Essays, 1958-1962, 1963 **Young Adult Reader's Adviser** Marion Sader, 1992-01-30 The best in literature and language arts mathematics and computer science Books in Series, 1876-1949 R.R. Bowker Company, 1982 Books in Series, 1985 Vols for 1980 issued in three parts Series Authors and Titles **Essays Nineteen Hundred and Fifty-eight 1958 - 1962 on Atomic Physics and Human Knowledge** Niels Bohr, 1963 Books in Print, 1994 **The Golden Age of Philosophy of Science 1945 to 2000** John Losee, 2018-12-27 This book offers the reader a guide to the major philosophical approaches to science since World War Two Considering the bases arguments and conclusions of the four main movements Logical Reconstructionism Descriptivism Normative Naturalism and Foundationalism John Losee explores how philosophy has both shaped and expanded our understanding of science The volume features major figures of twentieth century science and engages with the work of previous philosophers of science including Norman Campbell Rudolf Carnap Ernest Nagel Karl Popper Richard Dawkins and John Worrall In particular The Golden Age of Philosophy of Science 1945 to 2000 aims to answer the following questions How should competing philosophies of science be evaluated Should philosophy of science be a prescriptive discipline Can philosophy of science achieve normative status without designating trans historical evaluative principles And finally how can understanding the history of science aid us in analyzing the philosophy of science In answering these questions this book shows us why we understand science the way we do The Golden Age of Philosophy of Science 1945 to 2000 is essential reading for students and researchers working in the history and philosophy of science Niels Bohr and the Philosophy of Physics Jan Faye, Henry Folse, 2017-10-19 Niels Bohr and Philosophy of Physics Twenty First Century Perspectives examines the philosophical views influences and legacy of the Nobel Prize physicist and philosophical spokesman of the quantum revolution Niels Bohr The sixteen contributions in this collection by some of the best contemporary philosophers and physicists writing on Bohr s philosophy today all carefully distinguish his subtle and unique interpretation of quantum mechanics from views often imputed to him under the banner of the Copenhagen Interpretation With respect to philosophical influences on Bohr s outlook the contributors analyse prominent similarities between his viewpoint and Kantian ways of thinking the views of the Danish philosopher Harald H ffding and themes characteristic of American pragmatism In recognizing the importance of Bohr s epistemological naturalism they examine his defence of the indispensability of classical concepts from a variety of different perspectives This collection shows us that Bohr s interpretation of quantum mechanics now nearly a century old still has the power to shed light on a variety of issues that have arisen only since his lifetime as well as decoherence theory and other non collapse interpretations Balancing historical themes with contemporary discussions Niels Bohr and the Philosophy of Physics establishes Bohr s on going contribution to the philosophy of physics and examines his place in the history of philosophy **Paperbound Books in Print**, 1992 *Scientific and Technical Books and Serials in Print*, 1989 **Scientific and Technical Books in Print**, 1972

 Reed, 1995-12 **Subject Guide to Books in Print**, 1996 **Quantum Theory of Near-Field Electrodynamics** Ole
 Keller, 2012-02-02 Quantum Theory of Near field Electrodynamics gives a self contained account of the fundamental theory of
 field matter interaction on a subwavelength scale The quantum physical behavior of matter atoms and mesoscopic media in
 both classical and quantum fields is treated The role of local field effects and nonlocal electrodynamics and the tight links to
 the theory of spatial photon localization are emphasized The book may serve as a reference work in the field and is of general
 interest for physicists working in quantum optics mesoscopic electrodynamics and physical optics The macroscopic and
 microscopic classical theories form a good starting point for the quantum approach and these theories are presented in a
 manner appropriate for graduate students entering near field optics **American Book Publishing Record Cumulative,**

Mechanics Versus Local Realism F. Selleri, 2013-06-29 If you have two small objects one here on Earth and the other on
 the planet Pluto what would you say of the following statement No modification of the properties of the object on the earth
 can take place as a consequence of an interaction of the distant object with a third body also located on Pluto The opinion
 that the previous statement is correct is very natural but modern quantum theory implies that it must be wrong in certain
 cases Consider in fact two arbitrary objects separated by such a large distance that they are unable to exert any important
 mutual influence It is possible to show rigorously that a measurable physical quantity exists with a value more than 40%
 different from the value theoretically predicted by quantum mechanics Necessarily then either space is largely an illusion of
 our senses and it does not exist objectively or information can be sent from the future to the past or something important has
 to be changed in modern physics This is the essence of the Einstein Podolsky Rosen EPR paradox A paradox is an argument
 that derives absurd conclusions by valid deduction from acceptable premises In the case of the EPR paradox the absurd
 conclusion is that Bell's observable should have two different values and The acceptable premises are the following 1
 All the empirical predictions of the existing quantum theory are correct **Niels Bohr** Paul McEvoy, 2001 This is a detailed
 study of Niels Bohr's work on an epistemological foundation for 20th century physics The connections he drew between
 physics language and philosophy are traced historically and their validity is analyzed in the light of contemporary science
 Philosophy **Philosophy, Religion, and the Coming World Civilization** L.S. Rouner, 2012-12-06 Gabriel Marcel
 reminds me that I asked him to write for this book This is quite true but not the whole story During the visit with Ernest
 Hocking which he describes so eloquently in his essay Solipsism Surmounted he learned from Hocking's hostess Elizabeth
 Hazard that I was planning hopefully for a Hocking Festschrift On his return to Harvard where he was preparing his James
 Lectures he wrote me offering an essay should these plans develop Encouraged I kept his letter while I moved my family to

India and settled into a new job When it was possible to begin work on the book in earnest I then made my request reminding him of his original offer I mention this because I discovered that his enthusiasm was to be typical of those who came to know about the project Charles Moore commented that such a book was long overdue and Walter Stace spoke for us all when he said I am sure that there is no one in our profession who would not wish to be associated with any project in his honor Given the wide range of Hocking s interests and influence it was difficult to know just how the volume should be organized
