Donald Davidson
Essays on Actions and Events

Kirk Ludwig

Introduction

Essays on Actions and Events (Davidson 2001a, henceforth EAE) brings together seminal papers by Donald Davidson, one of the most influential philosophers in the analytic tradition in the latter half of the twentieth century, in the areas of the philosophy of action, the metaphysics of events and the philosophy of psychology. Davidson's central contributions to philosophy are presented in EAE and its companion volume *Inquiries into Truth and Interpretation* (Davidson 2001b), which deals with issues in the theory of meaning and philosophy of language.¹ The fifteen essays collected in EAE² are divided into three groups: "Intention and Action", "Event and Cause" and "Philosophy of Psychology". The first deals with the nature of agency, action and action explanation. The central theme is that actions are events – bodily movements – caused and explained by reasons, construed as beliefs and desires, which make sense of the action from the point of view of the agent. The second deals with the metaphysics of events, which Davidson argues are dated particulars and part of the metaphysics of ordinary language. The third deals with issues in the philosophy of mind, principally the relation of the mental to the physical, and features Davidson's celebrated thesis of anomalous monism, according to which each mental event is identical to some physical event, although there are no strict laws connecting the mental with the physical. This essay surveys the central contributions of EAE, giving most attention to the work in the philosophy of action, which is connected with and prefigures the work in the latter two parts of EAE.

Essays On Actions And Events

Christopher Belshaw, Gary Kemp

Essays On Actions And Events:

Essays on Actions and Events Donald Davidson, 2001-09-27 Donald Davidson has prepared a new edition of his classic 1980 collection of Essays on Actions and Events including two additional essays Essays on Davidson Bruce Vermazen, Merrill B. Hintikka, 1986 This collection brings together previously unpublished works by well known philosophers on the philosophy of action the metaphysics of causality and the philosophy of psychology Nine of the essays directly discuss Donald Davidson s work on these topics while three others challenge a Davidsonian approach through discussion of independent but related issues These essays are followed by replies from Davidson including a previously unpublished essay Adverbs of Action *Essays on Actions and Events* Donald Davidson, 2001-09-27 Donald Davidson has prepared a new edition of his classic 1980 collection of Essays on Actions and Events including two additional essays In this seminal investigation of the nature of human action Davidson argues for an ontology which includes events along with persons and other objects Certain events are identified and explained as actions when they are viewed as caused and rationalized by reasons these same events when described in physical biological or physiological terms may be explained by appeal to natural laws The mental and the physical thus constitute irreducibly discrete ways of explaining and understanding events and their causal relations Among the topics discussed are freedom to act weakness of the will the logical form of talk about actions intentions and causality the logic of practical reasoning Hume s theory of the indirect passions and the nature and limits of decision theory The introduction cross references and appendices emphasize the relations between the essays and explain how Davidson s views have developed Essays on Actions and Events, 2nd Edition , **Theism and Explanation** Gregory W. Dawes, 2012-09-10 In this timely study Dawes defends the methodological naturalism of the sciences Though religions offer what appear to be explanations of various facts about the world the scientist as scientist will not take such proposed explanations seriously Even if no natural explanation were available she will assume that one exists Is this merely a sign of atheistic prejudice as some critics suggest Or are there good reasons to exclude from science explanations that invoke a supernatural agent On the one hand Dawes concedes the bare possibility that talk of divine action could constitute a potential explanation of some state of affairs while noting that the conditions under which this would be true are unlikely ever to be fulfilled On the other hand he argues that a proposed explanation of this kind would rate poorly when measured against our usual standards of explanatory virtue **Donald Davidson** Kirk Ludwig, 2003-07-28 Donald Davidson has been one of the most influential figures on modern analytic philosophy and has made seminal contributions in a wide range of subjects philosophy of language philosophy of action philosophy of mind epistemology metaphysics and the theory of rationality His principal work embodied in a series of landmark essays stretching over nearly 40 years exhibits a unity rare among philosophers contributing on so many diverse fronts This is the only comprehensive introduction to the full range of Davidson s work Donald Davidson Marc Joseph, 2014-12-18 Donald Davidson s work has been of seminal importance in

