

Albrecht Durer's Adam and Eve: A Renaissance Masterpiece

3 pages | 658 words

Albrecht Durer's painting Adam and Eve, completed in 1504, exemplifies the Renaissance style for its visual artisanship and religious imagery. The artist's efforts to render the human body realistically, as well as the use of shadow and perspective, set it apart from the recently-ended medieval era through its evolved use of technique. The work consists of two tall panels with dark backgrounds, placed side by side. The left panel contains Adam, standing on a surface scattered with small stones.

Unclothed, he is thin but muscular, particularly in the torso, calves, and arms. Apparently in the act of speaking to Eve, he seems to be shifting his weight toward his left while holding a small branch with an apple attached; its leaves conveniently cover his genitalia. At the right, Eve (also unclothed, with her genitalia covered by cleverly-placed leaves) is stepping forward, the weight shifted onto her right foot. Her figure is buxom and soft, emphasizing her femininity as opposed to Adam's masculinity.

In her left hand, she holds an apple while a serpent coils around a tree branch to the viewer's right. The two figures occupy separate panels but look at one another, drawn together by both their glances and the apples they hold. The subject matter is obvious to anyone familiar with the Judeo-Christian tradition, depicting the original couple's sin of consuming the forbidden fruit – an allegory for their transgression against God's mandates and fall from grace. Adam and Eve is a solid example of the early Renaissance style for two chief reasons.

First, it suits the style's tendency toward religious and mythological subjects. Here, the Biblically-derived theme is overtly religious, as is much other Renaissance art throughout western and southern Europe, particularly in Italy. According to art scholar Allan Braham, Durer "undertook fearlessly to learn from the achievements of the Italian Renaissance [and] developed an unusual interest in the experiments of Venetian painters into effects of colour and light" (Braham, 1965, p.)

His use of shadow and color echoes that of Michelangelo, who used similar techniques in his frescoes in the Sistine Chapel a few years later. In addition, it exemplifies early Renaissance painting in its attempts at depicting light, color, and the human form naturalistically. Instead of depicting his subjects as flat figures, Durer (who had visited Italy a decade earlier and absorbed its influence) lights his painting from the viewer's left, with their right sides shadowed.

The colors are at times vivid (especially the skin, which in Eve's case looks luminous), but darkness also plays a role, emphasizing the brightness. Also, Adam and Eve's physiques are realistic, with their musculature emphasize according to their movements; they are not stiff or oddly contorted, but seems to be captured in motion (as their billowing hair attests). In his other works (particularly his paintings but also his woodcuts), Durer pays the same attention to shadowing, three-dimensionality, and anatomical correctness.

For example, The Virgin in Prayer (1518) resembles other Renaissance artists' works in its use of bright colors, properly-placed shadows, and attention to anatomical detail...

The

Mysteries of Paris and London Richard Maxwell, 1992 In this ambitious and exciting work Richard Maxwell uses nineteenth century urban fiction particularly the novels of Victor Hugo and Charles Dickens to define a genre the novel of urban mysteries His title comes from the mystery mania that captured both sides of the channel with the runaway success of Eugène Sue's *Les mystères de Paris* and G W M Reynolds's *Mysteries of London* Richard Maxwell argues that within these extravagant but fact obsessed narratives the archaic form of allegory became a means for understanding modern cities The city dwellers drive to interpret linked the great metropolises with the discourses of literature and art the primary vehicles of allegory Dominant among allegorical figures were labyrinths panoramas crowds and paperwork and it was thought that to understand a figure was to understand the city with which it was linked Novelists such as Hugo and Dickens had a special flair for using such figures to clarify the nature of the city Maxwell draws from an array of disciplines ideas and contexts His

approach to the nature and evolution of the mysteries genre includes examinations of allegorical theory journalistic practice the conventions of scientific inquiry popular psychiatry illustration and modernized wonder tales such as Victorian adaptations of the Arabian Nights In *The Mysteries of Paris* and *London* Maxwell employs a sweeping vision of the nineteenth century and a formidable grasp of both popular culture and high culture to decode the popular mysteries of the era and to reveal man's evolving consciousness of the city His style is elegant and lucid It is a book for anyone curious about the fortunes of the novel in the nineteenth century the cultural history of that period particularly in France and England the relations between art and literature or the power of the written word to produce and present social knowledge **Littell's**

Living Age, 1880 Albrecht Dürer and His Legacy Giulia Bartrum, Günter Grass, Joseph Leo Koerner, Ute Kuhlemann, 2002 Albrecht Dürer 1471–1528 was in a sense the first truly international artist The collection of his work in the British Museum is one of the best in the world This book shows how his sophisticated development of the techniques of woodcut and engraving introduced the idea of multiple images into fine art and thereby altered the history of printmaking The chronology of his career is traced from his early work in the medieval tradition of Martin Schongauer through the experience he acquired while living in Italy to his major print projects for the Holy Roman Emperor Maximilian I The book also examines Dürer's influence at later periods from the obsessive interest in his work by collectors and artists during the late sixteenth century to the virtually iconic status he acquired amid the rise of German nationalism during the nineteenth century The Nobel-winning German novelist Günter Grass himself a printmaker contributes a subjective view of Dürer's images from a twentieth-century standpoint while other introductory essays by Giulia Bartrum Joseph Koerner and Ute Kuhlemann consider aspects of Dürer's legacy through history The illustrations include all Dürer's best-known prints as well as numerous drawings and watercolours BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved
