in China Negative Externality Tacit Bargaining and Cigarette Demand The Case of Environmental Tobacco Smoke in Japan Modelling Development Control of Residential Development A Probit Analysis of Rent Seeking and Policy Autonomy in Town Planning in Hong Kong Social Capital Does it Pay The Institutional Impact on Conditions and Consequences of Access to Social Capital the Case of the Former GDR The Role of Foreign Investment in Guangdong's Economic Development Natural Disasters and Long run Economic Growth in Asia and Around the World The Role of Urban Policy in the Battle against Poverty The Experience of the Philippines

Mainstream Growth Economists and Capital Theorists Marin Muzhani, 2014-06-01 Mainstream Growth Economists and Capital Theorists provides a historical survey and ideal introduction to modern economics arguing that due to significant changes in recent years a re-evaluation is in order Marin Muzhani presents an informed study of the debates regarding economic growth and development that began in the 1930s in response to the Great Depression He argues that in the wake of that crisis the challenge for economists was to understand how to generate stable economic growth in order to prevent future crises The theories of John Maynard Keynes in particular sought to explain the reasons for unemployment and recessions paving the way for the field of macroeconomics and challenging the basic premises of neoclassical economics In the late 1930s and 1940s economists began to extend Keynes

ideas synthesizing them with neoclassical ideas in order to explain economic growth This neoclassical synthesis would dominate mainstream macroeconomic thought for the next forty years until the mid 1980s with the introduction of endogenous growth theories Taking into account the historical background the multitude of interpretations of modern growth models and the geography of mainstream economists Mainstream Growth Economists and Capital Theorists will simplify the structure of growth theory for the next generation of economists *The Journal of Finance*, 1978 Publishes across all the major fields of financial research The most widely cited academic journal on finance and one of the most widely cited journals in economics as well

Economic Literacy and Money Illusion Helena Chytilova, 2017-07-14 The concept of money illusion a recently resurrected phenomenon of behavioral economics is a real fact of economic life the potential role of which should no longer be dismissed Despite money illusion being utterly suppressed by mainstream economists small deviations from rationality together with trends in behavioral economics alleviate the denial of money illusion induced by the rational expectations revolution This book argues that money illusion seems to be a ubiquitous phenomenon affecting various areas such as financial markets housing markets labor markets consumption saving decisions and even development at the aggregate level induced by coordination issues Furthermore in light of the educational efforts of central banks and other institutions it is worth considering whether solid economic training would provide guidance for the public regarding their decision making and thereby alleviate the effects of money illusion The emerging field of experimental economics provides a unique opportunity for us to verify the presence of money illusion Specifically attention is devoted to the experimental investigation of reduction in the direct and indirect effects of money illusion with respect to the level of economic literacy acquired through economic education Economic Literacy and Money Illusion will be of interest to the general audience and to those who are interested in behavioral economics economics education and experimental economics as well as to policy makers and institutions Last but not least it will help develop students interest in alternative economic theories NB The research and writing of this book was made possible with the support of the University of Economics Prague Faculty of Economics Department of Economics

James Tobin, Franco Modigliani, Finn E. Kydland and Edward C. Prescott James Tobin, 2010 The editors have organised this comprehensive series by theme and each volume focuses on those Laureates working in the same broad area of study The careful selection of papers within each volume is set in context by an insightful introduction to the Laureates careers and main published works