the development of analytic philosophy and his views on the nature of language mind and action remain the starting point for many of the central debates in the analytic tradition His ideas however are complex often technical and interconnected in ways that can make them difficult to understand This introduction to Davidson s philosophy examines the full range of his writings to provide a clear succinct overview of his ideas The book begins with an account of the assumptions and structure of Davidson s philosophy of language introducing his compositionism extensionalism and commitment to a Tarski style theory of truth as the model for theories of meaning It goes on to show how that philosophical framework is to be applied and how it challenges the traditional picture Marc Joseph examines Davidson s influential work on action theory and events and discusses the commonly made charge that his theory of action and mind leaves the mental as a mere epiphenomenon of the physical The final section explores Davidson s philosophy of mind some of its consequences for traditional views of subjectivity and objectivity and more generally the relation between minded beings and the physical and mental world they occupy

Physicalism and Mental Causation Sven Walter, Heinz-Dieter Heckmann, 2015-11-04 Physicalism the thesis that everything there is in the world including our minds is constituted by basic physical entities has dominated the philosophy of mind during the last few decades But although the conceptual foundations of the physicalist agenda including a proper explication of notions such as causation determination realization or even physicalism itself must be settled before more specific problems e g the problems of mental causation and human agency can be satisfactorily addressed a comprehensive philosophical reflection on the relationships between the various key concepts of the debate on physicalism is yet missing This book presents a range of essays on the conceptual foundations of physicalism mental causation and human agency written by established and leading authors in the field

Action and Existence J. Swindal, 2011-11-08 Since the pioneering work of Donald Davidson on action many philosophers have taken critical stances on his causal account This book criticizes Davidson s event causal view of action and offers instead an agent causal view both to describe what an action is and to set a framework for how actions are explained

12 Modern Philosophers Christopher Belshaw, Gary Kemp, 2009-03-09 Featuring essays from leading philosophical scholars *12 Modern Philosophers* explores the works origins and influences of twelve of the most important late 20th Century philosophers working in the analytic tradition Draws on essays from well known scholars including Thomas Baldwin Catherine Wilson Adrian Moore and Lori Gruen Locates the authors and their oeuvre within the context of the discipline as a whole Considers how contemporary philosophy both draws from and contributes to the broader intellectual and cultural milieu

Donald Davidson and the Mirror of Meaning Jeff Malpas, 1992-10-29 This book discusses the ideas of Donald Davidson on the nature of understanding and meaning and the nature of truth and knowledge providing an account of Davidson s holistic and hermeneutical conception of linguistic interpretation and more generally of the mind

Thomas Aquinas on the Metaphysics of the Human Act Can Laurens Lwe, 2021-07-08 This book argues that for Aquinas a human act exhibits a structure analogous to that of a material object

Speaking of Events James Higginbotham, Fabio Pianesi, Achille C. Varzi, 2000-04-13 In recent years the idea that an adequate semantics of ordinary language calls for some theory of events has sparked considerable debate among linguists and philosophers *Speaking of Events* offers a vivid and up to date indication of this debate with emphasis precisely on the interplay between linguistic applications and philosophical implications Each chapter has been written expressly for this volume by leading authors in the field including Nicholas Asher Pier Marco Bertinetto Johannes Brandl Denis Delfitto Regine Eckardt James Higginbotham Alessandro Lenci Terence Parsons Alice ter Meulen and Henk Verkuyl *Exploring Agency in the Mahabharata* Sibesh Chandra Bhattacharya, Vrinda Dalmiya, Gangeya Mukherji, 2018-03-19 The Mahabharata one of the major epics of India is a sourcebook complete by itself as well as an open text constantly under construction This volume looks at transactions between its modern discourses and ancient vocabulary Located amid conversations between these two conceptual worlds the volume grapples with the epic's problematisation of dharma or righteousness and consequently of the ideal person and the good life through a cluster of issues surrounding the concept of agency and action Drawing on several interdisciplinary approaches the essays reflect on a range of issues in the Mahabharata including those of duty motivation freedom selfhood choice autonomy and justice both in the context of philosophical debates and their ethical and political ramifications for contemporary times This book will be of interest to scholars and researchers engaged with philosophy literature religion history politics culture gender South Asian studies and Indology It will also appeal to the general reader interested in South Asian epics and the Mahabharata

Understanding Events Thomas F. Shipley, Jeffrey M. Zacks, 2008-02-25 We effortlessly recognize all sorts of events from simple events like people walking to complex events like leaves blowing in the wind We can also remember and describe these events and in general react appropriately to them for example in avoiding an approaching object Our phenomenal ease interacting with events belies the complexity of the underlying processes we use to deal with them Driven by an interest in these complex processes research on event perception has been growing rapidly Events are the basis of all experience so understanding how humans perceive represent and act on them will have a significant impact on many areas of psychology Unfortunately much of the research on event perception in visual perception motor control linguistics and computer science has progressed without much interaction This volume is the first to bring together computational neurological and psychological research on how humans detect classify remember and act on events The book will provide professional and student researchers with a comprehensive collection of the latest research in these diverse fields

Matters of Metaphysics D. H. Mellor, 1991-06-27 This selection of D H Mellor's work demonstrates the wide ranging originality of his work It gathers sixteen major papers on related topics which together form a complete modern metaphysics

Cultural Difference on Trial Anthony J. Connolly, 2016-04-22 *Cultural Difference on Trial* The Nature and Limits of Judicial Understanding comprises a sustained philosophical exploration of the capacity of the modern liberal democratic legal system to understand the thought and practice of those culturally different

minorities who come before it as claimants defendants or witnesses Exploring this issue from within the tradition of contemporary analytical and naturalistic philosophy and drawing upon recent developments in the philosophy of mind and language this volume is informed by a sound academic and practical grasp of the workings of the legal system itself Systematically analysing the nature and limits of a judge s ability to understand culturally different thought and action over the course of a trial this volume is essential reading for anyone interested in the workings of the modern legal system

From Action to Ethics Constantine Sandis,2024-01-11 Over the course of the last 15 years Constantine Sandis has advanced our understanding of the role that action plays in shaping our moral thought In this collection of his best essays in the philosophy of action Sandis brings together updated versions of his writings accompanied by a new introduction Read collectively they demonstrate the breadth of his interests and ability to relate to broader issues within the culture connecting debates in philosophical psychology about motivation negligence and moral responsibility with Greek tragedy social psychology and literature Along this path from action to ethics Sandis engages with Hegel Wittgenstein Anscombe Ricoeur Davidson and Dretske together with contemporary authors such as Jennifer Hornsby and Jonathan Dancy As he responds to each thinker and theme he develops his own philosophical position the key thesis of which is that philosophy of action without ethics is empty ethics without philosophy of action is blind

A Companion to Metaphysics Jaekwon Kim,Ernest Sosa,Gary S. Rosenkrantz,2009-04-13 Fully extended and revised A Companion to Metaphysics 2nd Edition includes a section of detailed review essays from renowned metaphysicians and the addition of more than 30 new encyclopedic entries taking the number of entries to over 300 Includes revisions to existing encyclopedic entries Features more than 30 all new A to Z entries Offers a section of in depth essays from renowned metaphysicians Provides the most complete and up to date reference guide for students and professionals alike

Mind and Morality John Bricke,1996 John Bricke presents a philosophical study of the theory of mind and morality that David Hume developed in his Treatise of Human Nature and other writings The chief elements in this theory of mind are Hume s accounts of reasons for action and of the complex interrelations of desire volition and affection On this basis Professor Bricke lays out and defends Hume s thoroughgoing non cognitivist theory of moral judgement and shows that cognitivist and standard sentimentalist readings of Hume are unsatisfactory as are the usual interpretations of his views on the connections between morality justice and convention
