Essays In Linguistic Ontology:

Essays in Linguistic Ontology Jack Kaminsky, 1982 Metaphysical questions relating to what exists do not seem to fade away notes Jack Kaminsky in this book which takes as its starting point the Quinian view that we determine what exists by means of the formal systems we construct to explain the world This starting point Kaminsky points out is not novel philosophers have often tried to construct formal systems and from these systems they have been able to deduce what can be said to exist Contemporary formal systems are different from earlier ones however because they make more extensive use of the results of linguistics logic and mathematics studies But these contemporary formal systems also must state eventually what their commitments to existence are and they must be able to show their commitments to be free of paradox ambiguity and contradiction Given these conditions Kaminsky examines the difficulties inherent in the existence claims of contemporary formal language systems To do this he uses only a minimum of the technical elements of propositional and first order quantificational logic He concludes many existential commitments are relative to the formal systems of time some commitments seem to be absolute and some problems those relating to vacuous terms arise only because no distinction is made between humanly constructed objects and naturally constructed objects

Comparative Essays in Early Greek and Chinese Rational Thinking Jean-Paul Reding, 2017-03-02 This collection of essays by Reding in the emergent field of Sino Hellenic studies explores the neglected inchoative strains of rational thought in ancient China and compares them to similar themes in ancient Greek thought right at the beginnings of philosophy in both cultures Reding develops and defends the bold hypothesis that Greek and Chinese rational thinking are one and the same phenomenon Rather than stressing the extreme differences between these two cultures as most other writings on these subjects Reding looks for the parameters that have to be restored to see the similarities Reding maintains that philosophy is like an unknown continent discovered simultaneously in both China and Greece but from different starting points The book comprises seven essays moving thematically from conceptual analysis logic and categories to epistemology and ontology with an incursion in the field of comparative metaphorology One of the book's main concerns is a systematic examination of the problem of linguistic relativism through many detailed examples

The Language of Ontology J. T. M. Miller, 2021-06-10 Metaphysical and ontological debates concerning what exists and the nature of reality are perennial features of the philosophical landscape However some have argued that ontological debates are non substantive pointless trivial incoherent or impossible Debates about whether tables exist for example or about the nature of reality are taken to be in some way deficient This has led to a burgeoning literature studying the nature of metaphysical and ontological disputes themselves One major debate within this context concerns the language of ontology The central question is whether the nature of language influences or limits our ability to engage productively in ontological disputes While we typically think that our language describes the world or at least can accurately describe the world there have been many who have argued that the nature of language inherently influences and limits our

attempts to understand the nature of reality that our claims about what exists are in fact merely a reflection of how we happen to speak or think

The Language of Ontology collects chapters from established participants in the debate alongside new voices to explore the range of issues relating to our ability or inability to get beyond the limits of our language

The Question of Linguistic Idealism, 2025-02-24

The chapters in this volume address the question to what extent the doctrine of linguistic idealism is coherent and plausible

Linguistic idealism as defined here holds that both the existence and the very general structure of the world are in some sense dependent on the existence and the structure of language

The interest of the thesis is that since human language is an evolved empirical phenomenon it would be surprising and significant if the world which existed long before human beings came into being and is in many respects quite obviously independent of them were somehow beholden to the fact that human beings can talk about it

That nevertheless is the claim

Much of the discussion of linguistic idealism revolves around making the definition of it both precise and interesting whether for purposes of attack or defence

The Question of Linguistic Idealism opens with an introduction that presents a general argument for linguistic idealism and examines the way in which that position figures in the writings of Ludwig Wittgenstein and Elizabeth Anscombe

The authors in this collection cover a wide range of possible approaches to linguistic idealism

Some support the position in one version or another others are hostile

All the contributions are both historically aware and engaged with systematic considerations but in some the emphasis is placed on historical aspects of the problem here the focus is particularly on the writings of Kant and Wittgenstein whereas others adopt a more systematic approach

Each philosopher addresses their chosen aspect of the general topic in broadly speaking metaphysical terms but the bearing of modern linguistic theory on the thesis of linguistic idealism as well as its connections with mathematical results and practice play a role in some of the contributions as well

Thought, Language, and Ontology

Francesco Orilia, W.J. Rapaport, 2012-12-06

The late Hector Neri Castañeda the Mahlon Powell Professor of Philosophy at Indiana University and founding editor of *Noûs* has deeply influenced current analytic philosophy with diverse contributions including guise theory the theory on indicators and quasi indicators and the proposition practition theory

This volume collects 15 papers for the most part previously unpublished in ontology philosophy of language cognitive science and related areas by ex students of Professor Castañeda most of whom are now well known researchers or even distinguished scholars

The authors share the conviction that Castañeda's work must continue to be explored and that his philosophical methodology must continue to be applied in an effort to further illuminate all the issues that he so deeply investigated

The topics covered by the contributions include intensional contexts possible worlds quasi indicators guise theory property theory Russell's substitutional theory of propositions event theory the adverbial theory of mental attitudes existentialist ontology and Plato's Leibniz's Kant's and Peirce's ontologies

An introduction by the editors relates all these themes to Castañeda's philosophical interests and methodology

Philosophical Essays, Volume 1

Scott Soames, 2009

The two volumes of *Philosophical Essays* bring together the most important essays written by one of the

world's foremost philosophers of language Scott Soames has selected thirty one essays spanning nearly three decades of thinking about linguistic meaning and the philosophical significance of language A judicious collection of old and new these volumes include sixteen essays published in the 1980s and 1990s nine published since 2000 and six new essays The essays in Volume 1 investigate what linguistic meaning is how the meaning of a sentence is related to the use we make of it what we should expect from empirical theories of the meaning of the languages we speak and how a sound theoretical grasp of the intricate relationship between meaning and use can improve the interpretation of legal texts The essays in Volume 2 illustrate the significance of linguistic concerns for a broad range of philosophical topics including the relationship between language and thought the objects of belief assertion and other propositional attitudes the distinction between metaphysical and epistemic possibility the nature of necessity actuality and possible worlds the necessary a posteriori and the contingent a priori truth vagueness and partial definition and skepticism about meaning and mind The two volumes of Philosophical Essays are essential for anyone working on the philosophy of language

Essays on Being Charles H. Kahn, 2009-02-19 This volume presents a series of essays published by Charles Kahn over a period of forty years in which he seeks to explicate the ancient Greek concept of Being He addresses two distinct but intimately related problems one linguistic and one historical and philosophical The linguistic problem concerns the theory of the Greek verb *einai* to be how to replace the conventional but misleading distinction between copula and existential verb with a more adequate theoretical account The philosophical problem is in principle quite distinct to understand how the concept of Being became the central topic in Greek philosophy from Parmenides to Aristotle But these two problems converge on what Kahn calls the veridical use of *einai* In the earlier papers he takes that connection between the verb and the concept of truth to be the key to the central role of Being in Greek philosophy In the later papers he interprets the veridical in terms of a more general semantic function of the verb which comprises the notions of existence and instantiation as well as truth

Merleau-Ponty's Last Vision Douglas Beck Low, 2000 Few writers unfinished works are considered among their most important but such is the case with Merleau Ponty's *The Visible and the Invisible* What exists of it is a mere beginning yet it bridged modernism and postmodernism in philosophy Low uses material from some of Merleau Ponty's later works as the basis for completion Working from this material and the philosopher's own outline Low presents how this important work would have looked had Merleau Ponty lived to complete it

The Routledge Handbook of Philosophy of Relativism Martin Kusch, 2019-12-06 Relativism can be found in all philosophical traditions and subfields of philosophy It is also a central idea in the social sciences the humanities religion and politics This is the first volume to map

relativistic motifs in all areas of philosophy synchronically and diachronically It thereby provides essential intellectual tools for thinking about contemporary issues like cultural diversity the plurality of the sciences or the scope of moral values The Routledge Handbook of Philosophy of Relativism is an outstanding major reference source on this fundamental topic The 57 chapters by a team of international contributors are divided into nine parts Relativism in non Western philosophical traditions Relativism in Western philosophical traditions Relativism in ethics Relativism in political and legal philosophy Relativism in epistemology Relativism in metaphysics Relativism in philosophy of science Relativism in philosophy of language and mind Relativism in other areas of philosophy Essential reading for students and researchers in all branches of philosophy this handbook will also be of interest to those in related subjects such as politics religion sociology cultural studies and literature

Theological Essays Eberhard Jüngel, 2014-11-20 Eberhard Jüngel is widely recognised as one of the most important and original theologians of the twentieth century Although his essays comprise some of his best critical and constructive writing few have been available in English These eight essays have been carefully chosen to illustrate the wide range of Jüngel's current concerns the ontological implications of the doctrine of justification the nature of metaphorical and anthropomorphic language theological anthropology Christology and ecclesiology and natural theology

Substantive Perspectivism: An Essay on Philosophical Concern with Truth Bo Mou, 2009-09-16 I have been thinking about the philosophical issue of truth for more than two decades It is one of several fascinating philosophical issues that motivated me to change my primary reflective interest to philosophy after receiving BS in mathematics in 1982 Some serious academic work in this connection started around the late eighties when I translated into Chinese a dozen of Donald Davidson's representative essays on truth and meaning and when I assumed translator for Adam Morton who gave a series of lectures on the issue in Beijing 1988 which was co sponsored by my then institution Institute of Philosophy Chinese Academy of Social Science I have loved the issue both for its own sake as one specific major issue in the philosophy of language and metaphysics and for the sake of its significant involvement in many philosophical issues in different subjects of philosophy Having been attracted to the analytic approach I was then interested in looking at the issue both from the points of view of classical Chinese philosophy and Marxist philosophy two major styles or frameworks of doing philosophy during that time in China and from the point of view of contemporary analytic philosophy which was then less recognized in the Chinese philosophical circle

An Essay on Names and Truth Wolfram Hinzen, 2007-10-11 This book lays new foundations for the study of reference and truth It explores truth in the light of Noam Chomsky's Minimalist Program and argues that truth is a function of the human mind It sets out an internalist reconstruction of meaning and explores its outcomes in language and thought

Language and World Richard Gaskin, 2020-07-06 This book defends a version of linguistic idealism the thesis that the world is a product of language In the course of defending this radical thesis Gaskin addresses a wide range of topics in contemporary metaphysics philosophy of language philosophical logic and syntax theory Starting from the context and

compositionality principles and the idea of a systematic theory of meaning in the Tarski Davidson tradition Gaskin argues that the sentence is the primary unit of linguistic meaning and that the main aspects of meaning sense and reference are themselves theoretical posits Ontology which is correlative with reference emerges as language driven This linguistic idealism is combined with a realism that accepts the objectivity of science and it is accordingly distinguished from empirical pragmatism Gaskin contends that there is a basic metaphysical level at which everything is expressible in language but the vindication of linguistic idealism is nuanced inasmuch as there is also a derived level asymmetrically dependant on the basic level at which reality can break free of language and reach into the realms of the unnameable and indescribable Language and World will be of interest to scholars and advanced students working in metaphysics philosophy of language and linguistics

The Routledge Handbook of Metametaphysics Ricki Bliss, J.T.M. Miller, 2020-07-14 Philosophical questions regarding the nature and methodology of philosophical inquiry have garnered much attention in recent years Perhaps nowhere are these discussions more developed than in relation to the field of metaphysics The Routledge Handbook of Metametaphysics is an outstanding reference source to this growing subject It comprises thirty eight chapters written by leading international contributors and is arranged around five themes The history of metametaphysics Neo Quineanism and its objectors Alternative conceptions of metaphysics The epistemology of metaphysics Science and metaphysics Essential reading for students and researchers in metaphysics philosophical methodology and ontology The Routledge Handbook of Metametaphysics will also be of interest to those in closely related subjects such as philosophy of language logic and philosophy of science

Event Structures in Linguistic Form and Interpretation Johannes Dölling, Tatjana Heyde-Zybatow, Martin Schäfer, 2013-12-06 This volume addresses the problem of how language expresses conceptual information on event structures and how such information can be reconstructed in the interpretation process The papers present important new insights into recent semantic and syntactic research on the topic The volume deals with the following problems in detail event structure and syntactic construction event structure and modification event structure and plurality event structure and temporal relation event structure and situation aspect and event structure and language ontology Importantly the topic is discussed not only on the basis of English and German but on the basis of other languages including Mandarin Japanese Korean Indonesian and Igbo as well This volume thus provides solid evidence towards clarifying the empirical use of event based analyses

Automated Essay Scoring Beata Beigman Klebanov, Nitin Madnani, 2022-05-31 This book discusses the state of the art of automated essay scoring its challenges and its potential One of the earliest applications of artificial intelligence to language data along with machine translation and speech recognition automated essay scoring has evolved to become both a revenue generating industry and a vast field of research with many subfields and connections to other NLP tasks In this book we review the developments in this field against the backdrop of Elias Page's seminal 1966 paper titled The Imminence of Grading Essays by Computer Part 1 establishes what automated essay scoring is

about why it exists where the technology stands and what are some of the main issues In Part 2 the book presents guided exercises to illustrate how one would go about building and evaluating a simple automated scoring system while Part 3 offers readers a survey of the literature on different types of scoring models the aspects of essay quality studied in prior research and the implementation and evaluation of a scoring engine Part 4 offers a broader view of the field inclusive of some neighboring areas and Part ref part5 closes with summary and discussion This book grew out of a week long course on automated evaluation of language production at the North American Summer School for Logic Language and Information NASSLLI attended by advanced undergraduates and early stage graduate students from a variety of disciplines Teachers of natural language processing in particular will find that the book offers a useful foundation for a supplemental module on automated scoring Professionals and students in linguistics applied linguistics educational technology and other related disciplines will also find the material here useful
