Essays On Religion And Education:

Essays on Religion and Education Richard Mervyn Hare, 1998 R M Hare one of the most widely discussed of today's moral philosophers here presents his most important essays on religion and education in which he brings together the theoretical and the practical The book opens with an exposition of his ideas on the meaning of religious language There follow several essays theoretical and practical on the relations between religion and morality which have deep implications for moral education The central question addressed in the rest of the volume is how children can be educated to think for themselves freely but rationally about moral questions and Professor Hare examines the effects on society of failure to achieve this He argues that those who want to dispense with morality are in effect resigning from a vital educational task Attitudes to euthanasia and to equality of educational opportunity are taken as examples of how our thinking can go wrong The former Professor of Moral Philosophy at Oxford has brought together a collection of papers exploring with his customary clarity of thought and elegance of expression the light which moral philosophy can shed on certain religious and educational questions it is illuminating to follow an eminent philosopher at work on matters of great practical importance and in prodding theologians to think more clearly Church Times a cogent and compelling vision enunciated with all the intelligence elegance and vigour for which Hare is justly renowned Times Literary Supplement All the essays are a delight to read clear succinct precisely expressed and devoid of technical jargon The collection will be welcomed by philosophers of education Theology an important resource for persons interested in clarifying the language of moral education in a religiously pluralist society Religious Studies Review admirably clear and straightforward IJournal of the American Academy of Religion It is a pleasure to receive for review a book by someone who is palpably expert in a particular discipline and able to deploy that discipline on topics which have a demonstrably practical relevance to education Most books satisfy neither criterion this one satisfies both Add Hare's well known clarity of style and presentation and we have something really worth reading Oxford Review of Education

Gill,2020-04-14 During the twentieth century theological and religious perspectives have been marginalized if not utterly excluded in many of our colleges and universities The essays in this book argue in different ways for the critical appreciative inclusion of theological and religious perspectives in higher education The contributors believe that even in our secular religiously disestablished era religion and God continue to occupy an important and dynamic role in personal and social life If our colleges and universities are to fulfill their higher aspirations of educating whole persons for the real world in all of its diversity and challenge we need to go bravely against the flow and give God tenure

Early Modern Natural Law Theories T. Hochstrasser,P. Schröder,2013-06-29 The study of natural law theories in the early Enlightenment continues to be one of the most fruitful areas of research in early modern intellectual history In recent years there have been substantial reassessments of Grotius Pufendorf Thomasius 1 and the whole university based tradition associated with the Fr haujkl rung The appeal of the discourse of natural jurisprudence to groups and individuals operating outside conventional educational and political structures such as the Huguenot diaspora has also been highlighted Moreover the contextual understanding of the work of unambiguously major philosophers such as Hobbes and Kant and its reception has been greatly enhanced by studies that have sought to view them as 3 participants in rather than bystanders alongside the discourse of natural law Thus thinkers previously not considered central to this discourse have been incorporated into it afresh However there is no danger of natural jurisprudence going unchallenged as the meta discourse of political theory in this period for recently new studies of the role of libertine and jansenist thought in shaping the priorities of the early Republic of Letters have challenged its position among the intellectual 4 achievements of the social and political theory of the early Enlightenment This volume therefore offers a timely opportunity to reassess both the coherence of the concept of early Enlightenment and the specific contribution of natural law theories to it
